Values & Design Philosophy

We are committed to creating thoughtful work environments that inspire and improve everyday life.

That's why each collection is developed with a strong focus on functionality, refined materials, and carefully considered design and production choices. Our design approach is modular and purposeful — made as adaptable and multifunctional as possible.

This ensures enduring designs that adapt effortlessly to evolving interiors — or can be easily disassembled and repurposed thanks to a minimal material palette. It's our way of embedding circular thinking at the core.

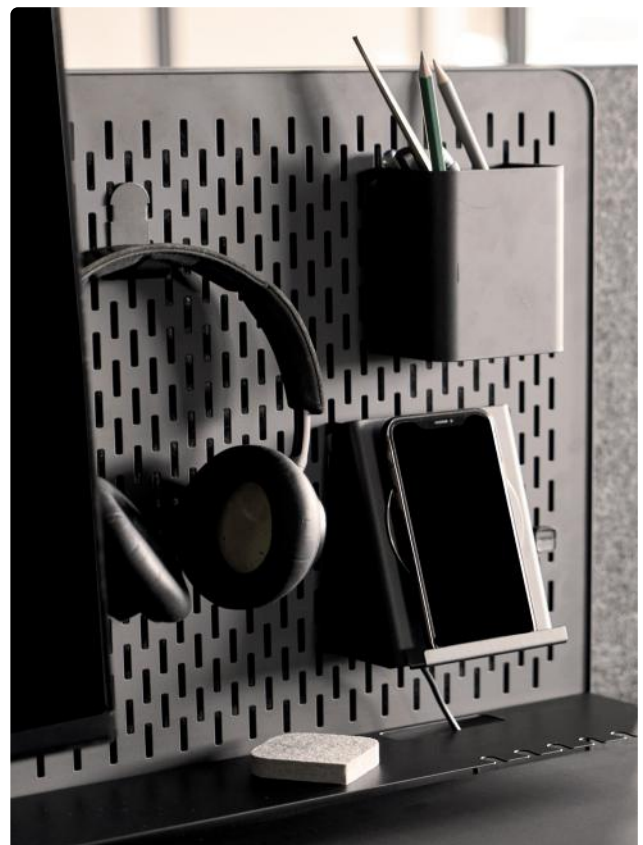

Many of our designs also invite greenery into the workspace, enhancing air quality and creating a calm, sensory link to nature.

