ABOUT EUROPEAN ROTORS

The VTOL show and safety conference

WELCOME TO THE FIFTH EDITION OF EUROPEAN ROTORS. We are delighted to welcome you back to Cologne, Germany, the birthplace of EUROPEAN ROTORS—the leading European vertical aviation trade show and safety conference. Since the first edition in 2021, the European Helicopter Association (EHA) and the European Union Aviation Safety Agency (EASA) have united to host this unique event dedicated to the vertical take-off and landing (VTOL) community.

From 17 to 20 November 2025, with the exhibition floor open 18–20 November, EUROPEAN ROTORS will showcase the full spectrum of rotorcraft and VTOL innovation. This is where manufacturers, operators, regulators, service providers, and future professionals come together to exchange knowledge, strengthen networks and drive forward the sustainable future of vertical flight.

The event features world-class exhibits from leading OEMs and suppliers, the renowned EASA Rotorcraft Symposium, and an extensive educational programme with best-practice presentations, training sessions, and interactive workshops. Choose from our established stages in the hall with silent conferencing, the popular Rotor Safety Zone, or the Rheinsaal sections in the Conference Centre North. One ticket covers it all. Whether exploring the latest technologies, gaining practical experience, or engaging in regulatory dialogue, attendees will find unmatched opportunities for collaboration and learning.

As we mark this fifth edition, EUROPEAN ROTORS continues to empower the rotorcraft community to tackle future challenges and highlight the vital contributions of VTOL operations across the European landscape.

WELCOME

To the VTOL show and safety conference

Welcome to EUROPEAN ROTORS 2025

On behalf of EHA and all our members, I warmly welcome you to EUROPEAN ROTORS 2025.

We are back in Cologne—the European capital of aviation safety—for the fifth edition of Europe's premier VTOL event.

EUROPEAN ROTORS is a home for the VTOL industry where OEMs, operators, pilots, regulators, and service providers meet, with an unmatched educational programme including the EASA Rotorcraft Symposium, training courses, and workshops. In an era of natural disasters and global crises, rotorcraft and VTOL are indispensable for security, rescue, and connectivity.

This week we share expertise, showcase breakthrough technologies, highlight sustainability, and open doors for the next generation through our Career Day. Together, we ensure vertical flight remains innovative, resilient, and essential to society.

– **Fredrik Kämpfe**
Chairman, EHA

Shaping the Future of Vertical Flight

On behalf of European Rotors GmbH, it is my great pleasure to welcome you to this year's EUROPEAN ROTORS in Cologne—a city central to the history and growth of our leading VTOL Show and Safety Conference. European Rotors GmbH was established to take responsibility for the ongoing development and expansion of the show on behalf of EHA and EASA. We are deeply grateful for the dedication of all who have contributed to making this year's event possible. Together with our exhibitors, sponsors, partners, and suppliers, we are committed to ensuring EUROPEAN ROTORS is the unmissable annual event for Europe's vertical flight community. Working together, we will take EUROPEAN ROTORS to new heights.

– **Callum Clench**
CEO, European Rotors GmbH

EUROPEAN ROTORS

THE VTOL
SHOW AND
SAFETY
CONFERENCE

Looking to the Future, Building on Solid Foundations

EASA welcomes you to the EASA Rotorcraft Symposium and EUROPEAN ROTORS 2025. The Agency is proud to be part of this collaboration that is now in its fifth year. It is also a pleasure to welcome you to Cologne, the home city of EASA since 2005.

This year's events will provide participants with the chance to contribute to the worthy goal of ensuring a safe and effective industry.

The event will help the industry to ensure that it can take advantage of new technologies, without ever compromising safety, and also provide the opportunity to learn more about managing new risks such as those related to cybersecurity or global navigation satellite system jamming that is so important in today's world.

– **Florian Guillermet**
Executive Director, EASA

Exploring the Future of Our Industry, Learning, and Networking

EUROPEAN ROTORS is where the vertical aviation community gathers to explore the future of our industry, while learning and networking. VAI is proud to represent the helicopter sector and the expanding fields of advanced air mobility, hybrid-electric, and autonomous flight.

