

# AGENCY BOOKLET

for Brand Partnership

We believe that the most beautiful results are those that feel effortlessly your own.

“Our goal is not to change who you are, but to bring forward the beauty that is already yours.” True beauty is never defined by trends or imitation. It is found in the qualities that make each unique.

# Intro- duction

Our story begins in 1999, when Rattinan Clinic was born from a unique vision. Our founder—a physician who saw beyond the surface—understood that cosmetic surgery is not simply about changing appearances.

It is a practice that bridges the physical and the emotional, an art demanding the delicate touch of a painter’s brush and the discerning eye of a sculptor who comprehends the body’s every proportion.

This philosophy merges the precision of medical science with cutting-edge innovation and technology.

## **Plastic Surgery Packages in Thailand**

Accredited by AACI and ISO-certified, Rattinan Clinic has welcomed patients from over 50 countries. Our bilingual team, international-standard operating rooms, and transparent care process make your journey safe, seamless, and stress-free.

# Medical Tourism in Thailand

## **A World-Class Healthcare Destination**

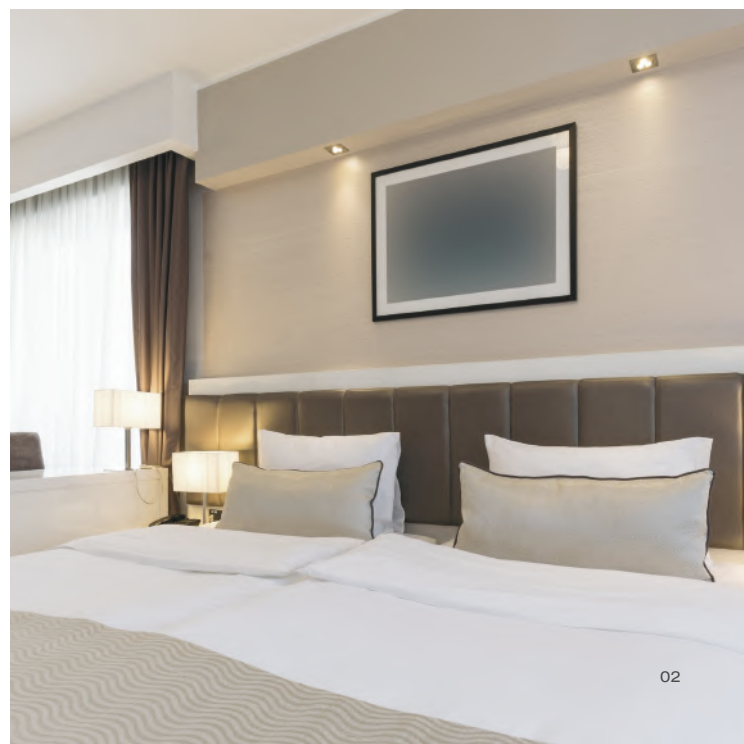

We offering specialized aesthetic and body contouring treatments in a private setting with personalized care and natural-looking results

## **Airport Pickup Service**

To enhance comfort during landing, transit from the terminal to your residence may be organized beforehand.

## **Accommodation**

A quick trip is mostly plenty. We recommend staying for approximately 3 days at one of our partnered hotels

# Brand Value

## Why Choose 360° Body Contouring at Rattinan Clinic

### Leading in Body Contouring Surgery Since 1999

Pioneers in body contouring, backed by physicians who master both the science and art of the human form.

### Precision is Our Foundation

Every procedure is thoughtfully designed for your unique body because true beauty is simply being your most confident self.

### The Art of Contemporary Beauty

We nurture both body and spirit with care that is personalized, unhurried, and completely private.

### Safety is Our Highest Standard

Precision is Our Foundation Advanced prescreening technology including Visia Skin Analysis and Styku 3D Body Scan — ensures every treatment plan is truly yours.

### Premium Holistic Care

Safety is Our Highest Standard World-class US FDA and Thai FDA-certified technology, combined with proprietary techniques, delivers safe treatments with minimal recovery time.

