

# HOTEL AMENITIES

  
**PAPOUTSANIS**  
~~~~~  
SINCE 1870

# Creating wellness since 1870

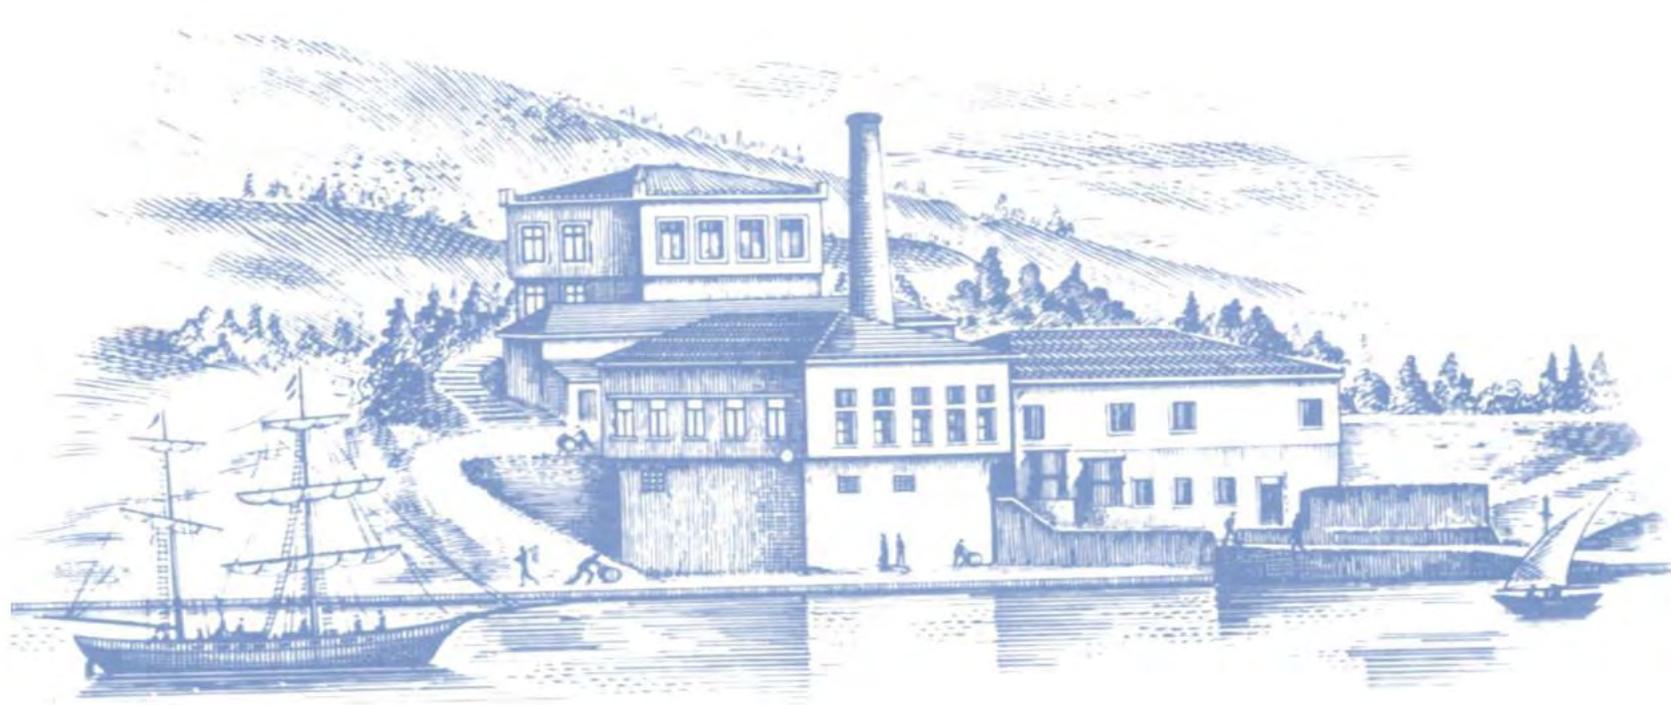

## Who we are

---

**Papoutsanis** Company is a **Greek Manufacturing Company** with **150 years** of experience in the personal care industry.

The company owns **one of the largest Production Units** in the Southeastern Europe with state of the art, **vertically integrated automated production systems**.

It holds a **leading position** in hotel amenities production in Greece. Its **high-end quality products** are trusted by most of the established hotels for their guests, in Greece and abroad. Papoutsanis is **constantly expanding its exports** with a strong presence in leading **hotel chains worldwide**.

# Our Vision

...we aspire to contribute to everyday wellness with quality personal care products that become a reference point in the beauty and personal care market, while meeting the high standards of consumers who have trusted us for the past 150 years.

