

AN **7i** CENTRAL EXCLUSIVE

How Steven Bartlett Got **90% Faster**

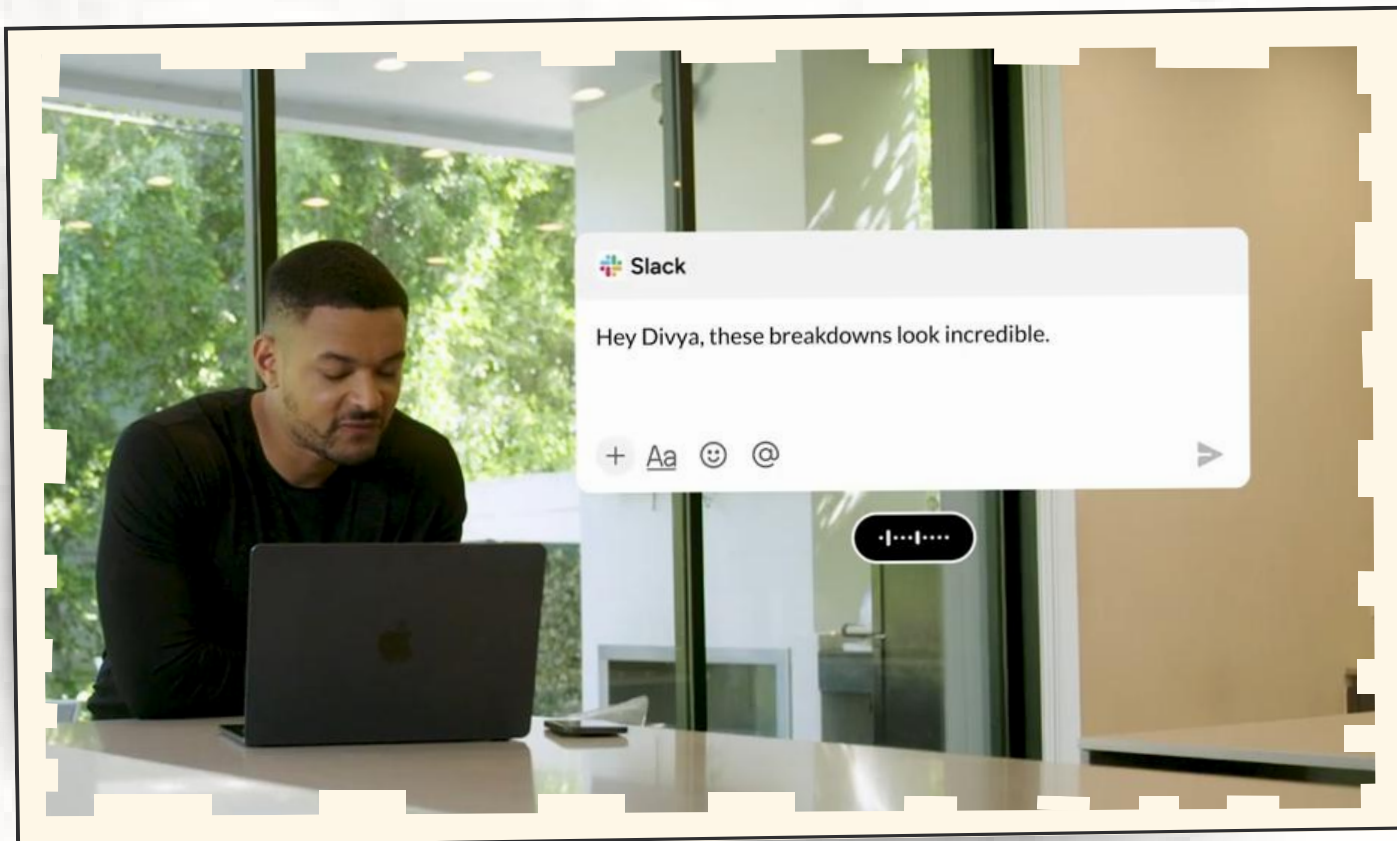

Across
every app

using

||| Wispr Flow

The problem with other dictation tools

- Even at a 10% error rate, other tools meant re-editing every message
- So he typed, and stayed slow

