PACK ULTIMATE

All the content of this PDF is included in the Pro Pack

The prices are reflected on the website in the corporate packs section

https://3dfernandes.com/

https://3dfernandes.com/pack-3d-fernandes/

Contact me through this link to acquire the 3D packs

https://www.3dfernandes.com/contact/

Email: info@3dfernandes.com

The 3D packs contain more than 50,000 high-quality models and more than 40,000 PBR 4K, 6K, 8K textures.
All packs are compatible with all 3D and architecture programs on the market, since they are in FBX and OBJ formats, which are universal formats for 3D.
ATTENTION: These 20 TB are Internet compilations, they are designed to save the user time in searching and organizing 3D content for architecture. These packages are not sold since they are compilations, it is only a gift for people who purchase my main packs that are based on Lumion, D5 Render and Sketchup of which make up a total of 2,000 GB.

ABOUT ME

My name is Fábio Fernandes, and I am a computer engineer and 3D designer specialized in architectural visualization for interiors and exteriors. I also work in SEO, programming, and website creation, with advanced experience in Cpanel and WordPress, and strong knowledge of HTML.

I have over 15 years of experience in the field of computer science. Currently, I work for architecture companies where I focus on creating 3D projects, including images and videos. [My Renders]

When I started this exciting project in 2018, I handled everything autonomously. Fortunately, over the years, our company has been gradually growing. Now, at 3D Fernandes, we have several collaborators who play a fundamental role in the creation and organization of our 3D packages. On the other hand, I exclusively handle 3D projects and website creation. [Our Company]

Throughout these years, I have collaborated with prominent architecture companies, participating in the development of both interior and exterior projects. I have also had the opportunity to share my knowledge with companies that develop 3D rendering programs, such as Lumion and D5 Render. Below, you can find the following links where we appear on the official Lumion website: [Article 1 Materials and Texture] [Article 2 Interior Design Collection]

My renders have been selected by Lumion on more than 30 occasions within the weekly top 5 between 2019 and 2023. Additionally, they have been recognized on websites and magazines such as VWArtclub, Rebusfarm, Architecture & Design, Amazing Architecture, 3D Empire, among others. [Awards]

We have been selling 3D packages for over 4 years in more than 90 countries around the world, and we already have more than 3000 satisfied clients. We have helped numerous individuals achieve excellent results in their renders. Our main clients are usually architecture studios, architects, and 3D designers. [Packs 3D]

METHOD TO MAKE A REALISTIC RENDER

1 | 3D Libraries: To obtain a realistic render it is essential to have the maximum variety of high-quality models, which is why these packs contain more than 50,000 models.

2 | Textures: It is important to have high quality textures to obtain a realistic render, preferably 4k, 6k and 8k PBR, the packs contain a total of 40,000 PBR textures in the most complete pack.

3 | Photography: It is important to have some knowledge of photography to be able to take excellent angles in our renders.

4 | The final rendering settings: Each scene has a different setting, because not all projects are the same. That's why I chose these scenes because I consider them to be the best for indoors and outdoors. You just need to study them very well and implement them in your projects, it's that simple. Analyze how the materials, natural and artificial light are configured, practice is the most important to become an expert in rendering and obtain realistic results. These packages include fully configured Lumion and D5 Render scenes, you can extract these configurations and use them in your projects.

5 | Photoshop post-production: This would be one of the most important steps, because we can use the 'raw camera' tool and adjust the colors of our render. In this case my working method in Photoshop is only that, I do not apply any other extra method, with this last step we can improve the realism of our render, obviously all this will depend on the user and experience they have. Another tip that I always give when we are finalizing our render is to have a realistic image as a reference so that we can see the differences with the real world and our render. This will help a lot with the final result.

If you have any questions you can write to me directly on my social networks or by email, I will be happy to help you.

Google Drive

The method to download all the 3D packs is through Gmail Driver, for that reason you only need to have a Gmail account to be able to access and download all the content.

Only those people who buy the 3D pack will have permission, otherwise it is impossible to access the link or share it, since the folders have permissions, this way I make sure that the content of the pack is kept safe and only the customers who buy the pack 3D have permission.

The client will have permanent access to the content, with no time limit to download, in any case I recommend downloading all the content and saving it on an external drive. If in the future the client loses access, he can contact us, we will grant him permissions again.

You need a minimum of 2,000 GB on your hard drive to be able to download all the Gmail driver packs, in case you buy the 20 TB ultimate pack, if you buy the Lumion or D5 render pack you will need a minimum of 1,500 GB. The other 20 TB of the ultimate pack are shortcuts that run with bitorrent, you can see this tutorial in questions and answers, specifically number 13.

Link questions and answers: https://www.3dfernandes.com/faq/

The 20 TB folder only weighs 500 MB and contains more than 3,000 individual packages, then executing each shortcut will start the download and upon completing all downloads you will have more than 20,000 GB downloaded. You can individually select each pack, there are packs of 5 GB, 100 GB, others of 500 GB, etc. For this reason you do not need a hard drive with so much capacity, you can choose which pack you want to download to your liking with total freedom.

To make the payment, I will send a payment request or the customer can directly send the money we accept: Paypal, Payonner, WesterUnion, Revolud and Gumroad all of these accept credit cards.

The packs are paid in $ USD American dollars, if you don't have dollars, don't worry, these online banks will be in charge of changing your country's currency into dollars.

We have decided not to use automatic payment because we prefer that the client feels satisfied by negotiating directly with us. This way, we can resolve any questions before payment is made in real time. In any case, the links are private, which means that only those who purchase the 3D pack can access them. For this reason it is not possible to implement an automatic system. This ensures that the packs are sold exclusively to people dedicated to architecture and design.

You can open a dispute or claim if there is a problem or you have not received exactly what you purchased. PayPal and the other banks mentioned are the most secure platforms in the world and offer great buyer protection.

Don't forget to read our most frequently asked questions and answers before purchasing: https://www.3dfernandes.com/faq/

D5 COMMUNITY
For beginners and individuals

USD
$0
Free to Use

Download

FEATURES
- Unlimited number of projects
- Livesync workflow integrations
- Major file format imports
- Skylight & weather adjustments
- Stylized rendering effects
- Custom HDRI, LUT, and IES
- Brush tool for quick vegetation placement
- Path animation tool
- Custom local asset library
- 16K image, panorama rendering
- 2,000 models and materials

D5 PRO
For advanced, professional users

Annual | Monthly