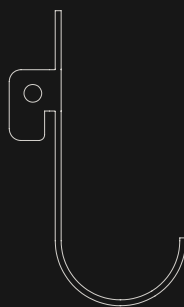

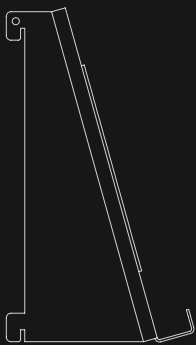

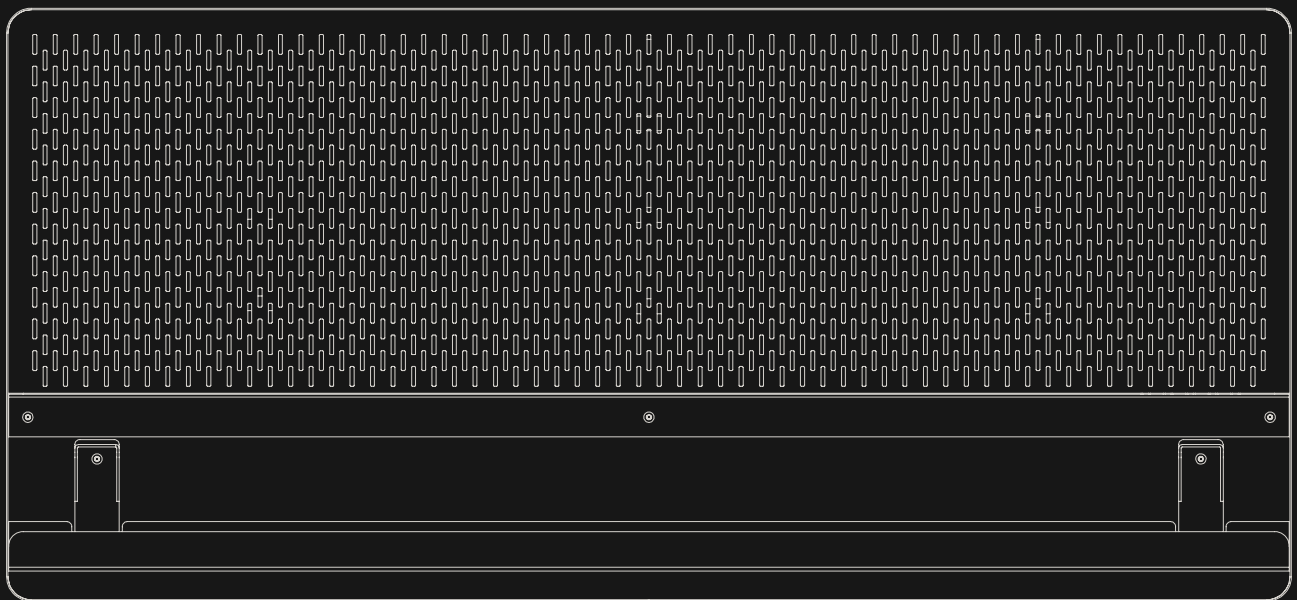

Crafting Custom Solutions with Purpose

Our catalogue offers standard products designed to enhance workplace wellbeing in an aesthetic and functional way.

But our true strength lies in custom solutions. These projects grow from dialogue, take shape at the drawing board, and are refined through prototyping and testing. We approach each task with curiosity, care and full commitment.

Modular & Adaptable

Possibilities

Adapt Board

The concept behind the **Adapt** Board is to create a beautiful and functional organizational board that can be individually customized. Every detail has been thoughtfully considered – from the soft, rounded edges of the back panel to the cable outlets and the seamless movement of the modules.

Flexible Durable Recycled

Felt & Colors

Our felt is made from minimum 70% recycled plastic, offering a more sustainable alternative to conventional interior solutions. To lower CO₂ emissions, all felt products are designed for flat packing and efficient transport.

Felt is both flexible and durable, with a soft, textile-like surface that adds warmth, improves acoustics, and brings a sense of calm to the workspace.

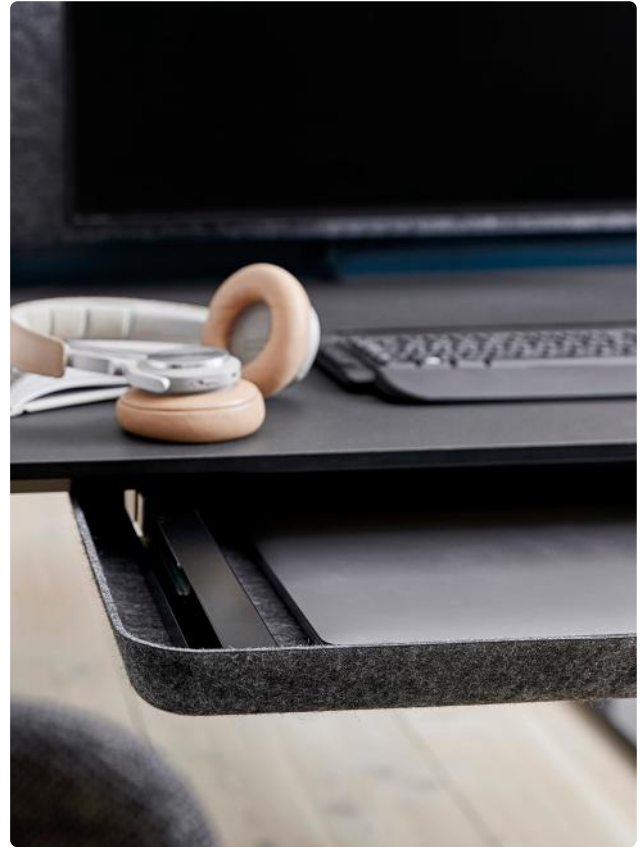

We offer a curated range of standard colours — all of which can be explored in our showroom. For specific colour choices or project needs, we always recommend speaking with our sales team.

Felt Tray

Recrafted Simplicity

One result is this aesthetic felt drawer — crafted using recycled plastic bottles. The material enhances the product's sustainability and adds authenticity and character to the design.

Extend Ceiling Mounted

Extend Shelving System

Extend Shelving System is a flexible and scalable shelving solution that combines aesthetics and functionality to create order and harmony in any space.

The system is built with profiles, a variety of shelves and modules, offering countless possibilities for modular organization. We have already designed and delivered a wide range of tailored solutions – our client cases speak for themselves.

Various needs – countless ways to tailor

Extend Ceiling Mounted brings visual calm to any space by stretching seamlessly from floor to ceiling. It reduces the need for wall mounting, creates clean architectural lines, and offers a stable, well-balanced structure — making it an ideal choice for dividing rooms.

