Pioneers of sustainability Mantis introduce game-changing technology

For 20 years, Mantis have lead the pack when it comes to sustainability and transparency. Built on the belief of a fairer industry for all, they were the first in the business to introduce organic cotton to our market back in 2005. Since then, they reached their goal to switch all the cotton in their production to organic, hitting their target in 2019.

Last year Mantis launched their impact calculator, a handy bit of technology that is helping customers and consumers alike discover the real impact and journey of the clothes they buy. The environmental impact of every garment has been measured, and thanks to QR codes conveniently printed on the inside care label, this information is easily accessible to anyone – all it takes is a smartphone to bring it to life.

Instantly the water, energy and emissions saved, as well as the pesticides avoided, can be discovered. You can see the positive impact you've made by choosing organic and sustainable fibres over their conventional counterparts. There's also a look inside the factories Mantis work with around the world, taking you on a step by step journey through the supply chain. And even better, all the information is presented without any mention of Mantis, so you can share the good news far and wide.

After being launched last year, this technology is now being rolled out across the whole range. Look out for the QR codes in the labels of all Mantis garments, and be sure to give it go.

Clothes for a Better Climate

5.0

kWh of energy conserved

252.4

litres of water saved

1.1

kg of CO₂ emissions avoided

3.3

m² of land farmed without pesticides

Championing Organic Cotton since 2005

Information provided by Greenstory

In 2019, Mantis officially hit their target to only use organically grown cotton across their production. Now they're going even further, measuring the environmental impact of everything they make. To allow you to access all the data for yourself and follow the journey of how your clothes were made, every Mantis garment will have its own QR code on the label.

Scan the QR code to see for yourself the positive difference you can make by switching to organic.

OUR COMMITMENT TO PEOPLE AND THE PLANET

OUR APPROACH

The Cotton Group's sustainability work is integrated into our culture and values. We believe a long-term approach is a must when it comes to dealing with complex SUSTAINABILITY issues, and we work to ensure that sustainability is integrated into all aspects of everything we do. Our entire business must be conducted in a way that is ECONOMICALLY, SOCIALLY and ENVIRONMENTALLY sustainable. That's the reason we have set clear ambitions and goals which we are implementing on a daily basis. Not bound by convention. Our success lies in developing new ways of doing things.

OUR MODEL

We want to create positive changes along our value chain – from the FARMS and FACTORIES that supply us, through to warehousing and transport, and ultimately to our CUSTOMERS. We want to create value with products which are beautiful, ethical and high-quality throughout their lifecycle. We want to adopt a thorough and responsible approach at every stage of the process from design and sourcing, to manufacturing, quality control, logistics and sales.

SUSTAINABILITY IS INTEGRATED INTO ALL ASPECTS OF EVERYTHING WE DO

OUR COMMITMENT TO PEOPLE

One particular focus area is the protection and improvement of human rights along our value chain. The Cotton Group strives to make sure that the most stringent labour standards are upheld and safeguarded in the factories.

WE ARE PROUD TO BE A MEMBER OF the FAIR WEAR FOUNDATION and the BSCI. These initiatives bring security and improvement in the field of human rights.

HAVING OUR OWN TEAM IN THE PRODUCTION COUNTRY which works closely with our suppliers is key. We can ensure that our code of conduct is implemented and that we constantly improve our suppliers' best practices.

SECURING GOOD WORKING CONDITIONS

We have our own offices and teams in the production countries themselves. We ensure that ALL NEW PARTNERSHIPS ARE UNDER CERTIFICATION. The Cotton Group also cares greatly about finding partners who share our respect for people as well as the environment, and who are willing to work with us to improve their practices.

COTTON CHALLENGE

Cotton is a natural, renewable, and biodegradable fibre, widely used in our collection. But it's a climate intensive crop linked to high water and chemical use. This affects soil quality, biodiversity and people working in cotton fields. The challenge is to improve the sustainability of cotton production. At B&C, we are working with BCI and the OCS certifications to frame this journey toward an each year more sustainable cotton production.

OUR COMMITMENT TO THE ENVIRONMENT & PEOPLE

BCI - CHALLENGES OF CONVENTIONAL COTTON

B&C is one of the members of the Better Cotton Initiative, which aims to reduce pesticides, promote efficient water usage, crop rotation, and fair working conditions in cotton production. This doesn't mean it's completely organic, but it's a step in the right direction.

BETTER FOR THE PLANET – BETTER FOR PEOPLE

We are changing the rules of organic products for you and are increasing our positive impact on the planet at the same time. Previously, you had the choice between very expensive organic styles or a single T-shirt hidden away in different collections. Today with B&C, you can choose from 22 certified organic styles

over 3 ranges - T-shirts, polo shirts and sweatshirts at a very competitive market price. This includes a entry-price tubular organic T-shirt, allowing to combine sustainability with volume. Each time you buy an organic cotton T-shirt instead of a conventional cotton one, you are reducing water consumption by 91% (around 397 litres of water). Organic Cotton is also grown within a rotation system that builds soil fertility, protects biodiversity, and is grown without the use of synthetic fertilizers, toxic pesticides or GMOs.

