ABOUT US

Shree Acid & Chemicals is a partnership firm established in 2015, engaged in the supply and distribution of a wide range of Acids, Alkalis and Industrial Chemicals. We are committed to quality, safety and customer satisfaction, and have built strong relationships with clients across various industries.

With 10+ years of industry experience, 2 state-of-the-art factories, and a production capacity of 3000 M.T/Month, we combine advanced machinery with skilled craftsmanship to produce high-purity industrial chemicals. Our manufacturing facility spans 6463 sq.m and is equipped with Dumping Vessel, Filter Press, Dryer, and Storage Vessels.

We are actively involved in domestic and international trade, supplying our products to industries including Oil & Gas, Waste Water Treatment, De-icing & Anti-icing, Food, Pharma, Textile, Paper, and Paint industries.

Our commitment to quality is backed by Certificate of Analysis for all our products.

Our manufacturing facility is equipped with advanced machinery including Dumping Vessel, Filter Press, Dryer, and Storage Vessels. We have R&D facilities to ensure continuous improvement and product excellence. Our raw materials include high quality Limestone and spent HCL.

We have been honored with Certificate of Appreciation from Alkyl Amines Chemicals Limited, recognizing our commitment to quality and excellence. Our clientele includes Meghmani Organics Ltd, Hemani Industries Ltd, Sudeep Pharma Ltd, Mudgil Fertichem, Shree Krishna Sulphite Pvt Ltd, and ACE Industries.

Our team is led by Mr. Bhavesh Patni and Mr. Kalpesh Patni (Owners), with Mr. Dipen Patni and Mr. Darshan Patni heading Sales & Marketing. Together, they bring years of expertise and dedication to the company's growth and customer satisfaction.

OUR PRODUCTS

Monochloroacetic Acid

Monochloroacetic Acid (MCA) is a high-purity organic intermediate widely used in the manufacture of agrochemicals, pharmaceuticals, and other specialty chemicals. It offers consistent quality, high purity, and reliable performance for industrial applications.

Key Features

- 94% Purity
- COA & MSDS Available
- Moisture Absorption
- Highly Soluble
- Industrial Grade
- Versatile Applications

Applications

- Dust Control
- De-icing
- Concrete Acceleration
- Oil & Gas Drilling
- Water Treatment
- Food Processing

Calcium Chloride Powder is a highly soluble inorganic salt available in powder form. It is extensively used for dust control, de-icing, concrete acceleration, oil & gas drilling fluids, water treatment, refrigeration systems, food processing, moisture absorption, and various industrial applications.

Key Features

- High Purity
- COA & MSDS Available
- Industrial Grade
- Consistent Quality
- Reliable Performance
- Customizable Purity

Applications

- Agrochemicals
- Pharmaceuticals
- Specialty Chemicals
- Organic Synthesis
- Dyes & Pigments

OUR PRODUCTS

Hydrochloric Acid

Hydrochloric Acid is a strong inorganic acid widely used in steel pickling, pH control, water treatment, chemical manufacturing, pharmaceuticals, textile processing, metal cleaning, and various industrial cleaning applications. It is supplied with consistent quality for industrial use.

Key Features

- 30-32% Purity
- COA & MSDS Available
- Consistent Quality
- Special Grade Available
- Industrial Grade
- Strong Acid

Applications

- Steel Pickling
- pH Control
- Water Treatment
- Chemical Manufacturing
- Pharmaceuticals
- Textile Processing

OUR PRODUCTS

Sodium Monochloro Acetate

Sodium Monochloroacetate is the sodium salt of monochloroacetic acid and serves as an important intermediate in the production of herbicides, pharmaceuticals, dyes, pigments, and specialty chemicals. It is valued for its high purity and dependable performance.

Key Features

- High Purity
- Reliable Performance
- Dependable Quality
- COA & MSDS Available
- Industrial Grade
- Versatile Intermediate

Applications

- Herbicides
- Pharmaceuticals
- Dyes & Pigments
- Specialty Chemicals
- Agrochemicals
- Organic Synthesis

OUR PRODUCTS

Chloro Acetyl Chloride

Chloroacetic Chloride is a highly reactive chemical intermediate extensively used in the synthesis of pharmaceuticals, agrochemicals, dyes, pigments, and specialty chemicals. It is manufactured to meet stringent industrial quality standards.

Key Features

- High Purity
- COA & MSDS Available
- Stringent Quality
- Highly Reactive
- Industrial Grade
- Dependable Performance

Applications

- Pharmaceuticals
- Agrochemicals
- Dyes & Pigments
- Specialty Chemicals
- Organic Synthesis
- Chemical Intermediates

OUR PRODUCTS

Calcium Carbonate

Calcium Carbonate is a high-quality white mineral powder widely used as a filler and functional additive in plastics, rubber, paints, paper, adhesives, construction materials, ceramics, and pharmaceutical formulations. It provides excellent whiteness, particle uniformity, and cost-effective performance.

Key Features

- High Purity
- COA & MSDS Available
- Industrial Grade
- Excellent Whiteness
- Particle Uniformity
- Cost-Effective

Applications

- Plastics & Rubber
- Paints & Coatings
- Paper Industry
- Adhesives
- Construction Materials
- Pharmaceuticals

OUR PRODUCTS

Sulphuric Acid

Sulphuric Acid is a strong mineral acid widely used in chemical manufacturing, fertilizer production, petroleum refining, metal processing, and various industrial applications. It is available in high purity with consistent quality for industrial use.

Key Features

- 98% Purity
- Strong Acid
- COA & MSDS Available
- Industrial Grade
- Consistent Quality
- Versatile Applications

Applications

- Chemical Manufacturing
- Fertilizer Production
- Petroleum Refining
- Metal Processing
- Construction Materials
- Water Treatment
- Industrial Applications

Caustic Soda Flakes (Sodium Hydroxide – NaOH) are a highly pure, white, odorless, and strongly alkaline chemical widely used in a broad range of industrial applications. Known for their excellent solubility in water and high reactivity, caustic soda flakes are an essential raw material in industries such as chemicals, textiles, pulp & paper, soaps and detergents, water treatment, alumina refining, petroleum refining, and pharmaceuticals.

Key Features

- High Purity (99%+)
- White, Free-Flowing Flakes
- Excellent Water Solubility
- Strong Alkaline Properties
- Low Impurity Levels
- COA & MSDS Available

Applications

- Soap & Detergent
- Pulp & Paper
- Textile Processing
- Water Treatment
- Chemical Manufacturing
- Alumina Refining
- Petroleum Refining
- Pharmaceuticals