Extend Free Standing, Oak Veneer Bottom Plate Double

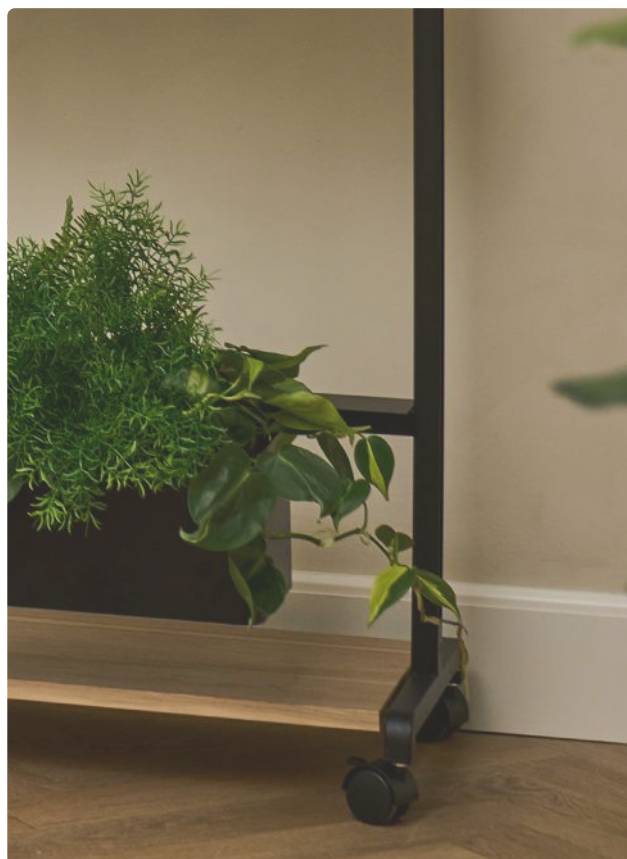

1. Extend Free Standing, Oak Veneer Bottom Plate w. Wheels, Double

Divide space - **Create possibilities**

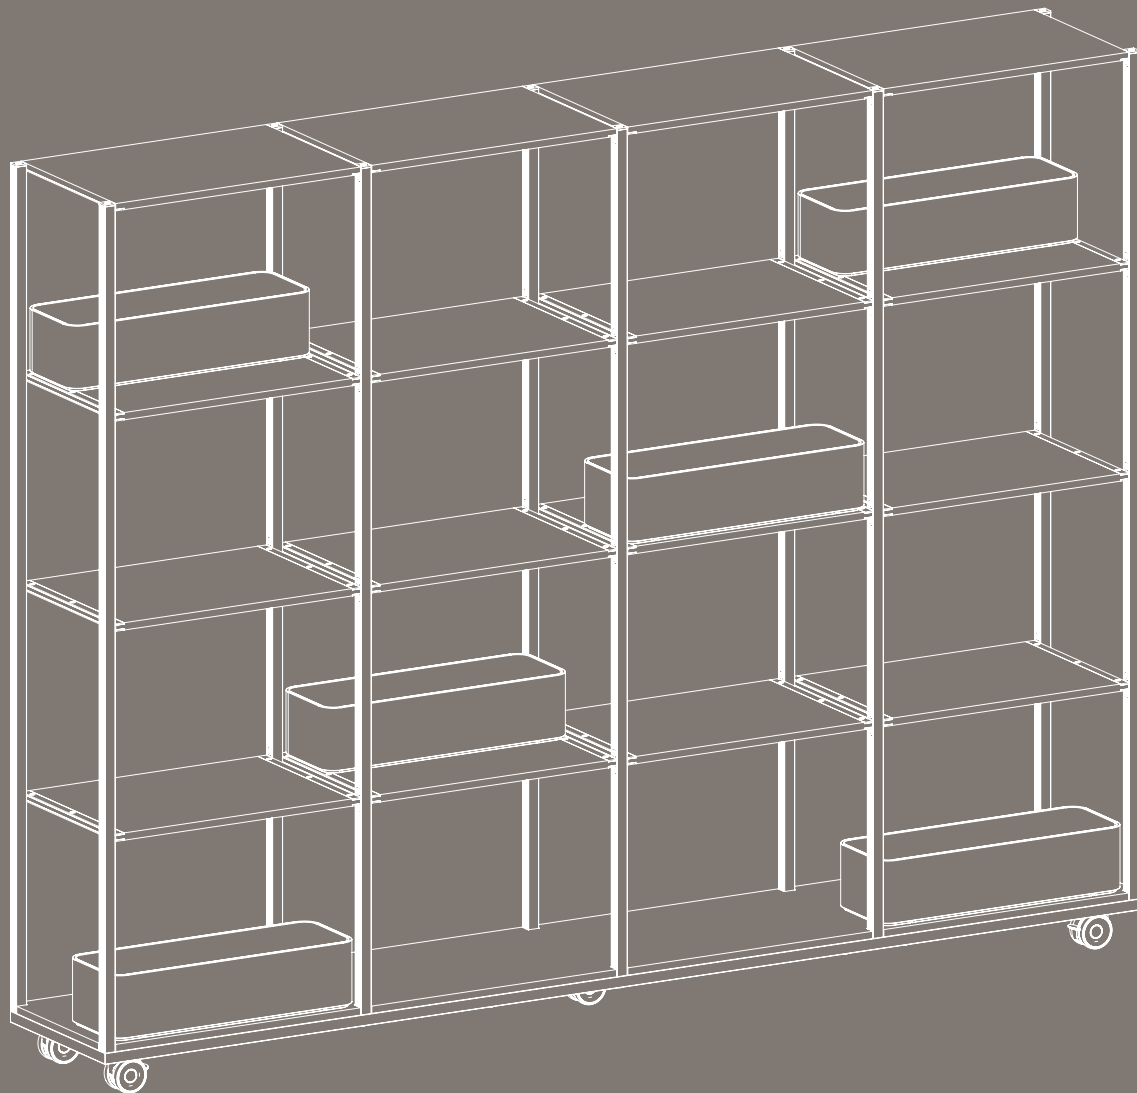

Extend Free Standing w. Wheels

Movable

Spaces need clear zones to create calm, functionality, and flow. But in dynamic work environments, locking into a fixed layout can be limiting. That's why we design flexible Extend systems — easy to move, easy to adapt. Some include wheels, all include practical modules that go beyond dividing space. It's spatial design that works with you.

Extend 3D Free Standing, w. Wheels

Extend is the ideal shelving system for creating flexible, inspiring room-in-room solutions – whether the purpose is better acoustics, integrated greenery, or encouraging collaboration.

