It's Nanoed. 8 Hour Hand Sanitizer +

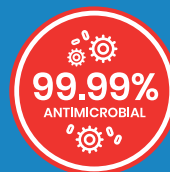

You can now treat your hands with It's Nanoed Hand Sanitizer +.

Mechanical spikes exhaust and kill microbes preventing them from attaching, providing long-lasting benefits that are 99.9% effective against most common germs, bacteria and viruses. The need for constant reapplication of skin damaging, alcohol-based hand sanitizer when touching anything potentially contaminated is no longer required.

Unlike regular hand sanitizer, It's Nanoed Hand Sanitizer + provides Eco-friendly, Non-toxic, long-lasting protection that helps bring peace of mind by offering protection BEFORE and AFTER contamination.

It's Nanoed protects like no other, killing germs on contact with an invisible, breathable nano barrier glove that stays working and locked in place for 8 Hours or more.

It's Nanoed. 30 Day Barrier Protection

It's Nanoed Barrier Technology is based on engineered molecules of silicon dioxide (SiO_2) forming a strong covalent bond that stays on hard surfaces for up to 30 Days.

This barrier is only 1 to 10 nanometers thick. In comparison, the average flu virus is 100 nanometers thick. These barrier spikes destroy and prevent harmful microbes from attaching to the surface.

When an area is coated with It's Nanoed Barrier Protection, billions of "invisible" nanoscopic spikes form and bond with the surface, instantly electrocuting microbes and pathogens. These nano-spikes provide ongoing protection for up to 30 Days

30 Day Barrier Protection

- Is Easily applied
- No harsh chemicals
- Ensures longevity for your investments
- 99.9% effective against killing microbes
- Rejects water, oil, solvents, dirt, and mold/mildew
- Is resistant to abrasion, environmental decay, and U.V. light breakdown
- Does not require the use of special PPE that is required when using chemical kill solutions