### Worldwide Trust

Worldwide Trust Over 52 countries, thousands of journeys all leading to one clinic that perfects the balance between medical expertise and artistic

## Spacious Operating Rooms

Beauty that comes with safety Rattinan Clinic is certified by the following safety and cleanliness standards

Our medical team and staff, supported by advanced technology, strictly maintain hygiene and sterilization before and after every procedure.

**Large-scale operating rooms**  
Certified by the Ministry of Public  
Health of Thailand

**Iso 14644-1 certified**  
Clean room for surgical cleanliness

**Covid-19 free**  
Environment certified by the Depart-  
ment of Health

**Continuous 4-year quality**  
Certification from AACI, USA

# Our Caring Process

**More Than the Procedure  
We Personalize Every  
Journey We Share with You**

## **Consultation & Planning**

Start with a free digital meeting from home, letting our doctors assess your goals and offer early advice prior to travel. Once here, join our staff face-to-face to verify your custom care map and gain total certainty and trust before starting.

## **Pre-Procedure Preparation**

Clients should obey their surgeon's rules, get plenty sleep, and finish surgical tests if deep sedation is needed. Our clinical screening tasks to confirm your physical status is ready for the intended surgery.

### **Procedure Day**

Guests are strictly monitored by our surgical staff, with session length fixed by the target zone and personal review, involving deep scans of skin zones and sonar visuals where needed to assist exact clinical mapping.

### **Recovery & Aftercare**

Many people can walk easily soon after the surgery and restart soft tasks as told by their physician. Extensive healing and planned routine help are customized for every person, featuring a week-one visit, thread pulling, initial nursing, extra healing rub, and a quarter-year medical check to guarantee peak healing and output.

# Liposuction Packages in Thailand

**Accredited by AACI and ISO-certified**, Rattinan Clinic has welcomed patients from over 50 countries. Our bilingual team, international-standard operating rooms, and transparent care process make your journey safe, seamless, and stress-free.

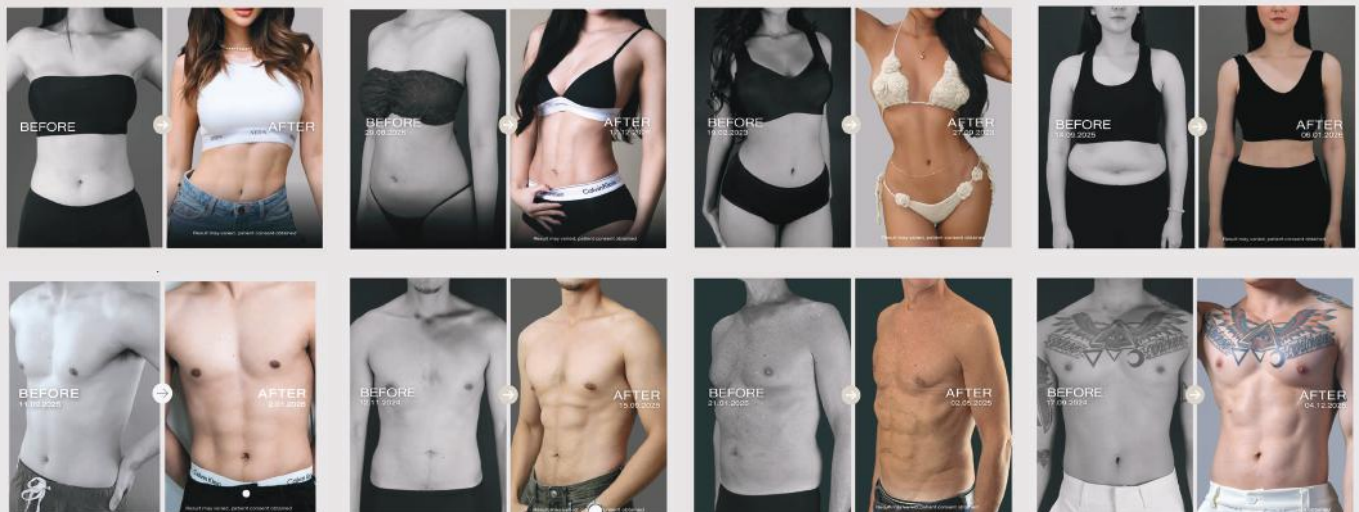

Verified. Accredited.  
Trusted by AACI,  
4 Consecutive Years  
(2022–2025).

