Presidents Report

Hi All Fishing Members,

It has been a crazy year to say the least, first up i would like to wish you & your family a merry Christmas & a safe & happy new year.

Despite all the disruptions through Covid this year the club has traded very well, a big thank you needs to go to the staff for all of their efforts, a big thanks to Nigel & Bec for their outstanding efforts in such a crazy year & also thanks to the board for their efforts.

Congratulations to our 2 new life members Greg Hancock & Mike Forbes it is well deserved.

As you would be all aware the 2021 Garmin Shootout had to be cancelled due to Covid restrictions, this decision was not taken lightly.

Due to restrictions slowly easing I am pleased to announce we will be holding a one off tournament The Garmin D'Albora Port Stephens Classic which is to be held on the 20th & 21st of February 2021, it will be a cash jackpot prize pool, so keep your eyes open for entry forms, be sure to get your entries in before the cut off date as late entries will not be accepted due to Covid restrictions.

I look forward to seeing you all out on the water in the new year good luck in your fishing & tight lines.

MARLIN TAGS.

The first tags wer to be put on with a pair of special pliers made by W.Jno Baker of Hunter St Sydney 24-5-39.

They wer to puncture the gil cover and then press on the clips.

It proved far to difficult and the ideawas abandoned.

Then I had the brass circular tags made with details stamped on them, numbers e.c.

I found that trying to make a hole in a marlins tail fin while still a live was about the most difficult thing possible and after several tries I gave this up also.

Large stainless steel arrowheads wer the next ones made and wer tried out by spear fishermen on large rays. This proved quite successfull

I then made a smaller arrowhead type of tag and these too wer tried out underwater with success.

The haed was screwed onto a ~~xxxxxx~~ thread on a short pole . The only marlin tested was in a rather bad way and I doubt if it survived. The tag was embedded in the body below the dorsal fin.

This spot later was the place decided on by the Americans for their plastic or metal tags.

A BIT OF HISTORY

February. Large schools of Marlin.

1947.

February 9th.

To-day we had the unique experience of sighting no less than 53 marlin swimming on the surface, between Little Island and Broughton. There must have been many more. At one time we saw three near the boat, two of which were swimming side by side so close to the boat that photos were taken of them. They were not much inclined to take a bait though several strikes were had, and one fish lost.

Weather.

The sea was flat calm and it was a very dull and hazy day with visibility to the mainland restricted by the haze. Kedachrome pictures taken with a movie came out almost colourless. There was no wind at all.

Launch "Toomeree" Ted Moss Ron Duncan, self and J, Edwards.

December. Marlin caught off Little Island.

1947.

Dec. 7th.

Athel D'Ombrain hooked and landed a 170 lb. Black Marlin on the Western side of Little Island, Port Stephens, while the launch (Mr. E. Moss's "Toomeree") was at anchor.

This is the earliest record of the capture of a marlin in this district, and is also the closest to the heads.