# Our Mission

...following our expertise, tradition & heritage, we believe in a sustainable future that is comprised of innovative ideas, production methods that aim to eliminate the ecological footprint of manufacturing processes & products that intend to be a reference point in domestic and international markets.

# Our Values

## Ethos

We make sure we remain **worthy of the trust** we receive from our employees, our partners and the consumers.

---

## Care

We **commit** to our consumers, partners, society and the environment with a **sense of responsibility**, taking care of their needs with the exemplary quality for our products.

---

## Innovation

We invest in **modern technologies** to exploit the treasures of nature and combine them with **sophisticated cosmetology** to create innovative products!

---

## Legacy

We value the legacy of Papoutsanis signature and the company's **heritage since 1870** and we aim to reflect it on each product we create!

# A state of-the-art plant

**220.000.000** Units/year

// Continuous improvement // Integrity // Training

# Quality Standards

Production and packaging of our products are thoroughly controlled through the official quality assurance system based on the requirements of **ISO 9001**. **GMP's (Good manufacturing Procedures)** based on the requirements of ISO 22716, are implemented at all stages of production process.

We have a fully equipped and manned **in-house R&D** laboratory and excellent know-how in developing solid and liquid soap formulations.

Papoutsanis pursues in quality investment throughout all stages of production and backs its commitment through strong and **internationally accredited certifications**.

# Quality Standards

**ISO 9001** is defined as the international standard that specifies requirements for a quality management system (QMS). Organizations use the standard to demonstrate the ability to consistently provide products and services that meet customer and regulatory requirements. It is the most popular standard in the ISO 9000 series and the only standard in the series to which organizations can certify. ISO 9001:2015 applies to any organization, regardless of size or industry. More than one million organizations from more than 160 countries have applied the ISO 9001 standard requirements to their quality management systems.

Organizations of all types and sizes find that using the ISO 9001 standard helps them:

- Organize processes
- Improve the efficiency of processes
- Continually improve

All organizations that use ISO 9001 are encouraged to transition to ISO 9001:2015 as soon as possible. This includes not only organizations that are certified to ISO 9001:2008, but also any organizations involved in training or certifying others. As of September 14, 2018 organizations that are currently registered to ISO 9001:2008 should have transitioned to the 2015 standard.

# Quality Standards

**ISO 22716:2007** is the international standard for the **Good Manufacturing Practices (GMP) for cosmetics**.

ISO 22716 provides guidance to documenting and regulating the production, control, storage, and shipment of cosmetic products. The standard's guidelines will provide your organization with practical methods for managing the many factors that can affect product quality.

The European Union's Regulation (EC) No 1223/2000 requires cosmetic products to be manufactured according to Good Manufacturing Practices (GMP). GMPs create the practical development of quality assurance through the description of the activities that are based on sound scientific judgement and risk assessments. GMP guidelines were written to define the activities that enable you to obtain a product that meets defined characteristics. GMPs are critical to organisations looking to reduce the risk and liability of their products. Your organization can demonstrate compliance with GMP by implementing ISO 22716.

## Benefits of ISO 22716 certification for your organization:

- Improves quality management systems
- Demonstrates commitment to the safety of cosmetic products
- Ensures your compliance to international guidelines

Intertek brings in-depth knowledge of the manufacturing processes and GMP codes to cosmetics manufacturers. Intertek's cosmetics testing services include clinical studies, safety assessments, quality control, in vitro testing, product claims verification, screening for restricted substances, and suppliers' audits. With our global network of auditors, we provide a full compliance solution for ISO 22716 including auditing and certification\*, training, and e-learning tools.

By partnering with Intertek, you'll gain a knowledgeable business partner dedicated to helping you meet objectives, minimize risk, and optimize your supply chain. We can also combine a Cosmetics GMP audit with other standards such as ISO 9001 and ISO 14001, reducing interruptions and saving you valuable time and money.

# Quality Standards

**Sedex Supplier (B)** Membership allows organizations to share ethical business data (namely on Labour standards, Health and safety, The environment, Business ethics) with their customers, providing visibility of their business practices.

As a Sedex Member we are committed to being a responsible business, sourcing responsibly, and improving ethical standards and working conditions within the supply chain.

## About Sedex:

Sedex is one of the world's leading ethical trade service providers, working to improve working conditions in global supply chains. Sedex provides practical tools, services and a community network to help companies improve their responsible and sustainable business practices and source responsibly.

Using Sedex enables companies to work together to better manage their social and environmental performance, and protect people working in the supply chain. Sedex has over 55,000 members in 180 countries, across 35 industry sectors, including food, agriculture, financial services, clothing and apparel, packaging and chemicals.