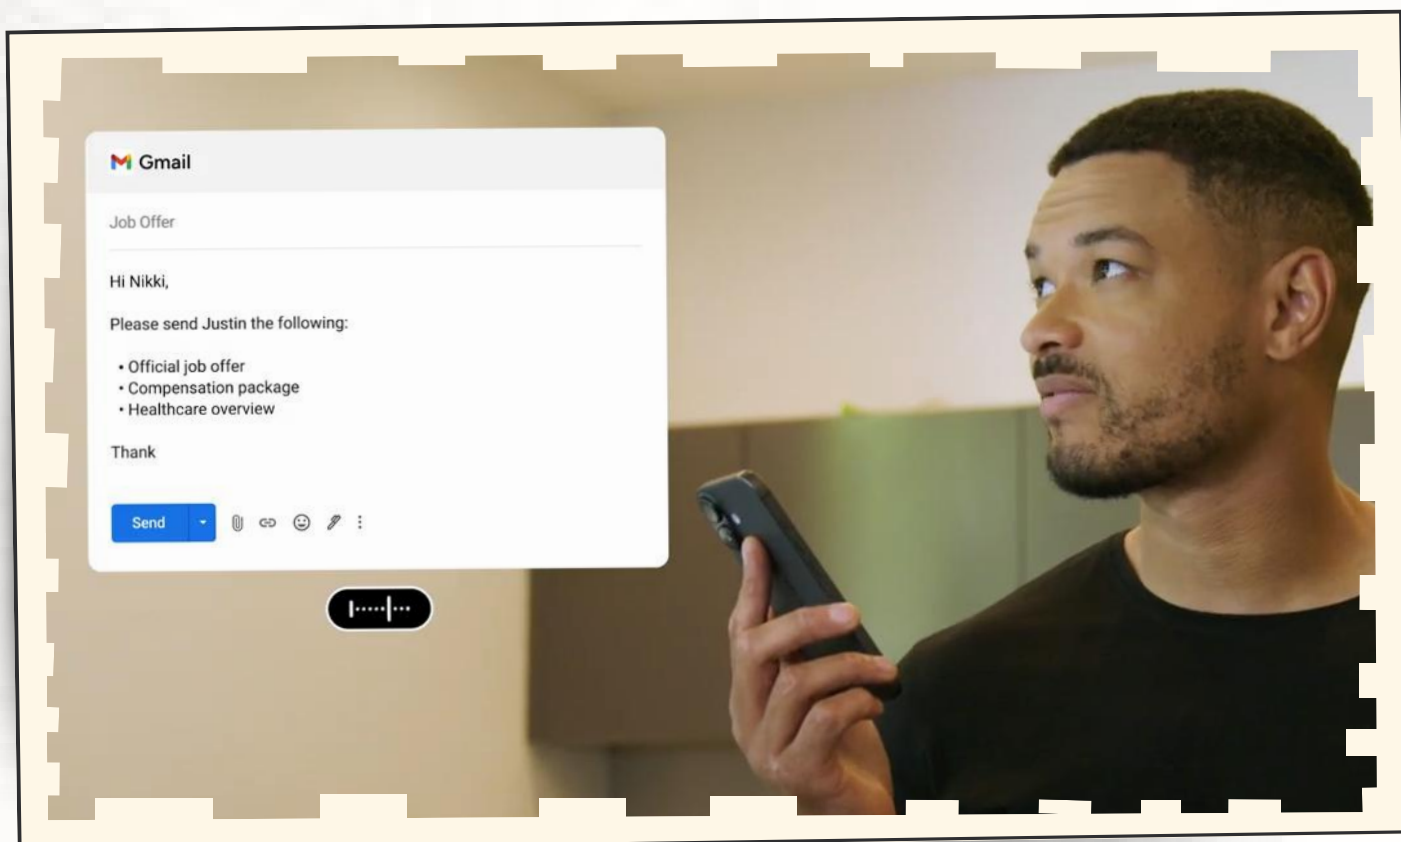

The real cost he named:

- "I become a bottleneck in my own company."

