# GEN.3 223 SILENT RECOIL SPRING BUFFER SPRING SYSTEM

The JE Machine AR-15 Silent Recoil Buffer Spring System is a drop-in replacement for the traditional buffer spring and buffer for the AR platform. This revolutionary patented one-piece design guide rod eliminates the risk of breaking as compared to other cap screwed recoil spring systems.

The revolutionary anti-vibration and anti-friction design results in a much smoother cycling rifle with none of the cheese grading sound that is typical of the standard buffer components.

- ✔ Self-contained & drop-in design for easy installation
- ✔ Reduce felt recoil
- ✔ Type III hard-coat anodized 6061-T6 aluminum guide rod for durability

- ✔ No cap screw in the front compared to other recoil spring systems to prevent breaking and improve reliability
- ✔ For carbine buffer tube only, not compatible with rifle buffer tube

# SIDEWINDER BLAST DIFFUSER FOR .556/.223

The JE Machine sidewinder blast diffuser is engineered to divert the concussion and side blast forward of the weapon system instead of venting to the side as seen with the traditional devices.

Additionally, the Sidewinder aids in minimizing dust when firing from a prone position that would traditionally be seen when firing with a standard flash hider or muzzle brake.

- ✔ Directs concussion and muzzle blast forward
- ✔ Improves comfort and safety for the shooter and those nearby the firing line
- ✔ Limits any dust while firing
- ✔ No restrictions associated with silencers

- ✔ 1/2-28 thread for .223 / 5.56 only
- ✔ Black nitride finished
- ✔ Fluted design

# SKELETONIZED PISTOL STABILIZER BLADE

The JE Machine AR-15 ultra-lightweight Skeletonized Pistol Stabilizer Blade is manufactured to exacting tolerance and fits pistol buffer tube. The stabilizer improves your marksmanship by providing additional support for your pistol when you operate your AR pistol with one hand.

The design incorporates a vertical fin, which you stabilize against the inside of your forearm when in the firing position. Install within minutes, just slip it on and tighten the large set screw for a rock-solid installation.

- ✔ Ultra-lightweight. Weighs a scant 4.8 oz
- ✔ Sloping cheek weld provides a contact surface for user comfort and stabilizing
- ✔ Securely lock it in place with a set screw

- ✔ Designed to fit any pistol buffer tube with a diameter up to 1.25"
- ✔ Forearm strap slots
- ✔ Impact-resistant, high-strength polymer
- ✔ Available colors: Black/Tan

# JE MACHINE AR-15 SOPMOD STOCK

The AR-15 SOPMOD stock was originally designed by the NSWC CRANE for the battlefield. This JE Machine SOPMOD stock provides excellent cheek comfort while allowing you to maintain optimum shooting position.

The rubber buttpad provides a no-slip surface against chest rigs and body armor while preventing the gun from moving. The built-in watertight battery storage allows you to store CR123A 3V lithium batteries or other small items such as earplugs.

- ✔ Sloping cheek weld provides a wide contact surface for user comfort
- ✔ Integrated quick detach sling swivel sockets on both sides
- ✔ Watertight battery storage for CR123A 3V lithium batteries

- ✔ Impact-resistant, high-strength polymer
- ✔ Fits Mil-Spec carbine buffer tubes
