Dr. SIMON OURIAN

Shaping form into timeless expressions of beauty

Dr. Simon Ourian stands at the intersection of art and science — where precision meets emotion, and form becomes language. Recognized globally for his mastery of proportion and symmetry, Ourian extends his life long study of beauty into a sculptural realm that redefines the boundaries between anatomy and architecture.

In this exclusive exhibition, seven monumental **sculptures** and seven **paintings** are presented from **Dr. Ourian's personal collection**, each one meticulously selected and **curated by Haykoff Gallery** to reveal the evolution of his artistic and philosophical journey. These works explore the universal pursuit of harmony — between material and spirit, stillness and motion, perfection and impermanence.

Through polished surfaces and architectural rhythm, the sculptures reflect the precision of an aesthetic doctor's hand and the soul of a sculptor. The paintings, in turn, echo the anatomy of thought — where color becomes pulse and texture breathes life into the unseen. Together, they compose a dialogue between body and essence, a meditative exploration of what it means to create beauty in its purest, most enduring form.

Each piece is a testament to Ourian's belief that art, like transformation itself, is an act of evolution — not merely of the physical, but of perception and consciousness.