*That's Steven Bartlett, host of The Diary of a CEO (the world's #2 podcast) and founder of a **\$425M creator holding company***

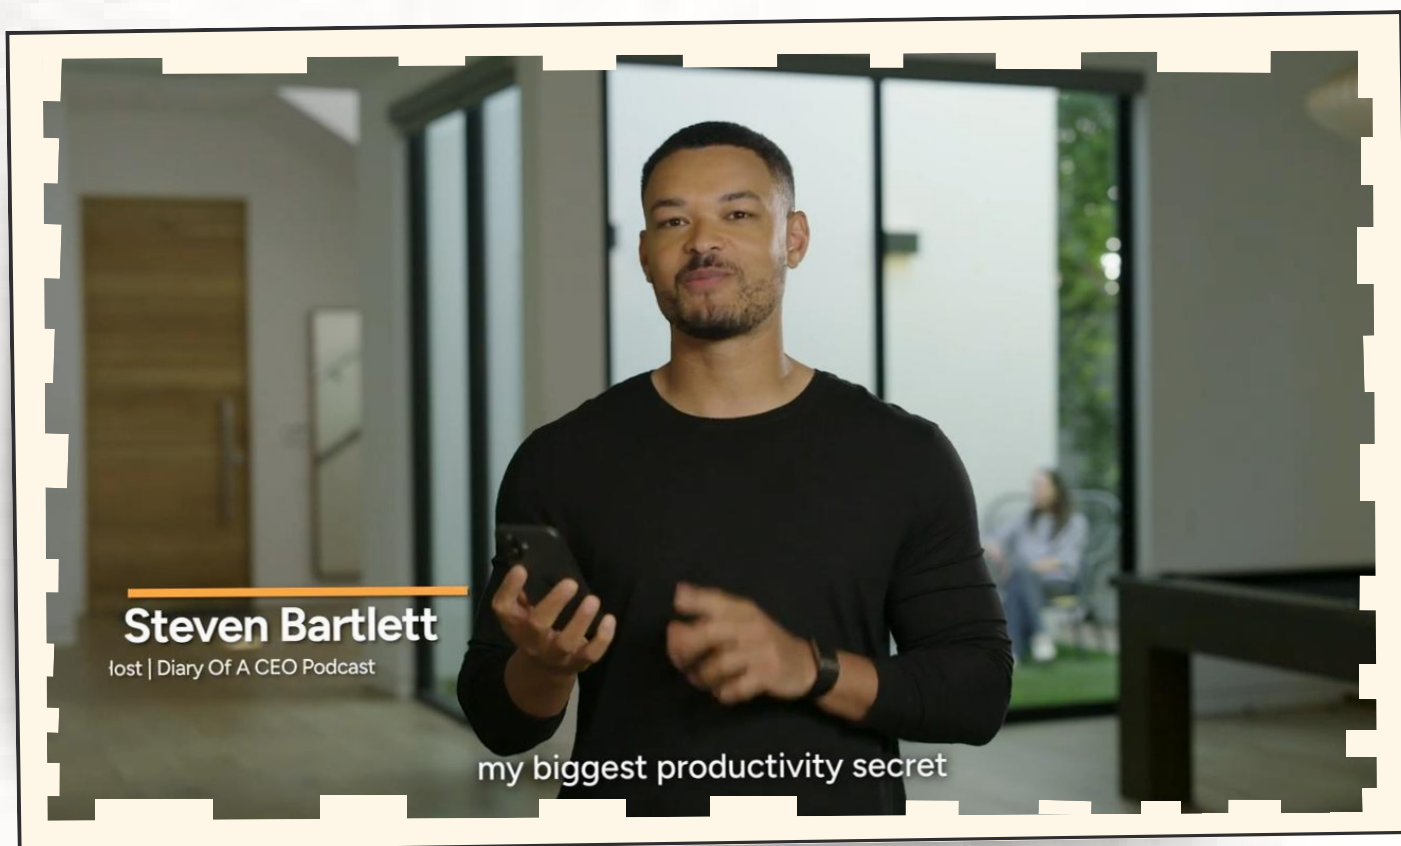

- Work that needed him didn't move