We are in a period of rapid evolution. Rotorcraft remain indispensable as new technologies continue to emerge. Success depends on collaboration, harmonised standards, and a unified voice advancing safety, skills development, and influence.

EUROPEAN ROTORS offers a venue for exchanging ideas, strengthening partnerships, and developing solutions that benefit all in vertical aviation.

I encourage you to take advantage of the discussions, training, and networking opportunities this week. Together, we will ensure vertical flight continues growing in scope, size, and strength.

– **François Lassale**
President & CEO, Vertical Aviation International

Wishing You a Successful and Inspiring Event

As Federal Minister of Transport, I am proud to support EUROPEAN ROTORS, a leading platform for innovation and excellence in the rotorcraft industry.

The German Government is committed to cooperating closely with European partners to foster cutting-edge technology and sustainable aviation solutions that strengthen Europe's position as a global aerospace leader.

We want to pave the way for safer, greener, more efficient vertical flight. In Germany we know about the importance of helicopters for society. EUROPEAN ROTORS 2025 reflects the spirit of progress we are championing. It brings together the brightest minds to advance the future of rotorcraft transport. I commend all participants for their dedication and encourage you to leverage this unique opportunity to work together and drive innovation.

– **Patrick Schnieder**

Federal Minister of Transport, Germany

Welcome to North Rhine-Westphalia

Welcome to North Rhine-Westphalia, a leading hub of innovation, technology, and industrial excellence. I am delighted to welcome you to this leading trade fair for helicopters, drones, and vertical flight technology. EUROPEAN ROTORS is a place for exchange, inspiration, and visionary ideas. The vertical aviation sector is central to shaping the future of sustainable, efficient, and safe mobility. Cutting-edge aviation technologies must go hand in hand with ecological responsibility. Let us seize the tremendous opportunities of advanced air mobility and vertical flight technology—for the benefit of our climate and future generations. I wish you inspiring days in the host city of Cologne, as well as engaging discussions, and many encounters that shape the mobility of the future.

– **Oliver Krischer**

*Minister for Environment,
Nature Conservation, and Transport*

Welcome to Cologne

For the third time now, our city is again at the heart of the European rotorcraft community. This is something of which we are particularly proud.

EUROPEAN ROTORS 2025 is the perfect platform for technological progress and innovation. We are happy to provide the framework for this event in Koelnmesse's state-of-the-art exhibition halls, located in Cologne's city centre, at the heart of Europe's largest economic region. The smooth organisation due to Koelncongress reflects our commitment to the region and the international business community.

Let us use these days to exchange knowledge, discover new technologies, and forge fruitful partnerships. We wish you all an inspiring and successful event.

We look forward to meeting you again at EUROPEAN ROTORS.

– Gerald Böse
President
& CEO,
Koelnmesse
GmbH

Your Gateway to Vertical Aviation Opportunities

Discover your pathway in vertical aviation at EUROPEAN ROTORS 2025. Whether you are a student, a trainee pilot, or an experienced professional seeking to advance your career, Career Day is designed to connect you with Europe's leading rotorcraft and VTOL organisations. Meet top employers, explore new opportunities, and gain first-hand insights into the skills shaping the future of vertical flight.

Employers can take advantage of this dedicated platform to engage directly with emerging talent and position their organisation at the heart of the industry's next generation.

Meet representatives from:

AIRBUS, LEONARDO, Avincis, ADAC Heliservice GmbH, DRF Maintenance, EASA, Hillsboro Heli Academy, NHV Group, and Northrop Grumman LITEF GmbH.

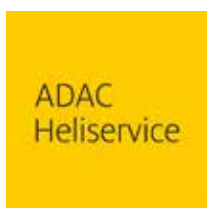

Join us to network, learn, and take the next step in your professional journey—because the future of vertical aviation starts here.