It also offers practical storage options with enclosed felt compartments and built-in drawers for waste sorting – eliminating the need for extra furniture while keeping everything within easy reach.

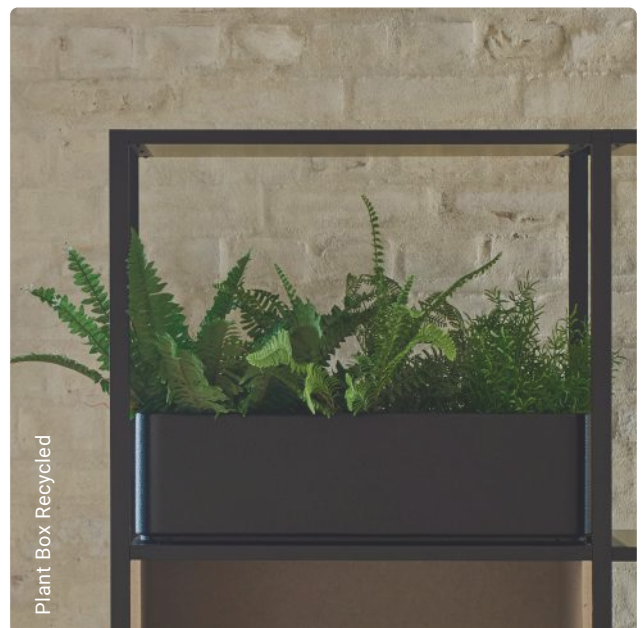

Extend Wardrobe, Custom Project

Storage and greenery are essential parts of any interior design. By integrating both into a space divider, everything stays close at hand.

We offer durable plant options that stay fresh-looking over time, but we always encourage adding live plants to support indoor air quality — such as the peace lily.

Desk Trays

Our drawers are designed to meet one essential need: discreet, functional storage for office supplies and devices — always within reach, yet never in the way.

They're made to fit a wide range of desks. With over 64 variations across models, sizes and colours, there's a solution for every workspace.