He estimates he lost 70-80% of his best ideas

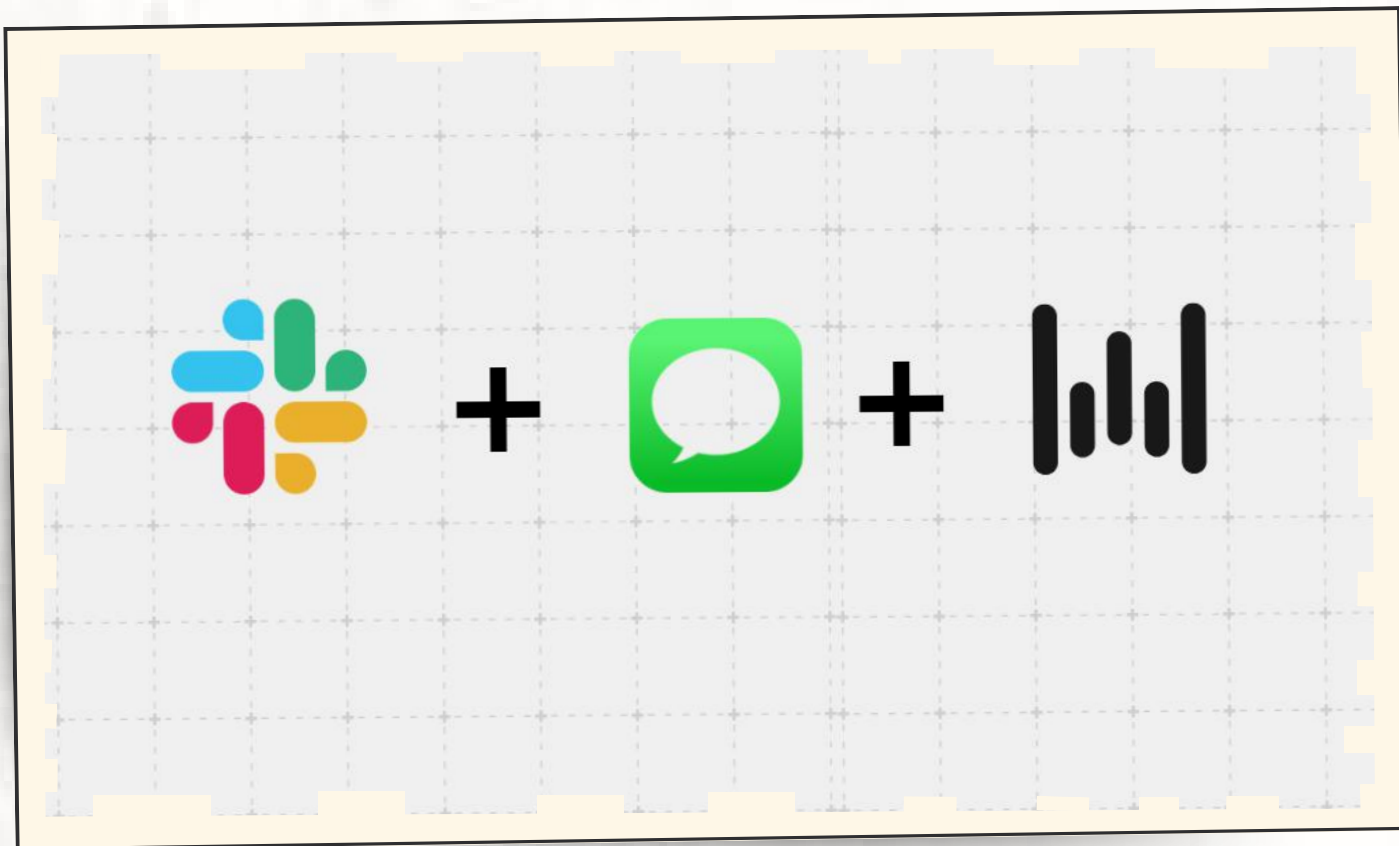

- His best thinking happened on the move, walking, exercising, in transit
- With no way to capture it