B&C GREEN WAREHOUSE - TOTAL CO₂-EMISSIONS REDUCTION: 103,3 TONS PER YEAR

WINDMILLS

which equals the energy
consumption of
250 families

LED LIGHTS

Use of LED lights inside
and outside the buildings
REDUCTION
CO₂-EMISSIONS
10,5 TONS per year

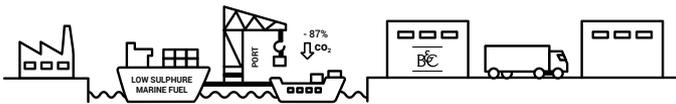

NATURAL GAS HEATING

REDUCTION
CO₂-EMISSIONS
7,3 TONS
per year

TRANSPORT CHALLENGE

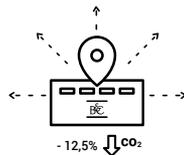

Transport represents around 6% of the greenhouse gas emissions in a garment's lifecycle. By choosing the right modes of transport, we can reduce this impact even further.

1. We use sea freight rather than air freight from factories to the port in Antwerp. We use barges rather than trucks to transport our products from the port to our warehouses.

2. To decrease the impact of transport to wholesalers' warehouses, we have based our warehouse in a very central location and in a non-congested traffic zone to reduce CO₂ emissions created by lorry transport.

3. We also ask and encourage the transport companies we use to make more environmentally friendly decisions.

Sustainability is a journey, our preferred journey, a journey we are doing with our customers & all our partners. We keep looking for solutions that bring further improvements for people and the planet, while enabling our customers to make informed choices.

the power series

COMPETITIVE SUSTAINABILITY

Our new power series consists of 4 competitive favorites; power tee, power polo, power hoodie, power sweatshirt - some of the best choices for promotion in its cost effective price range. All styles in this series are unisex and comes with tear away label for easy branding and decoration, which makes them ideal for your next Powerful direct marketing action. Available in classic colours in sizes XS - 5XL.

luxury stretch polo

BEYOND THE ORDINARY

This is simply the ultimate polo shirt, with a cotton/elastane fabric that ensures perfect comfort and an excellent fitting. The tailored fit, the mini pique fabric, and the flat knit collar with elastane make our unique stretch polo an all-time favourite. And now its available in organic cotton.

A man with light brown hair and a slight stubble is sitting outdoors, looking off to the side. He is wearing a white t-shirt and blue denim shorts. The background is a blurred view of a body of water and a cloudy sky.

BABYBUGZ

Nobody is too small to make a difference

Plus, they've measured the environmental impact of all their garments. By scanning the QR code on the care label, you'll be able to see the saving on water, energy and emissions and the pesticides avoided by choosing organic. You'll also see the journey of how your clothes were made, from start to finish.

Made to last and designed to be decorated, the opportunities are endless. Why not try mixing and matching across the range to build your ideal set, choosing from the wide range of clothing and accessories – including the new BZ59 Single Layer Bib, perfect for printing on. Look out for mini-me styles too, such as the BZ52 Baby Breton Top, also available for adults and kids.

Whilst it's a natural fit for retail and gifting, babywear can be a great choice for all kinds of markets. Corporate branding on bodysuits for new additions to your work family, bibs with your logo on for smaller guests at your restaurant, or even music merchandise for your youngest fans.

Babybugz know a thing or two about babywear, they've been pioneers in the market since 2005. It's up to all of us to protect the world our little ones will grow up in, and choosing organic really is a great place to start.

Comfort and safety are at the top of the agenda, and all Babybugz garments are certified to the highest standard to make sure that they are as gentle on young skin as they are on the Earth.

Mix & Match

Dress for a sustainable future

Information provided by Greenstory

Honestly Made

As a family run business built on a strong set of values, we feel that honesty, courtesy and respect are essential to all the decisions we make. We are not perfect yet, but we are striving to be transparent in everything we do, every step of the way.

Our focus

Being a more sustainable brand

Conscientious / ethical buying

Reducing Carbon footprint

Caring about our teams worldwide

Looking after the earth

Honest Sourcing

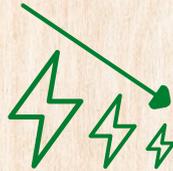

Through our dedicated factories and supply chain we do everything we can to reduce our impact on the earth.

Sustainable fabrics

Less Water

Less energy

Less pollution

Honest Logistics

We continually transport methods and ways to consolidate our shipments

Fly less

Less road miles

Clever consolidation for shipping

Electric fleet cars

Honest Products

We focus on creating sustainable products, thoughtfully engineered for the great outdoors and your line of work.

