PLATINUM SPONSOR

RIZON

RIZON TRUCKS

RIZON is a commercial electric truck brand developed and manufactured by a trusted global OEM. Our fully electric medium-duty trucks are designed based on customer feedback for practical real-world business needs. Developed and built in-house from the ground up, RIZON is setting a new standard in Class 4-5 commercial electric vehicles. Our proven knowledge of the commercial electric vehicle marketplace can help you navigate the integration of eMobility solutions into your business operations. The RIZON dealer network offers eConsulting guidance, infrastructure planning, fleet management systems integration, battery life-cycle management and end-of-life disposition.

AND MORE

ANTI-LOCK BRAKING SYSTEM (ABS)

ABS and Electronic Brake Distribution contribute to better traction and overall stability of the truck for enhanced safety.

ELECTRONIC PARK LOCK (EPL)

Prevent rollaways with the automatic park lock, which sets the parking brake and locks the gearbox with the push of a button.

REVERSE VIEW CAMERA SYSTEM

Factory installed reverse camera with in-cab color monitor helps the driver see behind the vehicle when reversing.

ELECTRONIC STABILITY CONTROL (ESC)

Supports the driver in nearly all critical driving situations by detecting vehicle skidding movements and actively counteracts to prevent rollover.

All the support you need, in one intelligent network.

As part of a global network of expertise, RIZON offers unparalleled support and access to well-prepared dealers. With a legacy of engineering excellence behind every vehicle, RIZON trucks are built to last for every job today and tomorrow. So you can breathe easy knowing we have your back through it all.

THE FUTURE OF MEDIUM-DUTY IS HERE.

POWER YOUR BUSINESS WITH RIZON.

PLATINUM SPONSOR

ISUZU

ISUZU TRUCK OF CANADA

At Isuzu Commercial Trucks, we understand that the last mile is a race against time, rising expectations, and operational complexity. That's why we build trucks specifically engineered for this moment. From urban cores to suburban neighborhoods, Isuzu trucks are designed to thrive where delivery is toughest. Tight streets, frequent stops, congested routes — our low cab forward design maximizes visibility and maneuverability, giving drivers confidence in dense city conditions. Our durable diesel and efficient gas powertrains deliver the reliability fleets depend on, day in and day out.

Presenting: Last Mile, First Choice: Why Fleets Choose Isuzu
Thursday, May 07, 2026 | 9:10–9:30 AM | Orion A

2026 ISUZU NRR EV

EVERYTHING YOU WANT FROM AN ELECTRIC TRUCK EVERYTHING YOU EXPECT FROM ISUZU

The name Isuzu has become synonymous with innovation in transportation. The first Isuzu electric truck, the NRR EV, puts the EV in **"EV**erything."

100% ELECTRIC
Zero emissions. Cleaner tomorrow.

POWERFUL
150-kW motor delivers 280 lb-ft of torque.

FOUR BATTERY CHOICES
60, 100, 140, or 180-kWh to fit your range needs.

FLEXIBLE CHARGING
DC fast charging and AC (level 2) charging capable.

ADVANCED SAFETY
Standard ADAS, SRS airbags, and enhanced keyless entry.

ISUZU360™
Longer warranty and maintenance coverage.

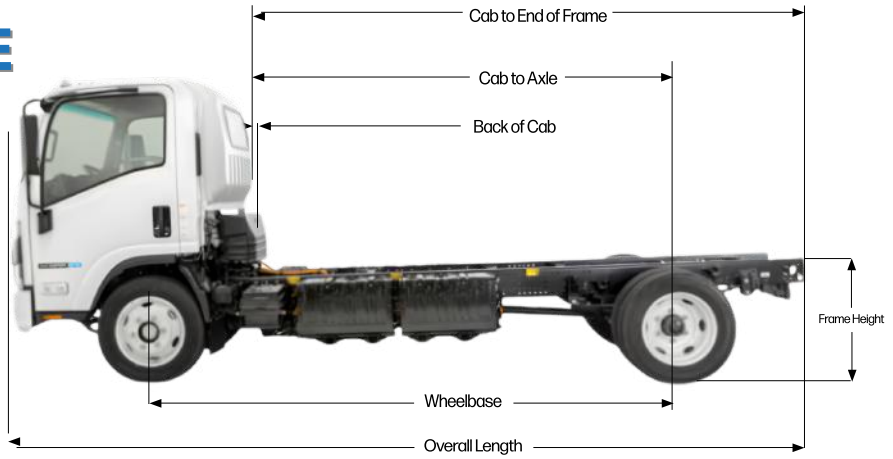

ELECTRIC POWER WITHOUT COMPROMISE

Power you can count on. Every NRR EV is powered by a number of 20 kilowatt-hour, lithium- ion battery packs.

A range of ranges. Why buy more battery capacity than you'll use—or settle for less than you need? Isuzu offers four battery configurations so you can choose the combination that's right for your needs.

Real-world capability. The battery packs provide power to a three-phase, 150-kilowatt electric drive motor that delivers 280 lb-ft of torque, the kind of performance you'd expect from a Class 5 truck.

Electric Power Take-off (ePTO). The NRR EV's ePTO technology-similar to what is available on an internal combustion engine (ICE) truck-"takes power off" the vehicle's power source to drive auxiliary equipment and systems. The NRR EV's power source is electric, that means no fossil fuels for your power take-off needs. This is especially important for companies wishing to promote sustainability and reduce their carbon footprint.

7 Battery Packs - 140 kWh

9 Battery Packs - 180 kWh

ISUZU360™

Drive with confidence.
Extended warranty and maintenance coverage.

READY TO CHARGE AHEAD?

Learn more about the 2026 Isuzu NRR EV and how it can power your success.

GOLD SPONSOR

GTA GSM

GTA GSM is an air-powered logistics provider built for speed-critical supply chains across Canada and global markets. Our accelerated air programs move freight faster and more reliably by combining scheduled air capacity, charter solutions, and integrated ground, last mile, and customs operations. With expertise in dangerous goods, time-sensitive cargo, and international freight forwarding, our IATA-certified teams operate through key airport hubs, enabling seamless execution across air freight, charters, trucking, and final mile delivery under one coordinated network.