Clean Desks - Clear Minds

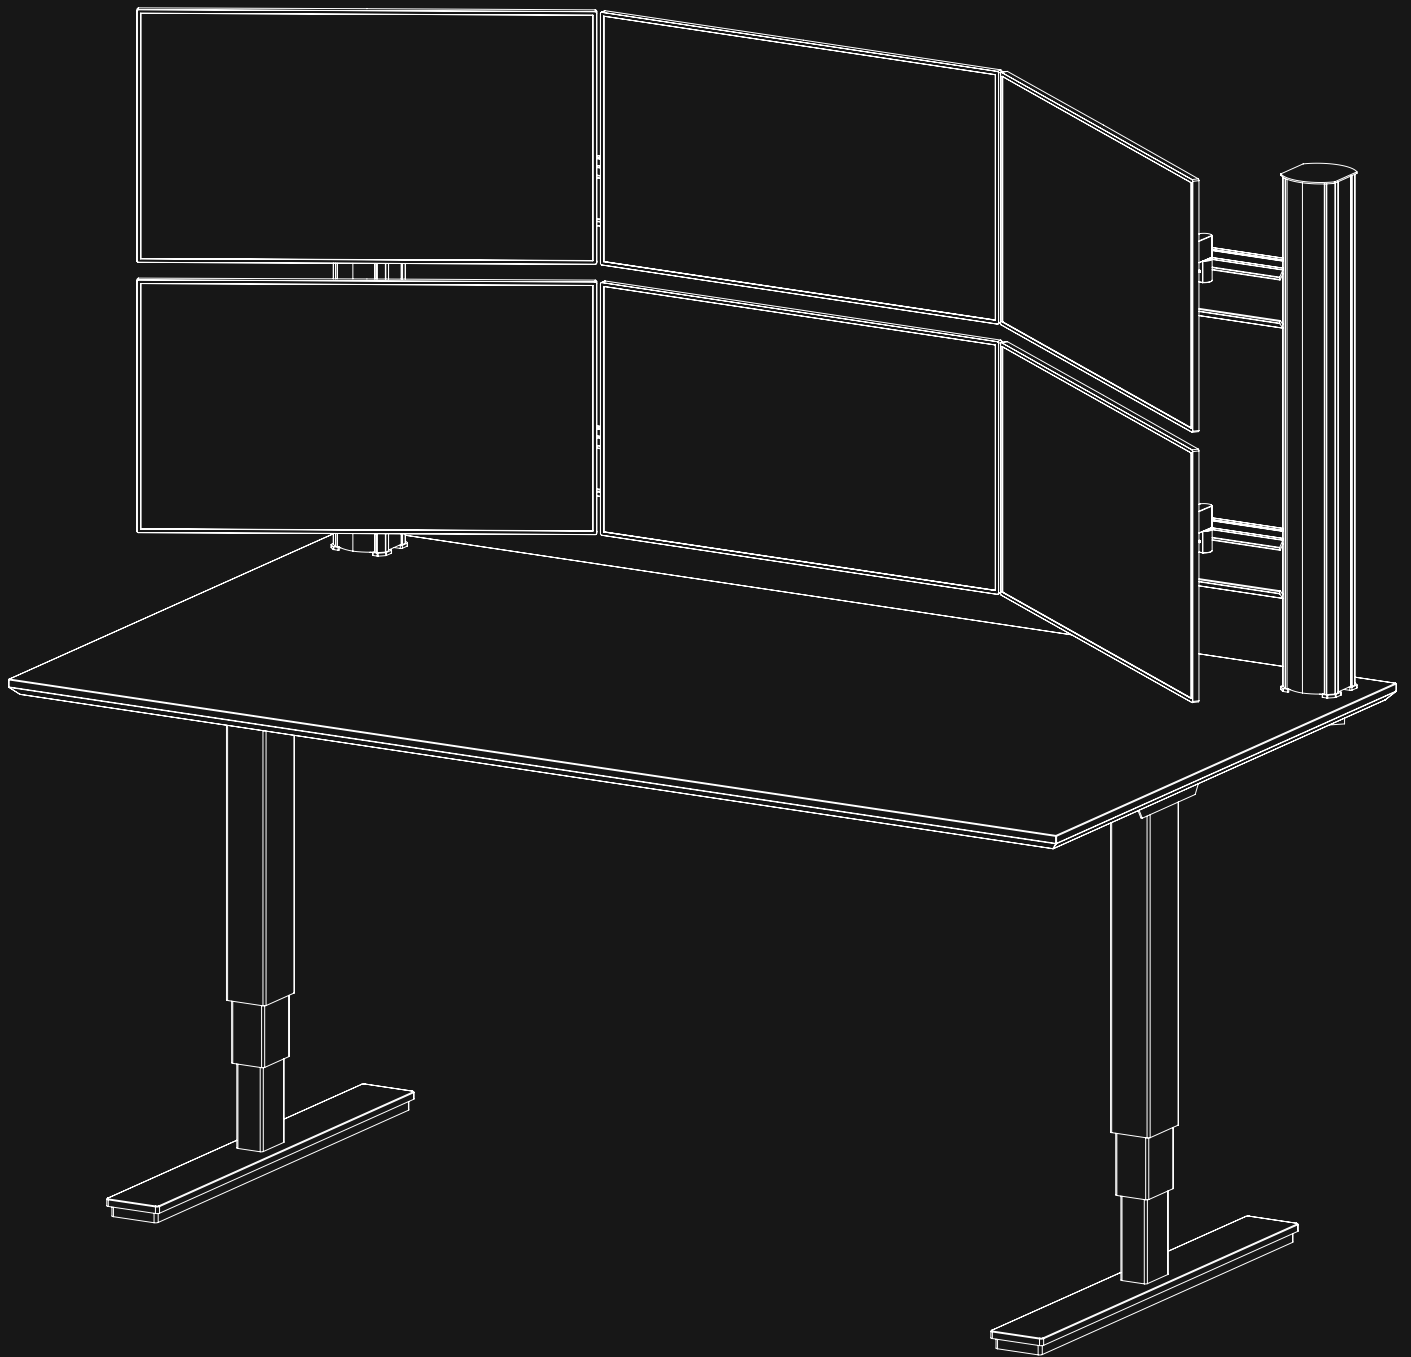

Future Flex

Setting up a desk to look professional, with clean lines and hidden cables, can be a challenge. At the same time, there are increasing demands for ergonomic solutions to ensure employees can work comfortably without strain.

We offer custom solutions and professional screen systems, tailored to the number of monitors required.

Clean & Ergonomic

1. Custom monitor Solution, 6 Monitors

Monitor Solution, w. actuator

apto plus designs and manufactures screen solutions, tailored to meet specific needs and preferences.

Our design is based on two types of aluminium profiles. The many combination options make it possible to create setups for three, six, or eight screens — or any other configuration that fits your workspace.

These solutions can be used for both computer monitors and TV screens. In short, the possibilities are endless. Our team is ready to help you find the best solution to ensure a stable and functional screen setup.