100% recycled fabric

Made from plastic bottles

Insulation made from plastic bottles

PFC free

Recycled or partially recycled packaging

Honest People

Across our workforce, we actively implement ways to reduce our impact on the environment...

Use digital comms more

Print less

Print recycled

Switch off (computers/lights etc)

Recycle more (within our offices and stores)

Honest Customers

What does working with Regatta Honestly Made mean to your business?

Allows a workforce to lead a more plastic-free lives

Helps businesses to focus on their own sustainability

Gives people and businesses more sustainable options

Result[®]

GENUINE RECYCLED

Result®

GENUINE RECYCLED

IT IS GENUINELY RECYCLED

Understated and stylish, our **RECYCLED** collection combines simplicity of design with clean lines and contemporary recycled fabrics that are beautifully textured and wonderfully unique.

Recycled **SAFE-GUARD** welcomes early nightfall in styles to lift your safety and brighten winter months ahead, adding layers, texture and warmth to roadside visibility.

By working with speciality fabrics made from recycled plastic, this new exciting **Genuine Recycled** collection shows the **Result®** commitment to produce sustainable, ethical garments whose yarn production gives off fewer emissions and consumes less energy and water than conventional yarns.

Every garment in the range is made from as close to 100% recycled materials as possible and every hat in the range is made from 50% recycled materials.

Made into **Result®** Genuine Recycled garments

Post-consumer PET recycled plastic bottles and waste

Result®

GENUINE RECYCLED

Fibres are spun into sustainable recycled **yarn**, knitted or woven into fabric

Shredded flakes are processed to create **fibre**

Post-consumer plastic gets shredded into **flakes**

Result® works with certified partners **perPETual**®, **TOPGREEN**® and **REPVEVE**® to create fibres made from recycled plastic, and allows **Result**® to calculate, based on a single size L garment, the number of equivalent 1 litre bottles that would have been sent to landfill.

The yarn spun from these fibres is sent to a certified mill to weave or knit fabric for the **Result**® **Genuine Recycled** range. As with all **Result**® ranges, all aspects of manufacture and practice have been checked to meet their high standards for a respectful, secure work environment with reasonable hours, good wage and work conditions.

Result® also ensures that the supply chain is traceable to prove the origin of each individual garment.

So watch us grow - **Result**® **Genuine Recycled** has already stopped the equivalent of 3.5 million 1 litre bottles from landfill. We hope to double this figure every year. Our goal is to increase use of recycled materials in products and reduce/eliminate the harm caused in their production.

Connect with

Result®
GENUINE RECYCLED
and improve your
Corporate Social Responsibility.

Numbered bottles represent the equivalent number of 1 litre PET bottles used in the process of making the garment.

When you no longer need your garment, check its label, contact your local end-of-life textile options to upcycle, and give your garment a second life by preventing landfill. Where indicated, fabrics and trims are suitable for extraction and repurposing.

This garment is PFC-Free or PFOA-Free.

perPETual® has developed a unique scalable technology to convert plastic bottles into high quality filament yarn.

Environmentally friendly materials made from recycled PET-bottles offering a sustainable equivalent to conventional yarns.

REPVEVE® performance recycled fabric uses environmental-friendly materials made from recycled plastic bottles and post-industrial waste.

An international, voluntary, full product standard that certifies recycled content, social and environmental practices and chemical restrictions.

Oeko-Tex certified fabrics are completely free from harmful chemicals and safe for human use. To attain Oeko-Tex Standard 100 certification, the fabric has been tested and certified to be free from harmful levels of more than 100 substances known to be harmful to human health.

Eco-Friendly zippers recycled from PET bottles and other post-consumer materials using the latest technology.

To minimise flexible packaging in the environment, cardboard packaging, labels and hangtags are made, where possible, from recycled materials.

Opaque biodegradable plastic bags ensure garments are kept pristine on their journey but leave no environmental trace.

Garments are shipped on recycled wooden pallets wrapped in BioZ oxo-biodegradable plastic: an opaque wrap whose treatment triggers degradation after 6 to 12 months and breaks down fully, reverting to just carbon and oxygen. No trace is left to pollute the environment; it does not form micro-beads and can be collected and/or recycled with other plastics without causing any contamination.

As a world brand, we have always taken the burden of waste seriously. Environmental considerations are an integral part of our business practice. We insist and encourage all supply partners to pursue correct environmental practices, especially the recycling of waste materials and the re-circulation of waste heat generated during dyeing.

RECYCLE, REBRAND, RESTYLE

For 2021, we introduce 2 new styles in the BagBase® Recycled collection that tap into the surge in popularity of outdoor adventures, with the new BG283 and BG287. Low impact but high on longevity, these will keep on delivering for many years to come.

WEAR
DON'T WASTE

THE RECYCLED COLLECTION RE-UTILISES DISCARDED PLASTIC BOTTLES TO PRODUCE 100% RECYCLED POLYESTER FABRIC FOR THE MANUFACTURE OF EACH PRODUCT.