# Why Choose Liposuction at Rattinan Clinic

## Trusted Since 1999

Trusted Expertise in Body Contouring Since 1999

Eliminate excess fat and welcome smooth and firm skin with our care.

## Advanced 2 Step Techniques

Designed for comprehensive results in a single procedure. By combining fat removal with skin tightening, we deliver a perfectly sculpted silhouette with smooth, natural-looking skin.

### 01

Precision fat removal using modern technology to meticulously sculpt your body with minimal bruising and a rapid recovery.

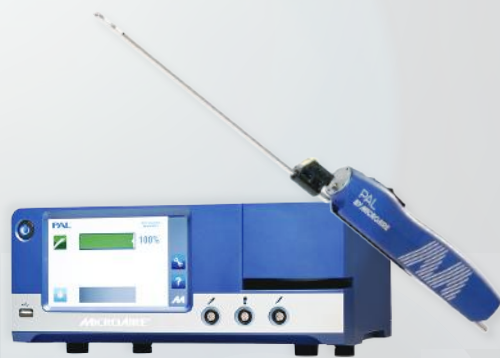

### 02

Post-Lipo skin tightening for enhanced skin firmness and reduced laxity, ensuring beautiful, long-lasting results.

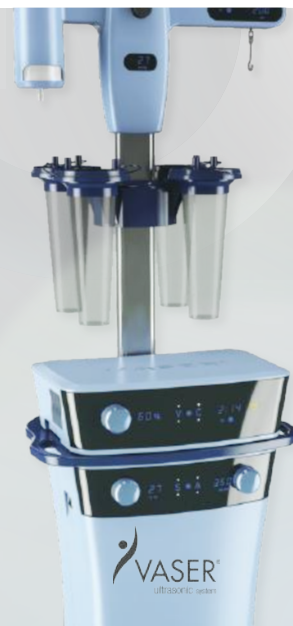

## Variety of Liposuction Technologies

Diverse technologies, specialized for you  
At Rattinan Clinic, we utilize a wide range of advanced technologies, allowing our surgeons to select the most suitable approach for your specific fat profile and skin condition.

The result is a beautifully sculpted body and firmer skin in perfect harmony.

**MICROAIRE**

### **MicroAire PAL**

A technology that utilizes high-frequency vibration, designed to gently break down fat without using heat. This results in minimal bruising and yields high-quality fat suitable for further use, such as stem cell preservation or effectively enhancing the face, breasts, hips, or buttocks. It also assists surgeons in performing Fat Equalization, ensuring smooth and uniform skin results after the procedure.

### **VASER**

A technology that utilizes high-frequency ultrasound waves, ideal for dense fat or areas with fibrous tissue, such as the upper back or the neck hump. This technology allows surgeons to perform fat removal with enhanced precision.

BODYtite

renuVION  
COSMETIC TECHNOLOGY

### BodyTite PRO

A technology that utilizes RF energy, specifically designed for skin tightening. It stimulates skin contraction and reduces laxity, ensuring that post-liposuction results appear smoother, firmer, and more well-defined.

### J-Plasma

Another skin-tightening technology that utilizes RF energy combined with Helium Plasma. It is specifically designed for significant skin laxity, following rapid weight loss, where an exceptional level of skin firming and rejuvenation is required.

# Fat Grafting Packages in Thailand

Rattinan's fat grafting packages do two things at once: remove unwanted volume from where you don't want it, and restore shape where you do. Using our Fat Equalization technique, **every transfer is calibrated for symmetry, proportion, and long-term retention.**

Verified. Accredited.  
Trusted by AACI,  
4 Consecutive Years  
(2022–2025).

## Why Choose Fat Grafting (Liposuction) at Rattinan Clinic

Trusted Expertise in Body Contouring  
Since 1999 Enhance your facial harmony  
and body contours with your own  
high-quality fat.

