  @MARKGARRICKLTD

Welcome!

GRAHAM

If you haven't met him before then we would love to introduce you to our newest salesman Graham. Graham has great agricultural machine knowledge and knows the Moray area very well.

APPRENTICESHIP

Big congratulations to Jack who finished his apprenticeship this year. Years of hard work paid off (we know covid didn't make it any easier!). We look forward to a long professional career with you.

CUSTOMER REVIEW

MLA T533 145 V+

In 2019, Nicola and her father, George, were in the market for a telehandler. Their mixed farm is based in Aberdeenshire, where they have suckler cows, sheep, and barley.

Their previous loader was a John Deere, however, the brand stopped production on the machine, so the pair were looking for something new to fulfill their needs

A loader is a daily essential for the farm. It's used for a range of jobs, from loading the bedder and mixer wagon, to taking bales out to the spring calving cows.

Nicola and George had demonstrated a few different machines but "both decided collectively that it was Manitou we would go for". In the end, they opted for the MLA T533 145 V+. Nicola says "It was definitely a clear winner out of the ones we were looking at".

"We were always going to go for center pivot, and we like the Manitou as it has a much better view from the cab. Especially because we have the main road going through our farm, so it was important that we had a good view from the cab."

When asked what she would say to someone in the market for a telehandler, Nicola responded with "I'd say definitely try it out. We have always been very happy and if there has been anything, Mark has always been very efficient at getting it sorted. I'd definitely say it's worth a look and see if it suits your farm".

The service provided by Mark has always been a priority and this has so clearly been recognised with Nicola mentioning she would "definitely recommend his business. He's always been there if we've ever had an issue and sorted it as soon as."

To sum it up. **"Excellent service"**.

THE BEST OF 2021

@MARKGARRICKLTD

We offer agricultural machinery servicing with our team of highly skilled engineers. Our fast reliable service ensures minimum delay and makes sure your machinery is off the road for the minimum amount of time. This service can be offered in the field or at our fully equipped workshop. Our highly skilled workforce regularly go on training courses to keep up to date with the latest technology. This guarantees we deliver the best possible service and enables us to carry out fast efficient repairs for our customers.

MARK

There are five mobile service vans as well as a fully equipped workshop

- Servicing/Repair
- Dyno Testing
- Air conditioning
- Hydraulic hose repairs
- Agri trailer inspection (BAGMA approved)
- Engineering welding
- Refurbishment of machines

We have a range of stock parts available from our very well supplied Parts Department. From maintenance parts such as filters, oil, batteries and belts, to repair parts including bearings, clutches and brakes. If the part you require isn't in stock, we are confident that we can source it for you. Most parts are available on a next day delivery if required. Whilst our main franchises are Case IH and Manitou, we can source parts for all other makes and models through our large franchise network.

AROSEM F pneumatic front tank seed drills

The new AROSEM FDD front hopper seed drill extends PÖTTINGER's range of pneumatic implement-mounted seed drills up to a working width of 6 metres.

Increased output is not only possible by expanding combinations at the rear. For PÖTTINGER the logical system expansion was the move towards a front-rear configuration. The result is extreme flexibility in large and small field runs teamed with a high seed hopper capacity for a lower number of filling intervals.

NOVACAT ALPHA MOTION FRONT MOUNTED MOWERS

0% OFFERS FOR ALL GRASSLAND AND ARABLE EQUIPMENT

until 31st of december

For your new grassland and arable equipment purchases, Pöttinger has always been a great choice. Choose from a variety of 0% finance plans across our range with paused payment deals and a choice of annual or monthly plans. To discuss what deal is best for you please get in contact with our sales team

1 MOWER – 3 POSSIBILITIES

With PÖTTINGER you have maximum flexibility. Thanks to the optional quick-change kit both the tine-type and roller conditioners can be easily removed. You can switch between the tine and roller conditioner depending on the working conditions. If you want to work without a conditioning effect, a guard curtain can be fitted. That is pure versatility.

How to quickly transform your mower

- Take off the V-belt
- Fit the conditioner trolley
- Undo the conditioner fastenings
- Remove the conditioner
- Fit guard curtain/alternative conditioner
