## Products to help towards achieving your green flag

*"We at Eco-Schools have worked for the last three years alongside Learn Play Nexus in working to encourage our schools here in Northern Ireland to reduce the amount of single use plastic making it's way to landfill. Their mission aligns with our strategy to find waste and pollution solutions to help with the climate crisis. The feedback from our schools each year about the products and the experience they have had with Learn Play Nexus has been extremely positive and we look forward to continuing our fantastic partnership with them."*

## OUR MISSION

We are on a mission to transform the way people use stationery by providing innovative, refillable solutions that reduce single-use plastic waste. Our range of glue sticks, paint sticks, and handwriting pens are designed to make sustainability simple and accessible, offering products that save plastic, save money, and save the planet. Guided by our motto, 'Refill & Save,' we aim to empower individuals and communities to embrace eco-friendly choices without compromising on quality, affordability, or creativity. Together, let's build a smarter, more sustainable future - one refill at a time.

**REDUCE SINGLE-USE • USE MORE RECYCLABLE MATERIALS**  
**PRODUCE SUPERIOR, LONG LASTING PRODUCTS • MAKE STATIONERY MORE FUN!**

## OUR QUALITY

Our factory is committed to exceptional quality, operating from a 16,000 m<sup>2</sup> ISO 9001:2015-certified facility audited by global brands like Disney and NBCUniversal. We adhere to international standards such as EN71, REACH, and ASTM, and utilise advanced machinery, including injection and blow moulding systems producing 300,000 pieces daily, reactors creating 18 tons of glue, and assembly machines delivering 360,000 glue sticks daily. Powered by 100% renewable solar energy, we combine sustainability with precision to meet large-scale demands.

**MADE WITH 100% RENEWABLE  
SOLAR ENERGY**

# OUR INNOVATION

Our unique innovation is a refillable dispenser system compatible with a variety of glue and paint sticks, allowing users to easily switch between refills. Traditional dispenser tubes are rarely recycled due to contamination and their small size, but our design solves these issues. The dispenser is reusable, with refills optimised to save plastic by using less material and being repurposable for creative projects, aided by animated video guides. Made from PET and HDPE—the world's most recycled plastics—the refills include a puzzle cap, enabling users to connect multiple refills for easier recycling. Additionally, we minimise colour usage, ensuring maximum recyclability by keeping most materials clear and eco-friendly.

# Pegs to Paper®

**NEW  
Sets!**

## The Foundation for All Subjects

HANDWRITING • SPEECH & LANGUAGE • SPATIAL AWARENESS • COGNITIVE STIMULATION

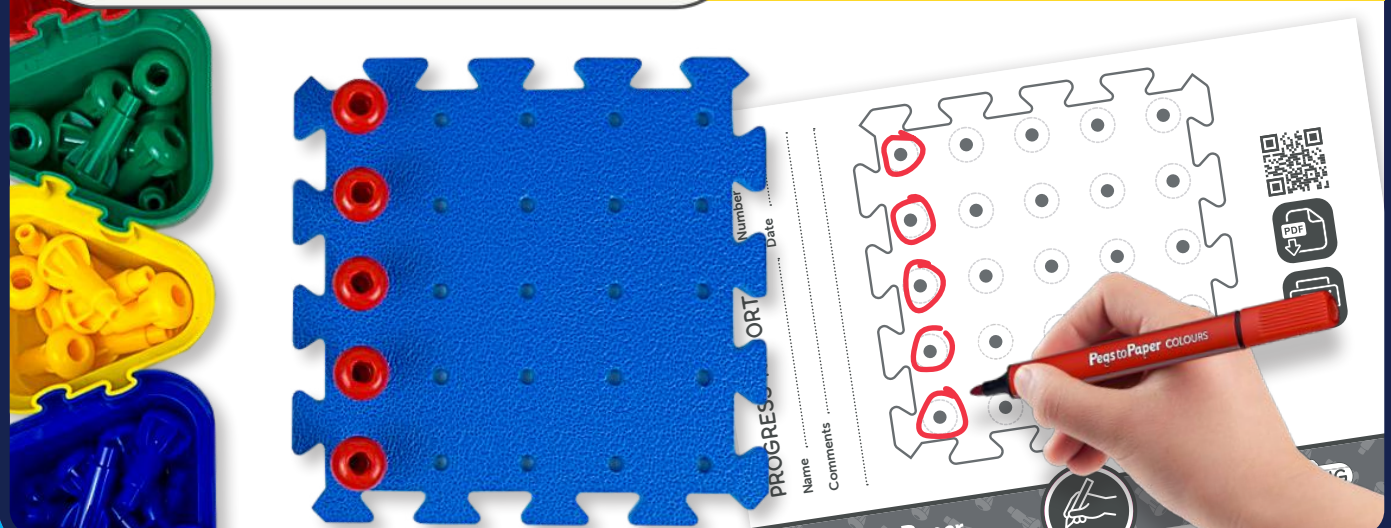

### PATTERN PURSUIT

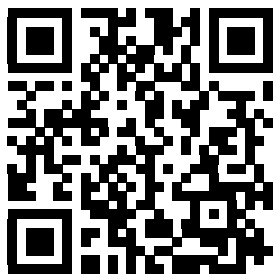

Three different educational pattern games in one package.

### Exercises for HANDWRITING

Two age targeted sets for establishing the fundamentals for literacy and handwriting.

## Introduction Video

## Designed with a renowned expert!

“The focus of my work has been how to enhance cognitive development through physical activity, and I’ve learnt over the years through observation and research how important it is that children have good concrete experience of their physical environment. Psychologists call this ‘embodied cognition’, that by actively engaging with environment, thinking and understanding are stimulated.”

### *Dr Angela Webb - Author of Pegs to Paper*

Dr. Angela Webb is a psychologist specialising in the cognitive and academic difficulties experienced by children with developmental disorders, particularly Developmental Coordination Disorder. This has led to her interest in children with handwriting difficulties. She has worked in a multi-disciplinary team at The Queen Anne Street Practice in Central London and as an advisor in schools. She has also lectured part-time at the Institute of Education, London University where her research focuses on the link between handwriting problems and poor written composition. Angela also chaired the National Handwriting Association from 2006 to 2018.

## Pegs to Paper: Pattern Pursuit

Pattern Pursuit is an inclusive educational game for all ages and abilities. For young children, it enhances pattern recognition, spatial awareness, and fine motor skills through vibrant play. For seniors in care homes, it provides mental stimulation and encourages social interaction, supporting cognitive health and motor coordination. This versatile game fosters creativity and offers enriching experiences across generations.