Cable Tray Open

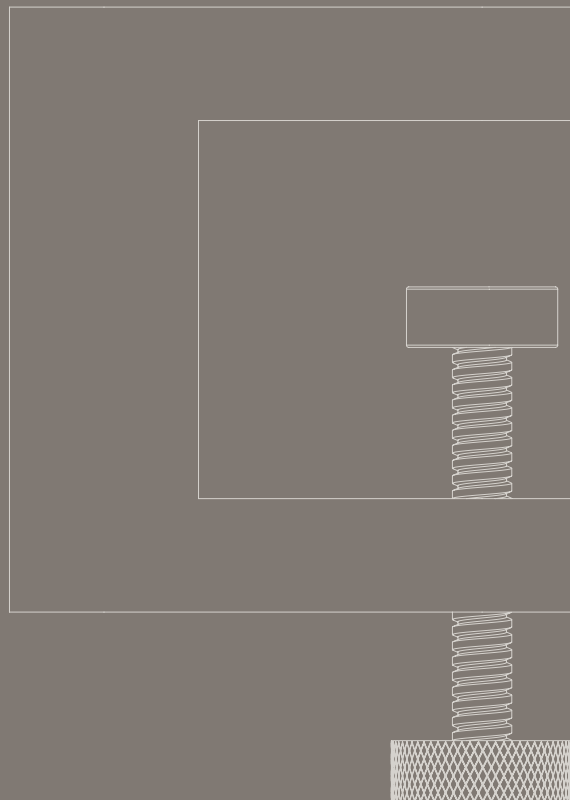

Multi Clamp

At the heart of the **Clamp** Collection is a custom-designed clamp, defined by minimalist lines and straightforward functionality.

It attaches in seconds to any horizontal surface with a tapered edge of up to 27 mm. Once secured, one of the collection's accessories can be placed into the clamp's plastic cylinder — ensuring a silent, stable and tool-free setup.

The three partners in **apto plus**

We are - Driven & Welcoming

apto plus has been one of Denmark's leading designers and manufacturers of office accessories for the modern workplace since 1997. Originally known as PJ Production, but from 2025, the company offers much more than just desk and office accessories. This led to the decision to rebrand and rename the company, making our brand more visible and reflecting the values we stand for.

