DISPENSER SYSTEM IS HERE!

WHAT IS INNOVALOK™?

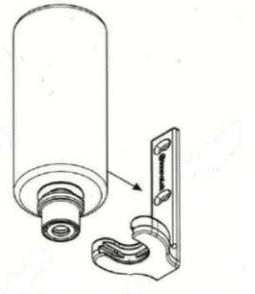

With **InnovaLok™**, we present a new, sustainable and high-performance dispensing system specifically designed for contemporary hotels to improve hygiene, simplify operations and reduce cost.

Specifications of the InnovaLok™ system:

- **Powder-coated aluminum wall bracket** - extremely robust
- **100% recyclable hygienic pump** – airtight and waterproof, made from a single material
- **Light-weight dispenser bottle** - only 19 g of plastic - made from **100% recycled material**
- **Versatile system**, that can be used both ways: **upright or reversed bottle** with a silicon valve cap

A product protected by patent. (TM)

IMPORTANT ADVANTAGES

Sustainability

With **only 19g** of plastic for 500 ml, it results **up to 72% less plastic waste** compared to conventional 300 ml cartridges (~42 g)

Quality & Hygiene

Theftproof, tamperproof and waterproof.
Easy batch traceability and reduced risk of contamination

Housekeeping Cost

With InnovaLok™, housekeeping can swap a bottle in **only 8 seconds**, slashing handling time by 10, delivering substantial savings

SUSTAINABILITY (vs NON- REFILLABLE SYSTEMS)

