

PPP LASER CLINIC

A CLINIC OF DR GOH SENG HENG

Established by Dr. Goh Seng Heng in 2013, PPP Laser Clinics introduced an innovation in skin care to the world.

Having created a combination of technologies bringing laser and light energy together, Dr Goh Seng Heng had developed a radical new technique for treating common skin conditions, largely including Pimples, Pores & Pigmentation – hence the name PPP – which were designed to restore and rejuvenate the face and body.

Using only the highest quality products (and the latest technology from the United Kingdom, Europe & the US) is just one reason for PPP's success, along with PPP's commitment to continue bringing effective new treatments to the aesthetics market.

At PPP we believe that everyone deserves to have the appearance they desire, offering the chance to achieve a complexion that is clear, glowing, radiant and smooth. We pride ourselves on delivering a service that not only adheres to stringent protocols and operating standards, but works to fulfil every patient's expectations and produce an outcome that makes a noticeably dramatic difference to the appearance of the face and body.

Our Treatments

Our highly skilled and qualified Doctors are renowned for producing consistently successful results, effectively improving the appearance of common skin complaints that affect a number of areas on the face and body.

Our Treatments

Face

At PPP we believe that everyone deserves to have the appearance they desire, offering the chance to achieve a complexion that is clear, glowing, radiant and smooth.

Skin

Laser & Light Combination System (LLCS)

Affectionately known as PPP's 'signature treatment', the Laser and Light Combination System (LLCS) is designed to give complete rejuvenation to the face. Aimed at treating common facial concerns related to Pores, Pimples and Pigmentation, this treatment can leave you with a complexion that is clear, glowing, radiant and smooth.

HydrO2

HydrO2 is a facial treatment that aims to improve the overall appearance by smoothing, cleansing and hydrating the skin.

Tri-Laser

(Micro Laser, Cool Touch & Laser LLCS)

Another of PPP's 'signature treatments', Tri-Laser takes three innovative technologies and combines them into one treatment, creating the ultimate procedure for advanced skin rejuvenation.

Dermalux LED

Dermalux LED is a treatment that has been developed through a phototherapy-based theory, that living cells are able to absorb light.

Rejuvenation

Express Skin Rejuvenation

Express skin rejuvenation aims to tackle the common facial concerns that contribute to a tired appearance.

Skin Cell Renewal

A natural rejuvenation of the skin is achieved through the application of skin cell renewal.

5D Skin Rejuvenation

5D skin rejuvenation is a non-invasive method of revitalising the appearance; gently resurfacing the superficial layers of the skin whilst also restoring volumising properties within the skin's structure.

Lift

Ultimate Lift

A series of 5 procedures makes up the Ultimate Lift treatment - a groundbreaking treatment for tightening and volumising the skin without the need for fillers or toxins.

Instant Lift

A treatment that is designed to add a rejuvenating effect to the skin on the face and neck, Instant Lift is a revolutionary non-surgical procedure that can provide a solution for a range of common skin conditions.

Luxe Lift

One of PPP's signature combination treatments, Luxe Lift provides an effective anti-ageing solution for the face and neck.

Rejuvalift

Rejuvalift is a non-invasive treatment that helps to pause the signs of ageing by lifting and tightening the skin.

Our Treatments

Eyes

PPP Laser Clinic offers a range of rejuvenating treatments particularly beneficial for this area of the face.

Premium Express Eye Revitalisation

This treatment is aimed at restoring a youthful appearance to the area around the eyes.

Luxe Lift

Through a variety of technologies, Luxe Lift both volumises and tightens the skin for a lifted look.

Rejuvalift

A combination of innovative procedures make up this exclusive treatment to PPP, to lift and tighten around the eye area.

Post Treatment Serums

Serums can intensify the results following our treatments.

Multivitamin Serum

A multi-vitamin serum contains a variety of different vitamins, minerals and amino acids in order to nourish the skin and restore good health to its surface and the underlying structure.

Lift & Plump

An effective solution that helps to restore a youthful appearance, Lift and Plump infuses the skin with hyaluronic acid, to add volume to a variety of contours of the face for a smooth and seamless look.

Skin Rejuvenation Infusion

(PSRI)

Skin rejuvenation infusion (PSRI) is a serum that is intended for use after a laser treatment at PPP Laser Clinic, targeting conditions related to pimples / acne and acne scarring.

Collagen Lifting & Whitening Serum

Collagen lifting and whitening serum can be used to compliment other laser treatments, enhancing the hydration and tone of the skin. Applied to the face following some of PPP's exclusive procedures, the outcomes in skin repair, pigmentation and anti-ageing can receive an extra boost.

Skin Repairing & Brightening

(SRB)

This skin repairing and brightening serum is intended to be used post treatment, recommended for application after receiving one of PPP's innovative laser procedures.

Our Treatments

4D-SSCL Body

When treating concerns regarding body sculpting, weight loss and skin conditions, our extensive range of non-surgical procedures are designed to be non-invasive and produce little to no downtime – comforting information for all our patients. We can combine different technologies to create a “bespoke treatment plan” to get the best result for you.

4D Cavitation

Cavitation is a procedure that uses non-surgical techniques to reduce areas of stubborn fat and recontour the body.

4D Radio Frequency

Radio Frequency is used to contour and tighten the body, creating a more satisfactory silhouette.

4D Cryolipolysis

Cryolipolysis is a non-surgical fat reduction treatment that commonly goes by a number of alternative pseudonyms such as ‘Cryo Lipo Sculpt’ and ‘Fat Freezing’.

4D Shockwave

Shockwave therapy is primarily used to break down fat and stimulate collagen production to give a tighter look and feel to the area treated.

4D Laser Sculpt

Laser Sculpt is a breakthrough in fast and effective fat reduction and body contouring combined.

4D Ultrasound

Ultrasound Body is a treatment that aims to remove fat deposits from under the skin.

Products

We stock a range of skincare products at PPP Laser Clinic to maintain your skin health at home.

CALECIM® Professional Multi-Action Cream

Calecim creams can successfully improve the signs of ageing through full face rejuvenation.

CALECIM® Professional Restorative Hydration Cream

Can be used on its own or after serums or other corrective treatments such as Multi-Action Cream.

Post-Laser Facial Mask

This is PPP's unique 'signature' mask, containing a high concentration of Hyaluronic Acid (HA), which is specialized for post laser skin, providing instant hydration and enhancing the results of PPP Laser treatments.

Anti-Aging Bio-Cellulose Mask

An exclusive in-house product, formulated by doctors, made from the most advanced premium mask material – Bio-Cellulose, which adheres to the skin like a second skin.

When you visit one of our state-of-the art clinics you will be greeted with a very warm welcome and made to feel at home in our luxurious and relaxing surroundings, while you wait to be seen.
