STRENGTH AND DURABILITY

To protect the wood, our special outdoor lacquers are composed of a UV coating that guarantees superior resistance to weather conditions. Our collection features seike wood, renowned for its exceptional durability and resistance. In the Amazon, seike is traditionally used to make river rafts, demonstrating its ability to withstand harsh environmental conditions and prolonged exposure to water.

Additionally, apart from the waterproof fabrics, all cushions feature a mesh backing that allows air to flow through, preventing the build-up of moisture and mold, keeping the foam firm and comfortable.

PROTECTION COVERS

To maintain the integrity and longevity of our Amazonika products, we have created 100% waterproof protection covers tailored for each piece.

These covers are essential for keeping your furniture dry and protected, ensuring it remains in optimal condition and retains its warranty.