### **Fat Grafting**

Enhance your facial harmony and  
body contours with your own high-  
quality fat.

Fat Grafting (Lipofilling) is a procedure  
that repurposes “excess fat” to enhance  
and add dimension to desired areas,  
combining standardized liposuction  
technology with Rattinan Clinic’s  
specialized fat injection techniques  
under advanced medical care.

## Fat Grafting Areas

Add dimension and softness to your desired areas

### **Facial Fat Grafting:**

Restores a youthful, vibrant appearance with a natural-looking dimension.

### **Breast Enhancement:**

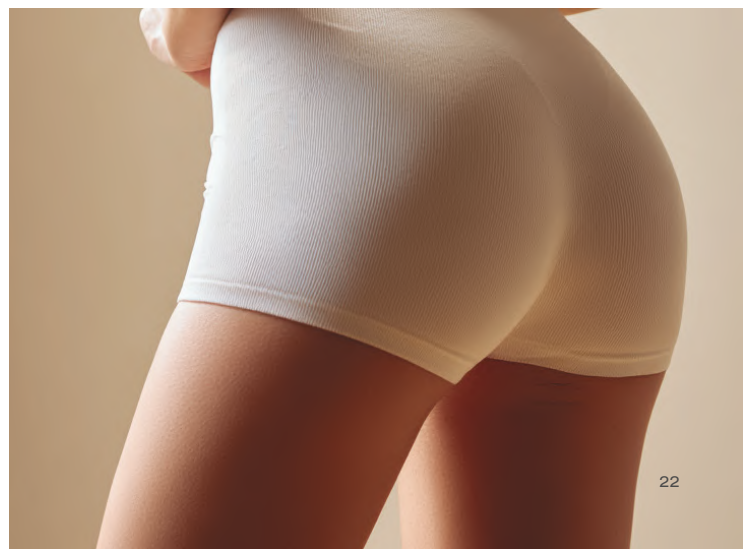

Adds volume and soft-to-the-touch fullness for a natural look and feel.

### **Hip Augmentation:**

Refines and contours the curves for a more attractive silhouette.

### **Buttock Enhancement:**

Increases volume to create a perfectly proportional figure.

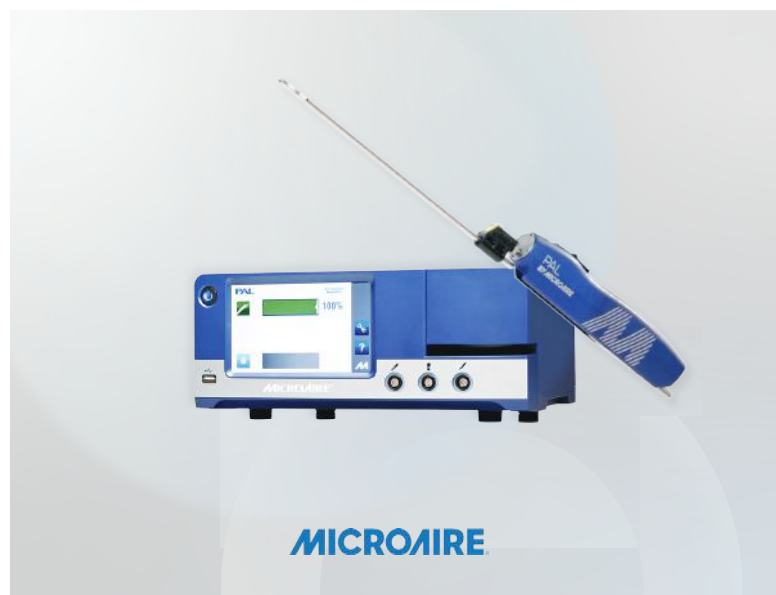

# WE SCULPT, We Don't Just Fill

Every step is personalized to your unique anatomy, ensuring results that harmonize with your body and look natural from every angle.