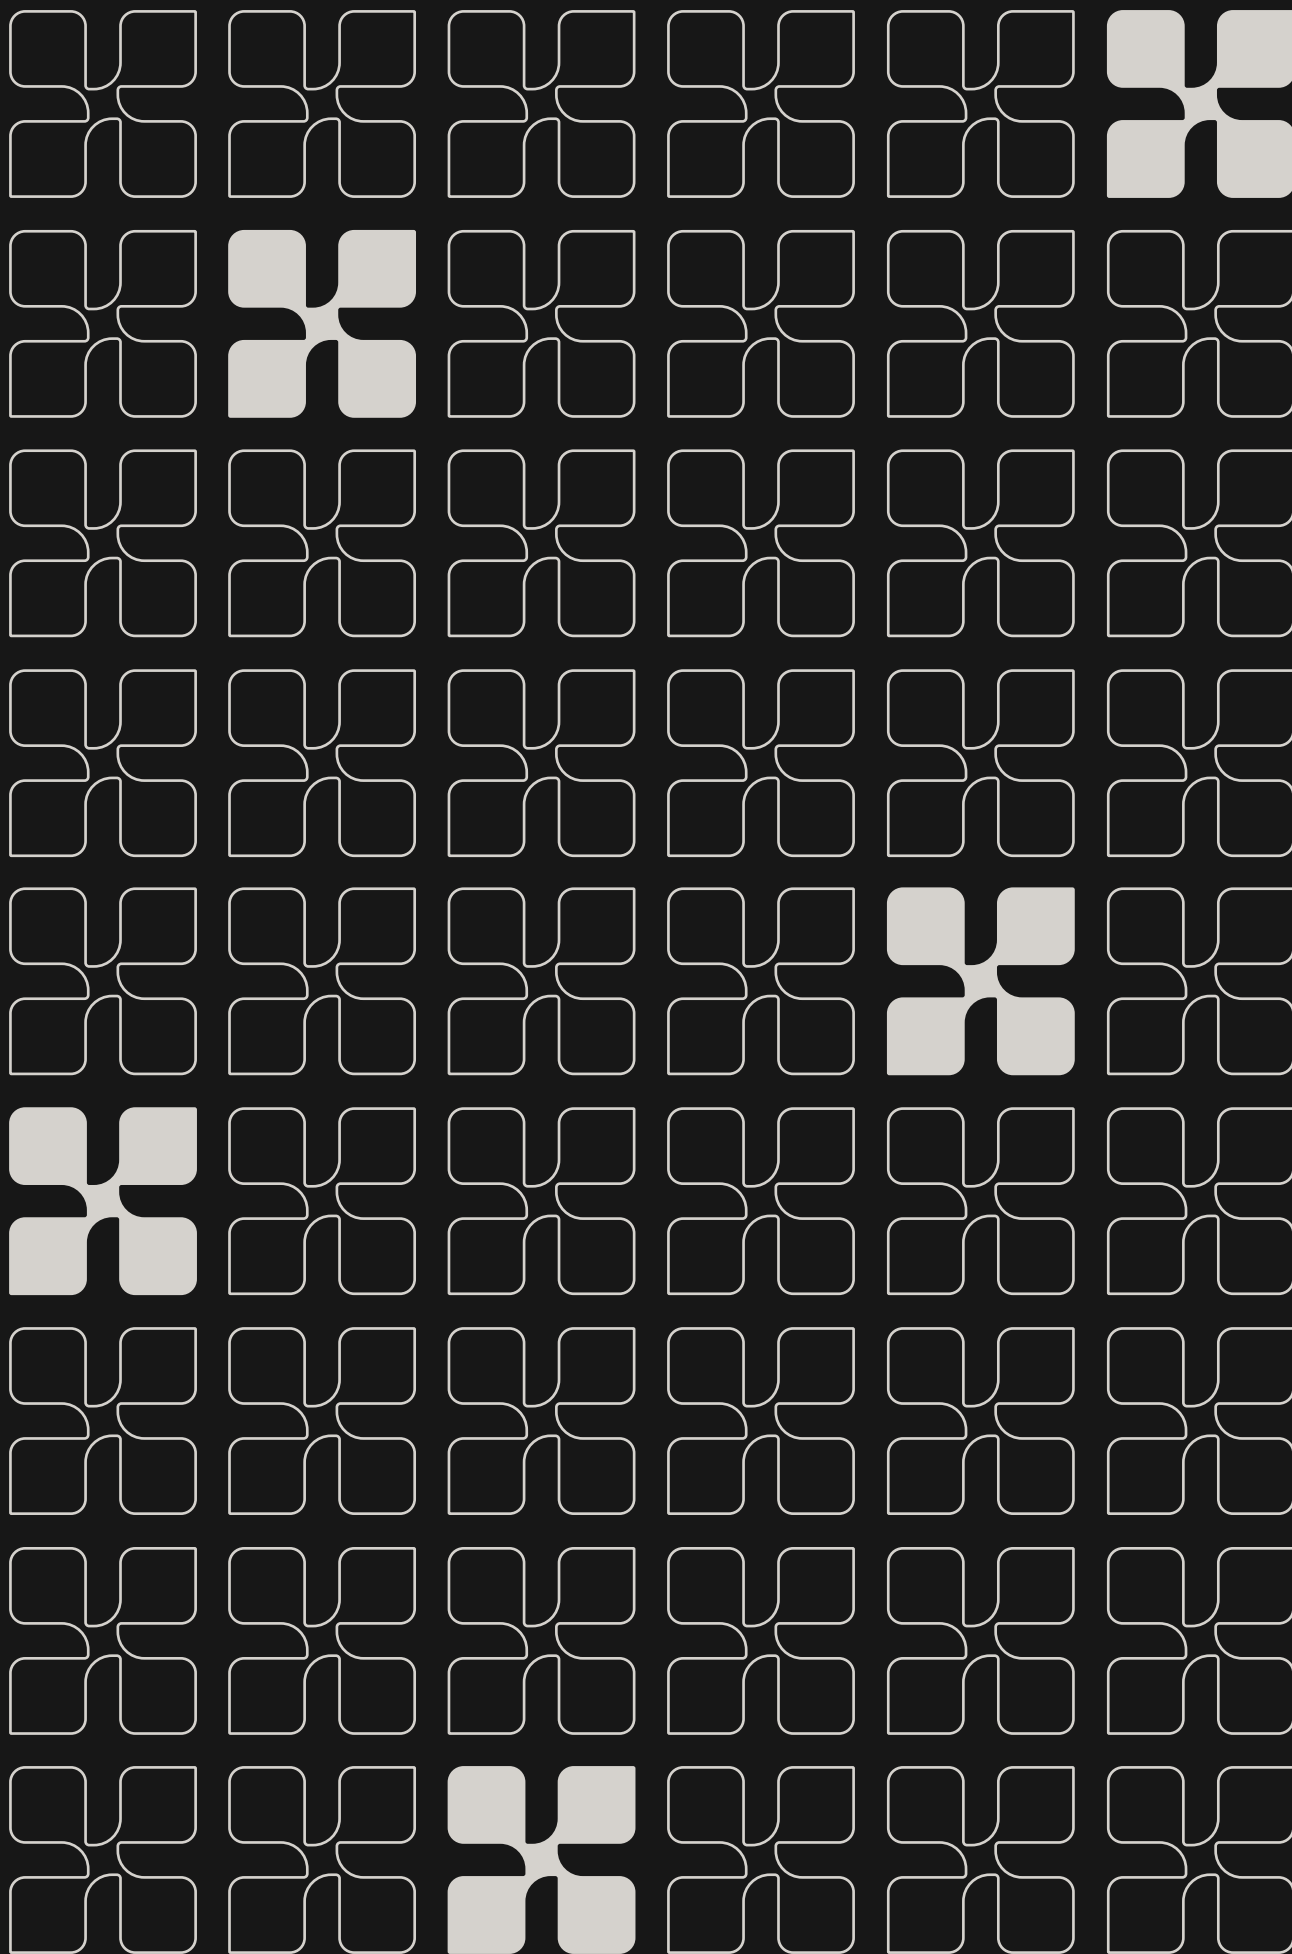

The word **“apto”** is derived from Portuguese and means change and adaptability, while **“plus”** represents quality, relationships, collaboration, and positivity.

Today, **we design interior solutions for dynamic environments**, creating a comprehensive experience within the space, tailored both aesthetically, modularly, and functionally.

As a Danish company with ambitious international goals, we create bespoke solutions for both small and large projects—efficiently optimizing our customers’ workflows.

We take pride in the fact that several of our employees have been part of the company for more than ten years. These long-term relationships help us build strong partnerships—based on continuity, trust, and meaningful dialogue across multiple projects.
