skin care

nourish and protect your skin
on a daily basis.

Skin protection and care
for healthcare staff

we protect lives
worldwide

Take care of your hands and they'll take care of you.

Skin protection and care
for healthcare staff

Safety and care – no hand should go without it!

sensiva® – to protect and nourish your hands during every day medical care.

Perfumes and colours – Why have any unnecessary risk factors in your daily work?

Working with patients every day – it's a job with a lot of responsibility and commitment. Skin is subject to a great deal of stress on a daily basis and hands are at great risk of becoming dry and cracked. Your hands are your most important 'tool' and they need special protection and care. Day after day.

Once an individual develops serious skin problems such as hand dermatitis the prognosis is poor. Hand dermatitis can present a serious issue among health care workers with an estimated prevalence ranging from 16%-24% compared to less than 10% in the general population.*

Colour and perfume – Risk factors for your skin!

The sensiva® product range gives you a perfectly coordinated system to protect and care for your hands which is completely free of any colours and perfumes and leaves your skin feeling good at the same time. All of our products are enriched with valuable skin care and skin protection ingredients which provide your skin with long-lasting protection and care.

To protect and care for your hands.

Allantoin

Allantoin – has a soothing effect, provides moisture and supports cell renewal.

Jojoba oil

Jojoba oil – preserves the protective layer (hydrolipidic film) of the skin through a balanced supply of fat and moisture.

+ care ingredients

Panthenol

Panthenol – enhances the regeneration of the skin and soothes skin irritations. Improves skin suppleness and smoothness.

Bisabolol

Bisabolol – has an anti-inflammatory effect and soothes the skin

Octenidine

Octenidine - inhibits odour causing pathogens

- colour- and perfume-free, therefore hypoallergenic

Hand disinfection

Use disinfectants safely.
Always read the label and product information before use.

Effectively prevent cracked or chapped skin and eczema.

When external or internal influences irritate the skin, that is, when it is excessively stressed, the skin's own regeneration mechanisms are overburdened.

Then our skin reacts in noticeable ways: It itches, becomes rough, flaky or even chapped. As a result, skin disorders can occur. Approximately 90 % of these involve eczema and another 10 % involve inflammatory, non-infectious diseases of the epidermis and the upper dermis. Regular preventive measures are the best protection against skin irritation and the allergic contact eczema which often follows.

The following measures help successfully prevent heavily stressed hands from developing skin disorders:

- special skin protection / wearing gloves (preparative)
- targeted and gentle skin cleansing
- effective skin care (reparative)

Each of these components is equally important for skin protection.

octenicare® REPAIR CREME

for all of your skin care needs

NEW octenicare® REPAIR CREME
has a unique formulation
to help protect and care
for irritated skin.

Scars

Cuts and grazes

Sunburn

Itchy skin
