# WELCOME ABOARD, SPECIAL AGENT OF CHANGE.

# HELLO. WE ARE THE INTERGALACTIC HANSEATIC LEAGUE, THE IHL FOR SHORT.

Our crew – The Captain, Officer Pascal (the ship's cat) and myself, The Navigator – have travelled through space and time from your future, 2225, on our ship The IHL Discovery.

## HOW DID WE GET HERE?

We arrived through the black hole at the centre of your Milky Way Galaxy and are anchored here until March 2021.

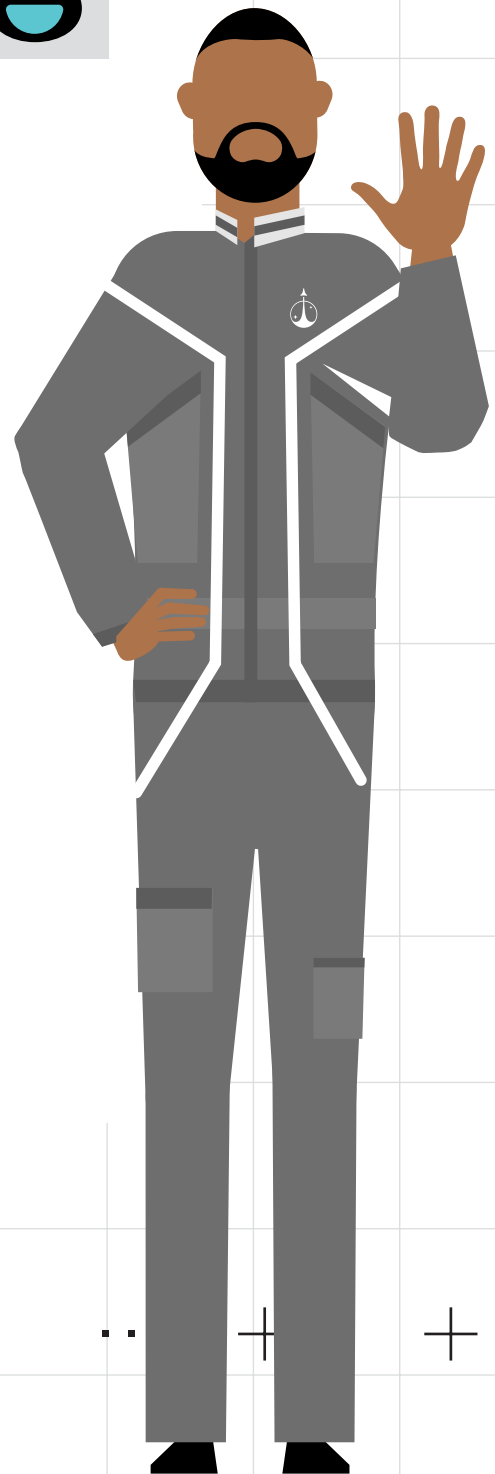

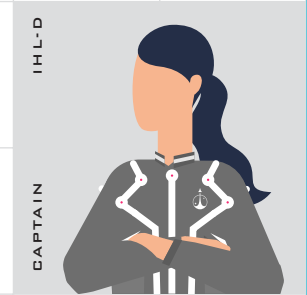

## WHERE ARE WE FROM?

We're from King's Lynn, but more than 200 years into your future.

In 2225, your town is the planet's key spaceport, Earthport Lynn, and it's where we trained to fly.

Our 23rd-century King's Lynn is a beautiful place, preserving Earth's natural beauty and biodiversity. **Ours is a bright future, thanks to you**, our heroes.

You saved the future from climate change. We know that this moment now is remembered as the 'Mindshift', and **your actions changed the future for the better**.

## WHY ARE WE HERE?

In your near future, 2025, increased activity on the Sun leads to solar storms. These storms often make beautiful colours and patterns in the sky called **Auroras**.

However, one storm was very bad and wiped your entire internet – even the cat videos. This erased all our knowledge of your time. Any history stored on computers and phones was lost.

The only records we have of your time are thoughts that were written down on paper, or ideas that clever people, like all of you, had in your minds... and shared with each other.

## PLEASE HELP US

Future King's Lynn, our home, is in trouble.

Space-time events have been disrupted and our Earthport Lynn risks an alternative future of terrible climate change.

To fix this glitch, **The IHL NEED YOU** to share your ideas and show us your **vision for a brighter future**.

# CURRENT EARTH YEAR: 2021 [THE PRESENT]

ABOUT YOUR

# FUTURE FASHION

## IN OUR FUTURE

- Fast fashion is no longer a thing.
- It's cool to wear clothes with 'zero air miles'.
- We have to think carefully about the materials and resources we use to make our clothes.
- Clothing might be for intergalactic travel or leisure.

# FUTURE TRANSPORT

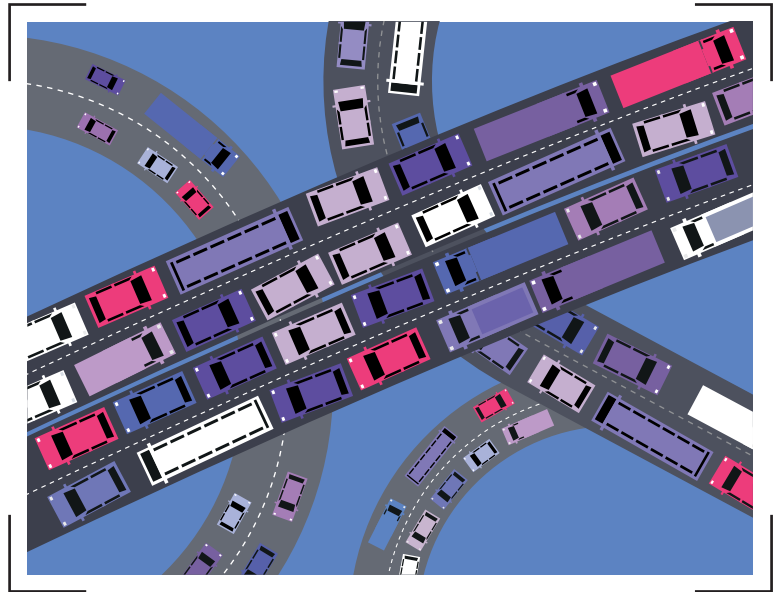

## IN OUR FUTURE

- Cars that use fossil fuels are a thing of the past.
- Boats and planes are not the same as they were.
- We use renewable energy to power our vehicles.
- Travel is local and intergalactic.

THE IHL HAS  
DISCOVERED THAT IN  
EARTH YEAR 2021,  
HUMANS MAINLY TRAVEL  
IN CARS. WE CAN SEE  
THAT IN PLACES YOUR  
ROADS ARE VERY BUSY.

IMAGINE IF, IN YOUR  
FUTURE, CARS AND  
GRIDLOCKED ROADS  
BECOME A THING OF  
THE PAST.

TELL US WHAT YOU THINK WE  
COULD DO WITH ALL THE EMPTY  
ROADS AND PARKING SPACES.

IN OUR FUTURE WE GET  
AROUND IN DIFFERENT WAYS.

— How do YOU imagine getting  
around in the future?

DRAW YOUR  
DESIGN FOR  
A FUTURE  
INTERGALACTIC  
VEHICLE.

USE PENS  
AND BOLD  
LINES.

PLEASE LEAVE  
SPACE AROUND  
YOUR DESIGN.

(20 YEARS' TIME)

007:877/1

IN THE PAST, KING'S LYNN WAS A THRIVING SEAPORT, A BUSY MARKET TOWN AND AN IMPORTANT GATEWAY TO EUROPE.