## MicroAire PAL

MicroAire PAL (Power-Assisted Liposuction) is a technology that utilizes fine vibrations to gently break down fat cells, resulting in minimal trauma to surrounding tissues. It operates without heat, which preserves the vitality and quality of the fat cells. This yields high-quality fat that is highly effective for fat grafting and enhancement in various areas.

## Fat Banking

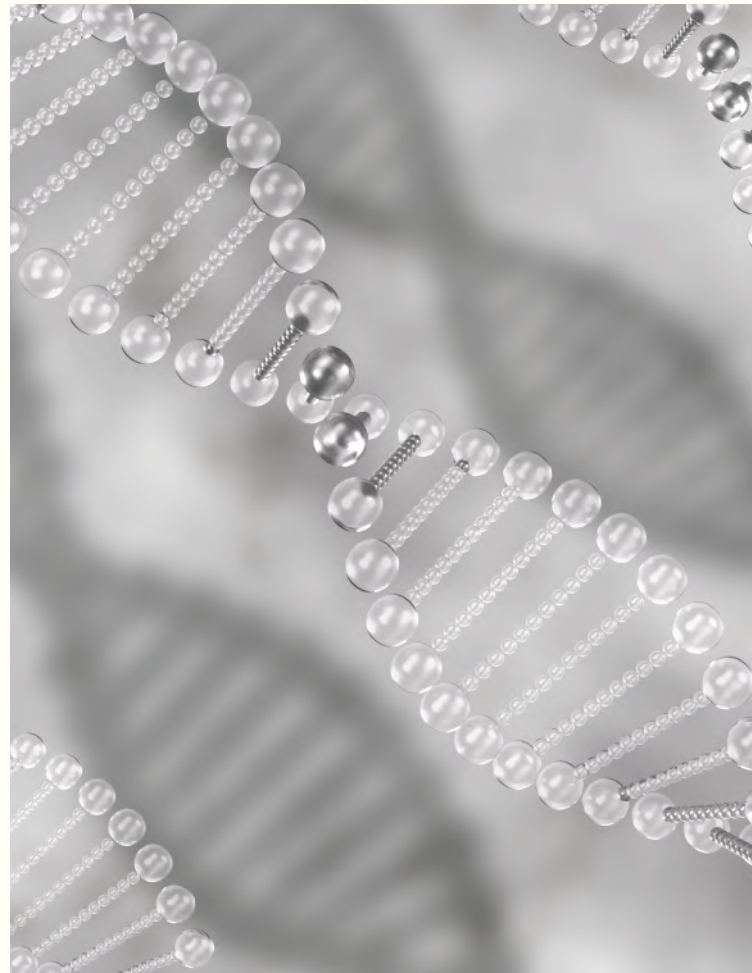

**Specialized Fat Storage Services**  
Rattinan Clinic offers specialized Fat Banking services to store high-quality fat at medical-grade freezing temperatures. This preserves the vitality of your fat cells, keeping them ready for reinjection for up to 1 year without the need for a new liposuction procedure.

### Ideal for:

Those who wish to add volume to multiple areas over time. Those who want to store fat for future touch-ups or procedures. Those looking for a sustainable, long-term beauty strategy.

**Enhance Natural Beauty with Your Own Fat Cells** Because your own fat is a safe, natural filler that integrates perfectly with your body, providing a soft and natural touch.

**Beyond Just Fat, It's a Natural Cell Therapy for Body Rejuvenation** Fat contains Adipose-Derived Stem Cells (ADSCs), which support the body's natural tissue regeneration process. After Fat Grafting, many patients notice that their skin appears plumper, more refined, and visibly brighter.

# Gynecomastia Surgery Packages in Thailand

Rattinan's gynecomastia packages **start with ultrasound assessment to determine whether you need gland removal, liposuction, or both** — so your procedure is precisely matched to your anatomy, not a one-size-fits-all approach. Every plan is calibrated for **symmetry, natural contour, and lasting results.**

Verified. Accredited.  
Trusted by AACI,

A POWERFUL RESULT OF WHY CHOOSE  
Gynecomastia Surgery  
at Rattinan clinic

**335** CASES  
IN 2025

**MICROAIRE**

**BODYTITE**

## Treatment Techniques for Results You Can Trust

Eliminate fat and tighten the chest area in a single procedure with the precision of dual-technology synergy.