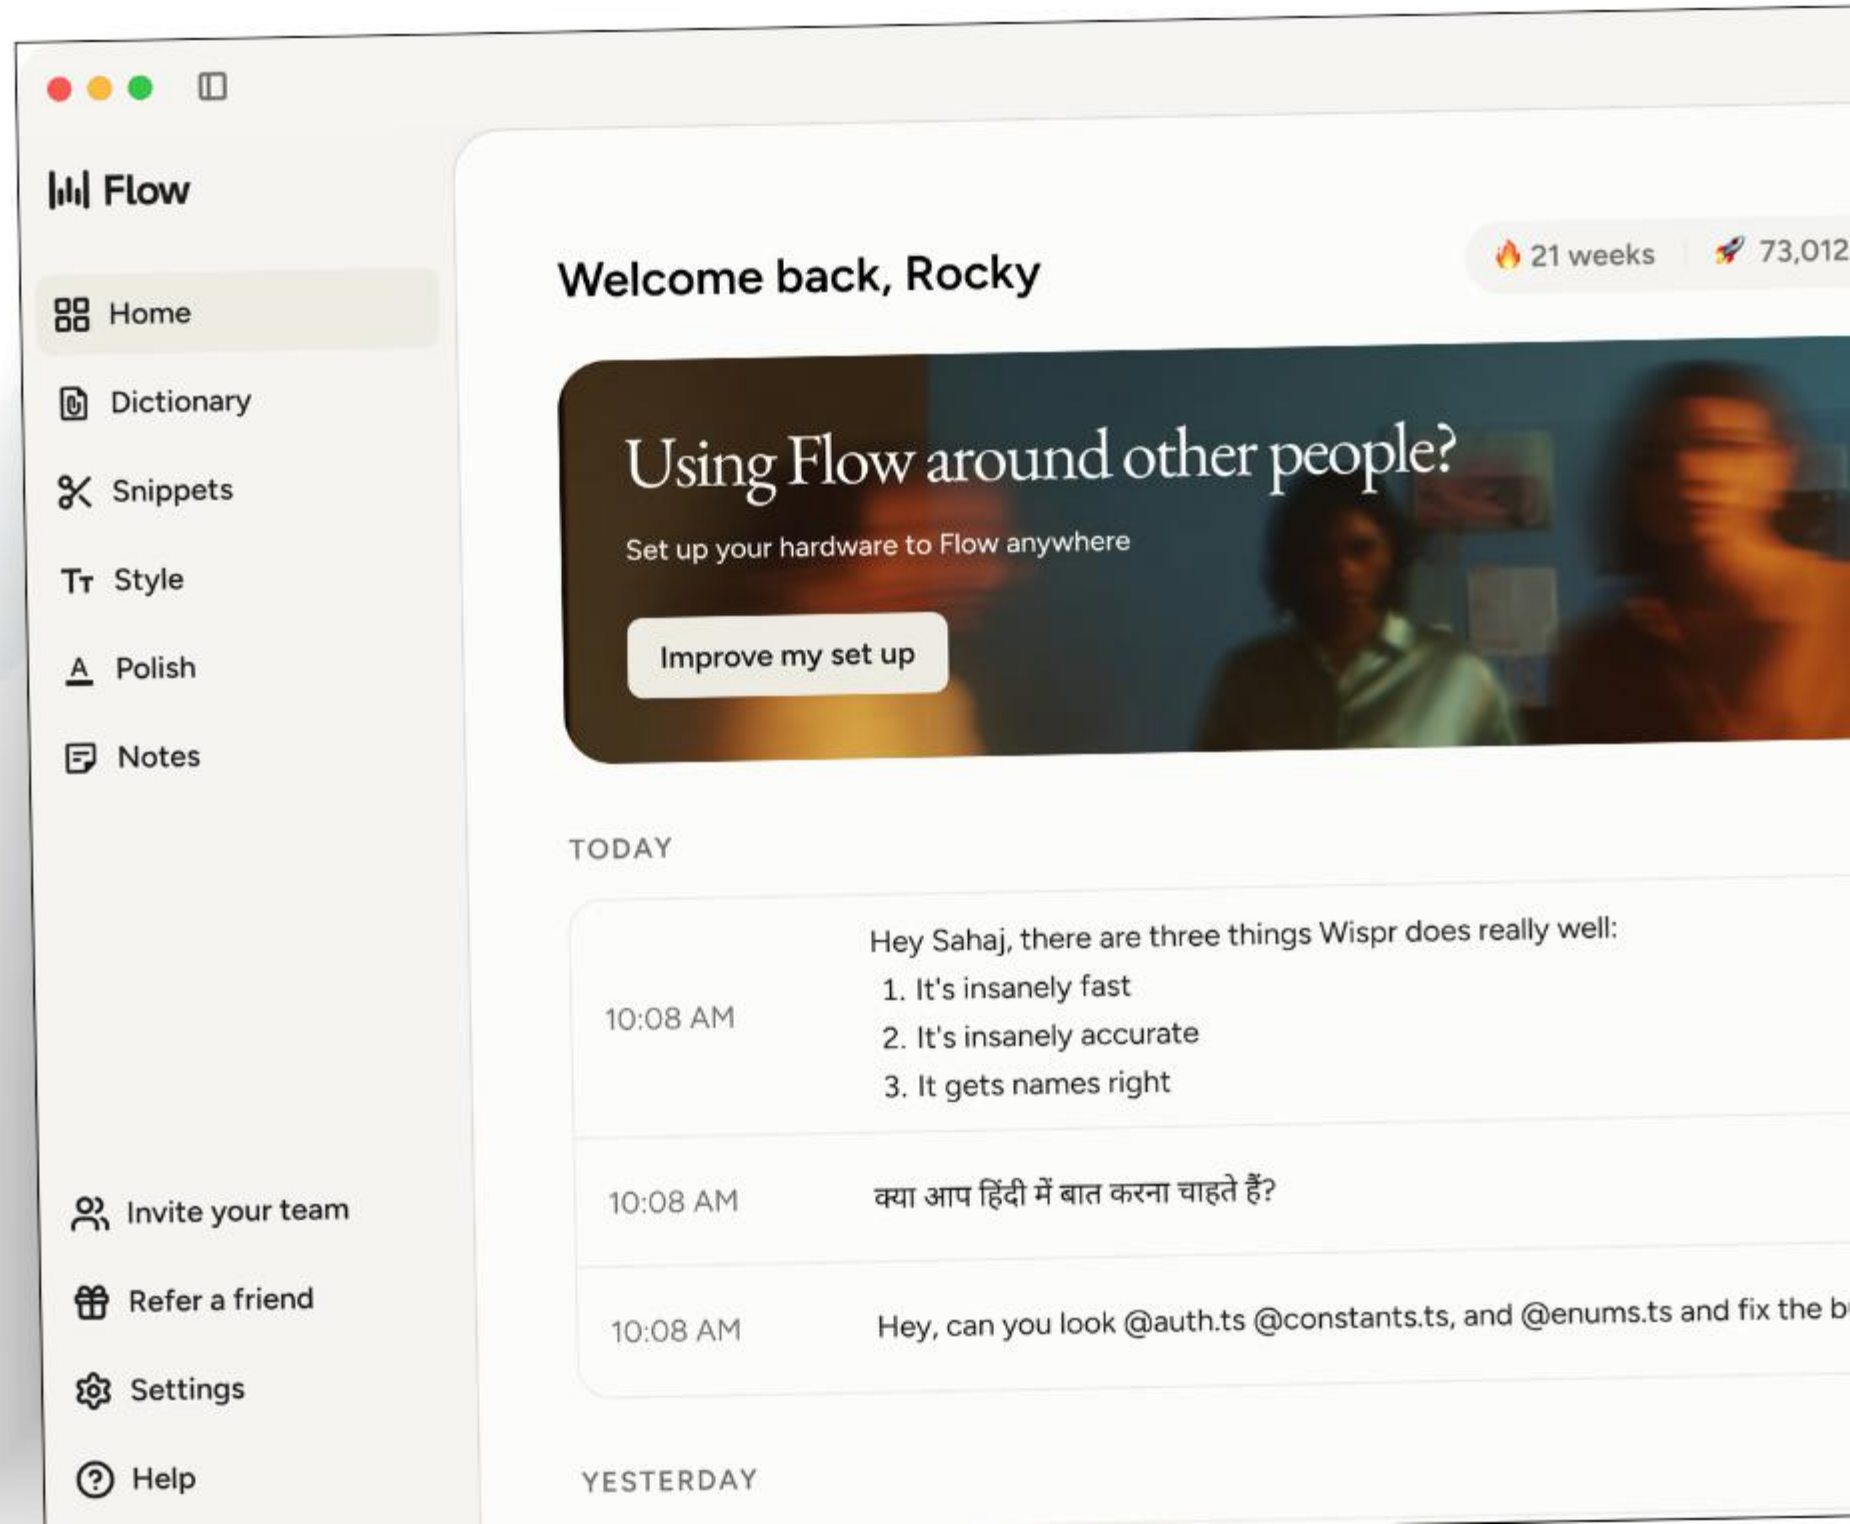

The real impactful switch

- Voice became his primary input
- Steven deployed **Wispr Flow** across every device and communication channel

Turn Voice Into Instant Text

Try  Wispr Flow Today.