A standard
hotel dispenser
of 500 ml

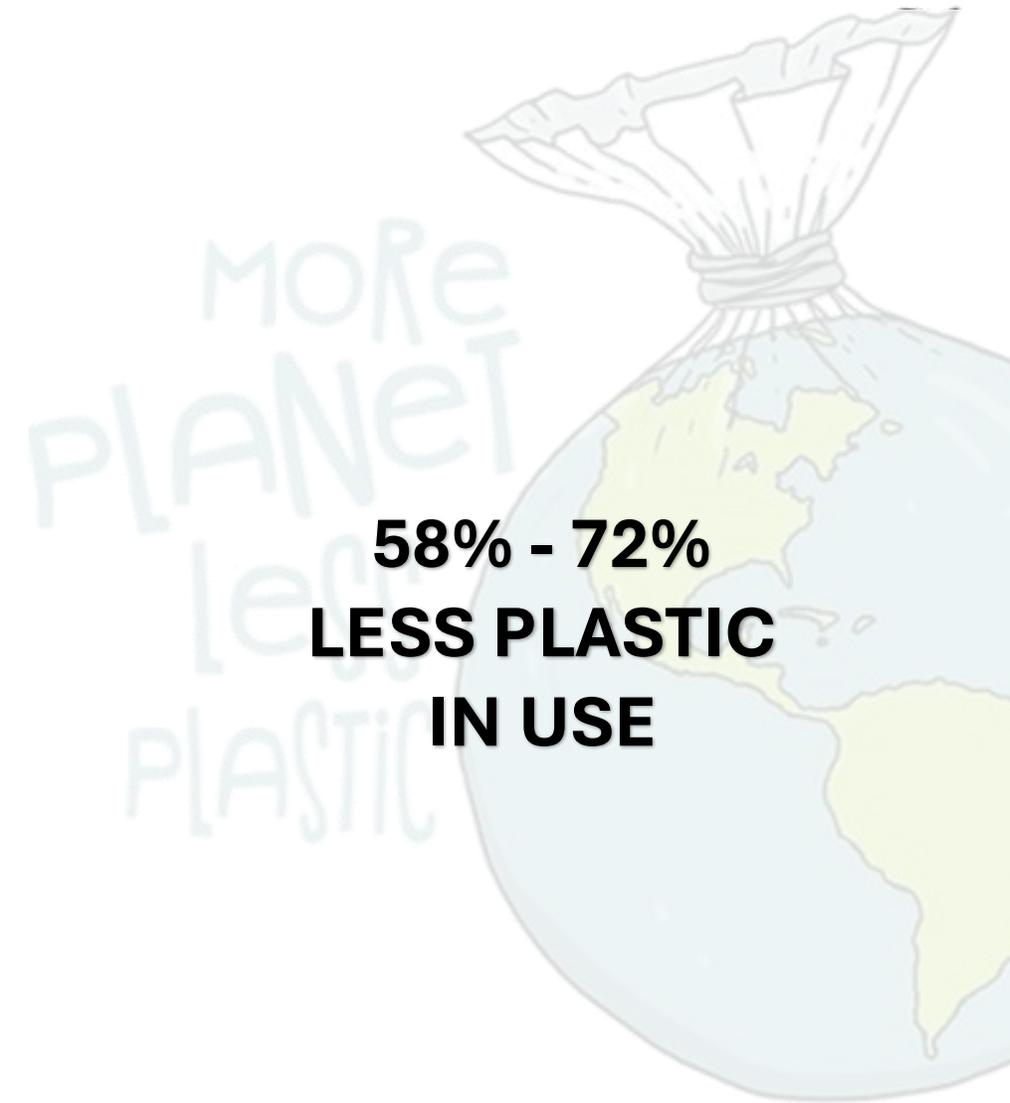

45-65gr
plastic

Light-weight
hotel dispenser
of 500 ml

InnovaLok™

19gr
plastic

58% - 72%
**LESS PLASTIC
IN USE**

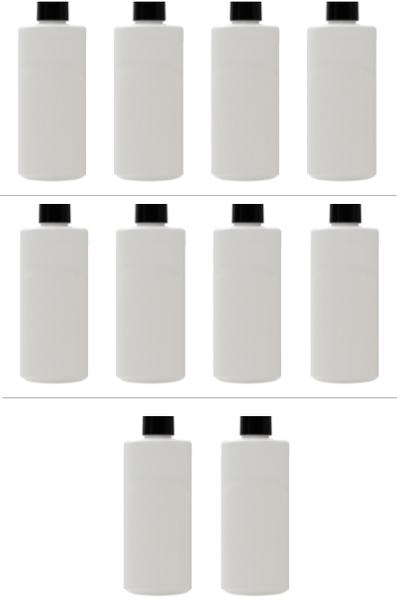

SUSTAINABILITY (vs REFILLABLE SYSTEMS)

A plastic 5lt canister

190gr – 300gr Plastic*

10 light weight dispenser bottles of 500 ml

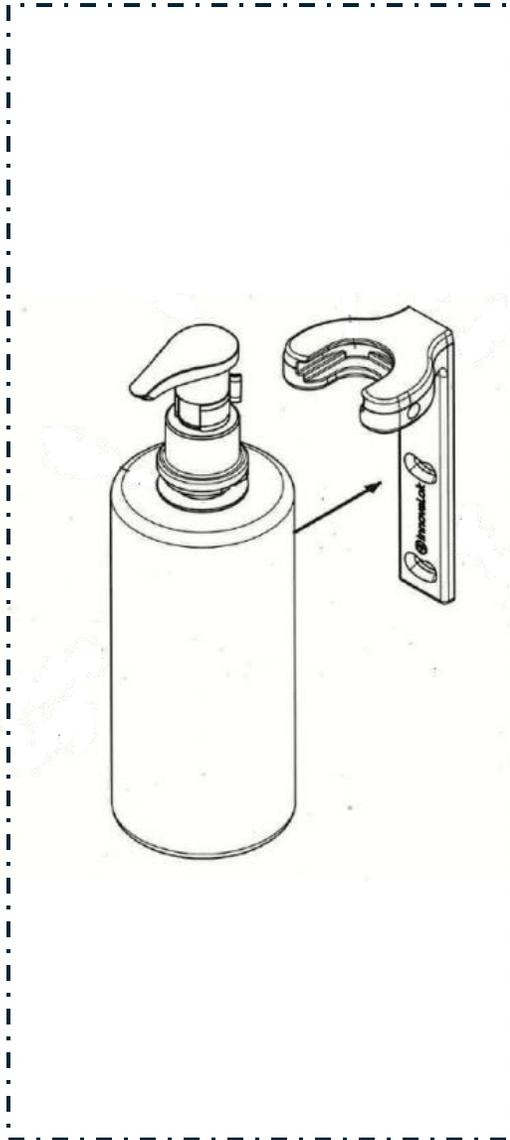

190 gr plastic

up to 37%
**LESS PLASTIC
IN USE**

*Larger-capacity containers (10–20 liters) require significantly more plastic per liter.

QUALITY & HYGIENE

1. Theftproof

The system is equipped a concealed locking mechanism that can be opened only with magnetic key. Since the lock is not visible, an individual won't know where or not to manipulate it.

2. Tamperproof

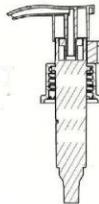

The pump has a special collar that is being inserted in the bracket and once the bracket is locked in, cannot be rotated or opened.

3. Waterproof

The bottles will be sent with safety seals as well as the pumps are waterproof, monomaterial thus fully recyclable and protective for the contents of the bottle.

Pump

Engineered for durability, the pump withstands over **5,000 presses**, delivering performance equivalent to **more than 20 full bottles**. Crafted from **high-quality PP material**, it ensures reliability, longevity, and consistent use.

Bracket

Engineered for **longevity**, the base pin has been extensively tested to ensure exceptional durability, with proven performance across more than **1,000 uses**. This performance corresponds to an estimated lifespan exceeding **50 years** under normal usage conditions.

Easy batch traceability and reduced risk of contamination.

HOUSEKEEPING COST REDUCTION

The refilling process is notoriously time-consuming. With most systems on the market, refilling a standard bottle can take anywhere from 1 to 4 minutes.

~ 1 MINUTE
to refill a
380ml dispenser

~ 2 MINUTES
to refill a
380ml dispenser

InnovaLok™

8 SECONDS
to change the
empty bottle

HOUSEKEEPING COST REDUCTION

Let's evaluate a scenario:

100-room hotel

Year-round 12-month operation @ 80% occupancy,

Offering 3 in-room amenities in dispensers— Shampoo, Shower Gel, Hand Soap

OLIVIA THINKS

Sustainability meets Sophistication!
