2. Initial State of your device
 - a) Manage Device

III. Mobile App Connection

3. Registering on the Mobile App
 - a) Downloading the Mobile App
 - b) Adding Devices

PACKAGING DETAILS

1 Smart Dash Cam

2 Car Plug with Adhesive Tape

STEP-BY-STEP SET-UP GUIDE

1. SET UP

- Remove all items from its original box to begin setting up the device
- Start by connecting the plug to the camera
- Position the camera either on your dashboard or windscreen using the adhesive tape. Ensure that it would have a clear view of the surroundings
- Untangle the cable and keep it plugged-in while in use
- Proceed to the following steps on how to pair the device with the mobile app to remotely manage it

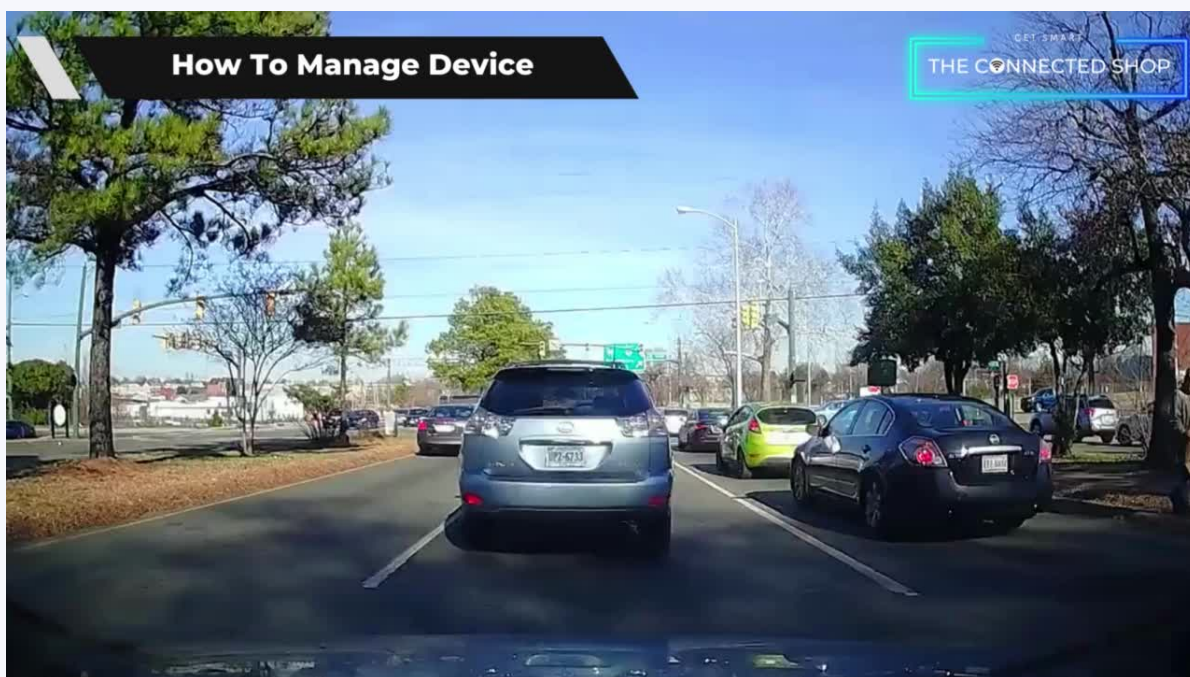

2. INITIAL STATE OF YOUR DEVICE

a) Manage Device

- To remotely manage the device via the mobile app, make sure to pair your devices first by executing the following steps on network setup
- Click the button on the side of the device and wait for it to turn blue indicating that it has successfully paired with your mobile phone
- Follow the step-by-step guide on the app to complete the initialization process. Insert and format a new SD Card in order to safely store all your data
- Configure the app settings as intended and access all device data

3. MOBILE APP CONNECTION

a) Downloading the App

Download the application on the Google Play Store or Apple AppStore by searching “70mai” or by scanning the QR code below:

After downloading the app

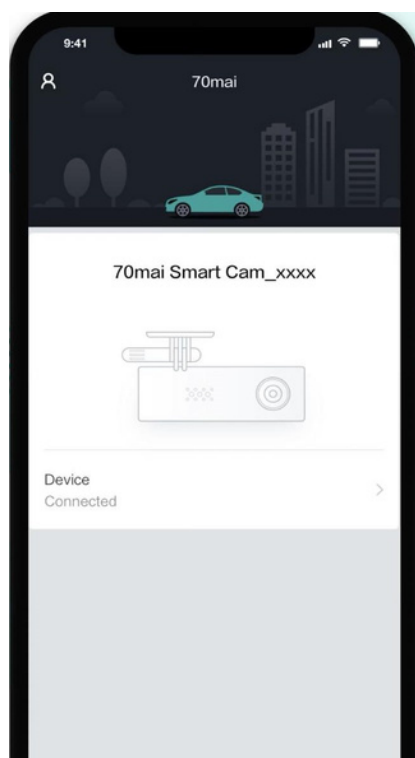

- Register or log in to an account
- Enable your Bluetooth and phone location
- Activate the device
- Keep your device near your phone

3. MOBILE APP CONNECTION

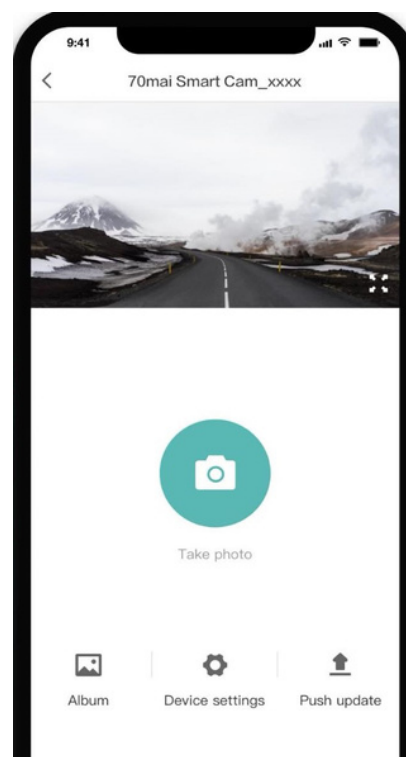

b) Adding Devices

To add devices on the app, please follow the instructions below. Your device and phone must be connected to the same Wi-Fi network in order for this to work.

- To add a device on the mobile app, click the 'Add Device' button on the main home page
- It will begin searching for nearby devices

- Wait for the app to finish searching
- Select the device that will appear on the screen
- Click the button on the side of the device to enable its Wi-Fi hotspot
- Connect your phone to the device's Wi-Fi hotspot and authorize it by pressing the side button again until the app shows that it's now connecting to the dash cam
- Wait until it displays on your phone that it has successfully connected to the device

Congratulations!

You have successfully set up your very own Smart Dash Cam WiFi
Mobile App.