The result after using Wispr Flow

- Message time dropped from 30 seconds to 5

"The gap between my thought and my delivery collapses."
— Steven Bartlett

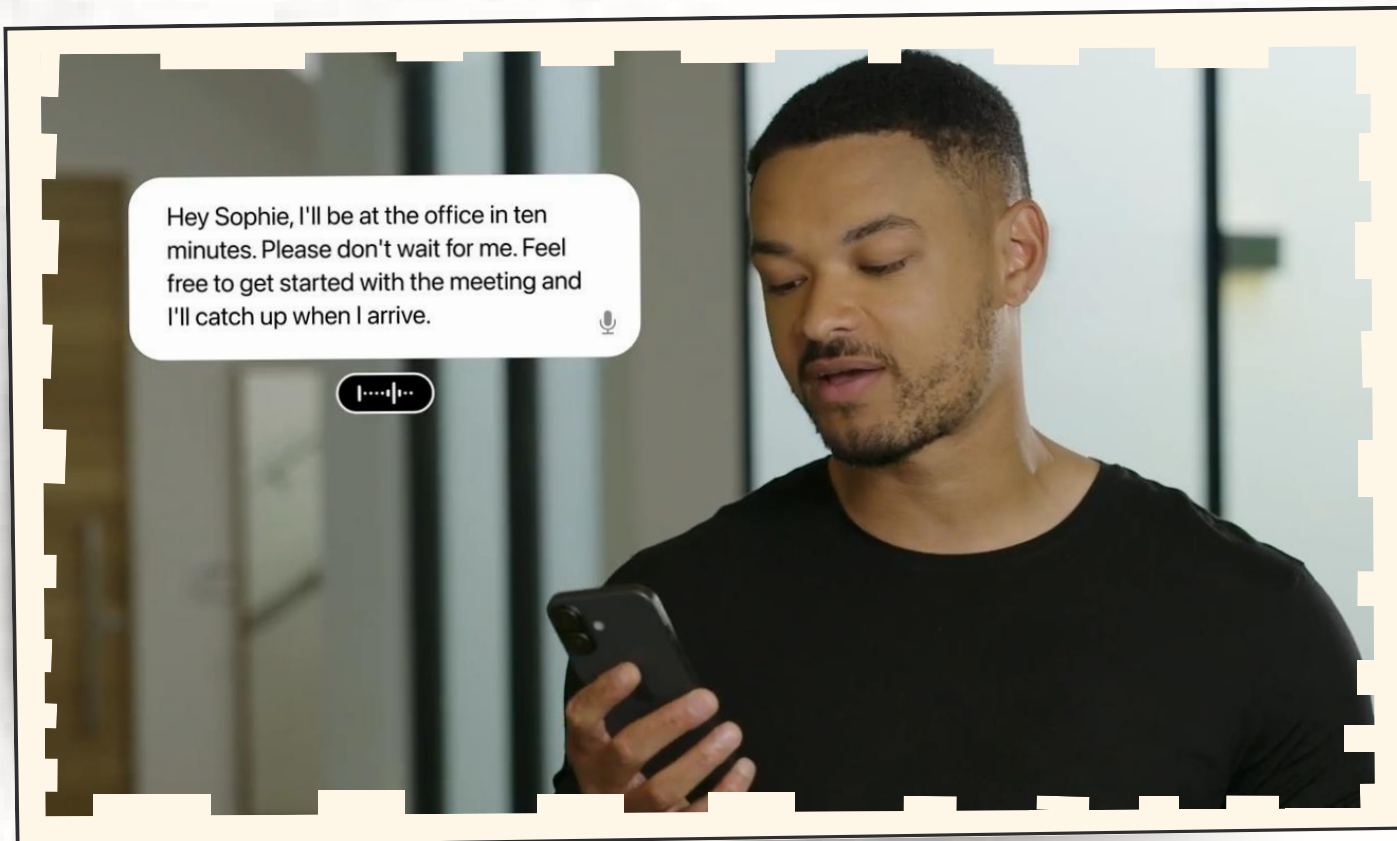

90% of what Steven says **requires zero edits**

89% of his team adopted Flow

- After seeing the difference, his wider team adopted it across the organization
- **The impact:** One person's speed became the team's operating standard

Less typing, **more productivity**

The takeaway for you:

- You type at ~60 WPM
- You can speak at 220 WPM
- The ceiling on your output isn't your thinking, it's your hands

4x faster than typing

Voice that finally works is here. Flow lets you create, code, message, and write at the speed of thought, 4x faster than your keyboard.

[Try Flow](#) [Download for Windows](#)

Method	Speed
Keyboard	45 wpm
Flow	220 wpm