### MicroAire PAL

MicroAire PAL enables surgeons to remove fat with high precision without heat. This results in minimal tissue trauma and a smoother, faster recovery.

### BodyTite PRO

BodyTite Pro is specifically designed to maximize skin contraction. Used in conjunction with liposuction, it ensures the chest appears firm, smooth, and clearly defined.

## Invisible Scar Technique

Confident When Shirtless. Our surgeons meticulously plan each incision to ensure scars are discreetly hidden in inconspicuous areas.

Main incision sites:

- 01 Underarm crease
- 02 Areola border

The underarm fold provides a natural shadow that hides the mark. The unique skin tone at the areolar border allows the incision to harmonize with your body. As it heals, the scar fades significantly, becoming less visible.

3,000+ Bariatric Cases

## **Bariatric Surgery (Weight Loss Surgery)**

Comprehensive Weight-Loss Solutions From non-surgical treatment to advanced bariatric surgery and revision procedures Bariatric surgery at Rattinan Clinic is performed by

Dr. Panot Yimcharoen, a specialist in laparoscopic and obesity surgery with over 30 years of experience, together with a multidisciplinary medical team including:

- Gastrointestinal surgery specialists
- Anesthesiologists experienced in obese patients

Ensuring patients receive safe and comprehensive care from a specialized medical team.

# Available Procedures

- Intra-gastric Balloon (Endoscopic Balloon)
- Placed endoscopically under anesthesia and can remain for up to 12 months, providing longer effectiveness compared with swallowable balloons that typically last 3–4 months.
- Sleeve Gastrectomy
- A minimally invasive laparoscopic procedure removing 75–80% of the stomach to reduce food intake.
- At Rattinan Clinic we use our Triple Lock technique to enhance surgical safety.
- Endoscopic Overstitch
- A non-surgical endoscopic procedure performed through the mouth.
- The stomach is sutured internally, reducing its size to approximately 25–30%, with no abdominal incisions.
- Sleeve Plus
- An advanced modification of sleeve gastrectomy designed to provide additional metabolic control and improved long-term weight-loss outcomes.
- Gastric Bypass
- A well-established bariatric procedure that reduces stomach size and reroutes part of the small intestine, helping patients eat less, absorb fewer calories, and improve metabolic diseases such as type 2 diabetes.
- Revision Surgery (Sleeve Bypass)
- For patients who previously underwent sleeve gastrectomy but experienced insufficient weight loss or weight regain, converting the sleeve into a gastric bypass to improve results.

# Advanced Surgical Care

- Rattinan Clinic has developed a Painless Pump system to help reduce post-operative pain and support faster recovery.
- All bariatric procedures are performed using international surgical standards, with equipment and surgical protocols aligned with Cleveland Clinic standards.

A Year After Gastric Surgery:  
**More Than Just Weight Loss.**  
*"It Felt Like a Life Reset."*

**Eric Wadhwa**  
3 likes · 2568 · 🌐

Safety, expertise, professional.... excellent experience. Definitely recommend. This year i will be 43. Over the past 1 year I went from 115kg to 83kg. It was like a life reset, I had forgotten what it feels like to feel this good. I didnt have any underlying health issues, I was just very overweight, very uncomfortable all the time. I want to be healthy for my wife and kids. In my 20s and early 30s I could manage my weight. Late 30s it just gets harder to keep a healthy life balance. 80% of food in a grocery store isn't even real food, it's powders and preservatives and coloring and Sugar. Sugar is addictive. Cut sugar and focus on protein is critical but difficult. The surgery gave me the edge I needed to reset my food habits and reduce my weight to a level that made exercise easier and enjoyable again. Im happier and healthier and more active....im a better dad just by being able to keep up with the kids. Strong, healthy, clear mind. Very happy with my choice and cery happy with the team **นำดีครับเพราะ** by Rattinan thank you.