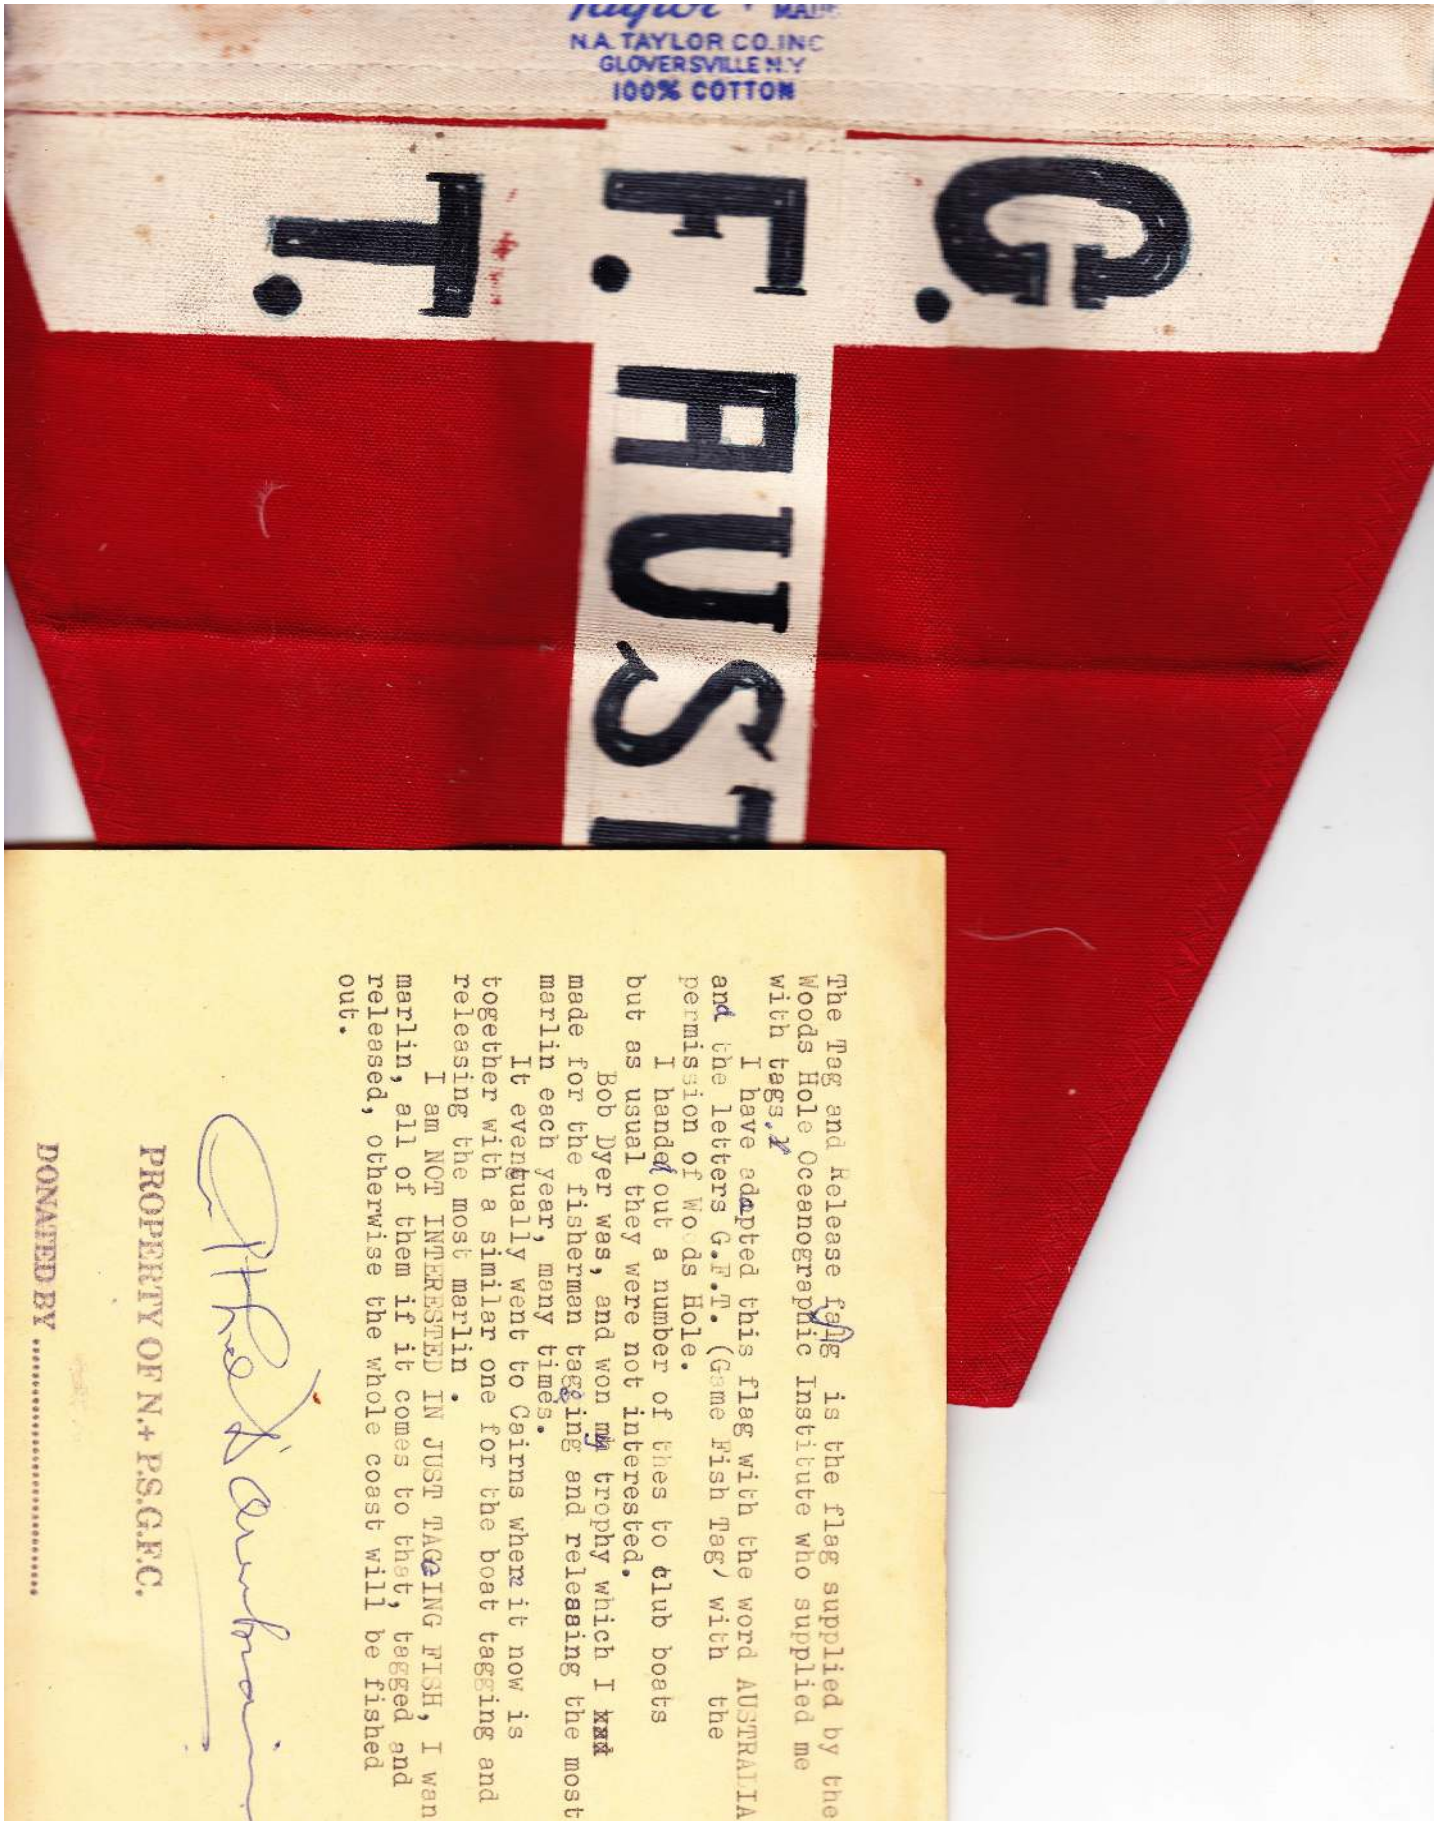

The fish gave up suddenly after 15 minutes fight, and on being gaffed was found to have half-hitched the trace around it's mouth, thus shutting off its source of breathing.
