

MATRIX Z is the USA source that creates extraordinary product brands which incorporate re-cycled shell and loose aggregates from our region and other regions of our planet that are processed into tiles, laminates and other use for a wide variety of industries. All the brands are introduced as a harmonious mix for use in interior and exterior design applications - for both residential and commercial applications.

The eco-friendly collections are composed of a variety of re-cycled elements in order to create a designer palette that can be used in harmony with each other in designs for use in interior and exterior applications for commercial and residential floor and wall applications.

These products designed by nature with the innovative hand of man "Haute Nature". This is Nature re-defined in tile and stone. The company vision is to create a legacy that would incorporate artistic design along with respect for our natural coral and other shell resources utilizing innovative technologies in its processes. We market our designs to the A & D community and other industries worldwide.

Please visit www.matrix-z.com for a complete product details and technical specifications.

SeaStone® products are cementitious stones containing a proprietary admixture using natural fossil shell and other aggregates which vary from piece to piece designed to replicate the appearance of natural stone. An enhanced manufacturing process applies tons of pressure to each unit, fusing the aggregates and fossils together which simulates a natural occurrence. This unique process ensures a more durable product with high compression strength and low water absorption qualities thus providing an alternative to the use of natural stone.

SEATILE®

SeaTile® A unique collection of natural shell tiles and man-made composition tiles which incorporate crushed shell and other aggregates. The natural shell tile collections... ceramic back laminates, polished mosaic shell, seamless shell and capiz shell are designed for interior use and the specialty gem series and other composition tiles are designed for both interior and exterior applications. Each collection is designed as a complement to our brand SeaStone® These brands together are designed to harmonize design and may be incorporated in both residential or commercial designs.

Ceramic Back and Laminate

SeaTile® ceramic back tiles and shell laminates are available in 4 (four) natural colors and a variety of color tints. SeaTiles are offered in two distinct thicknesses: 1/4" (6mm) mounted on ceramic back and 1/64" (0.3mm) for skin laminate. The tile is created by a proprietary process that uniquely applies the gem grade shell laminate to unglazed ceramic tile. The shell laminate skins are uniquely prepared with a thin coating on the reverse. Both the tiles and laminates are then coated with a high gloss, heat resistant two-part polyurethane for protection and stain resistance. Raw shell laminates are available in 4 (four) natural colors and uncoated for translucent effect under artificial or natural light.

fusionstone
By Matrix Z
MATRIX-Z.COM USA

A Unique designed fusion of the SeaTile Specialty Gem Collection and the SeaStone Collection engineered for use for interior and exterior applications such as counter slabs and table tops. May also be used as edge trim. The top finish is composed of the 1/4" Gem slab in our various colors shown in that series and then fused with the cement tile base collections shown in the SeaStone Collection.

Seamless Panel Shell Mosaics

Genuine polished shell mosaic tiles are buff polished and hand applied butt joined (seamless) on various options of hard back surfaces. Natural pearl shell colorations vary from piece to piece, which enhances the iridescence and opalescence beauty of the product.

Standard Backing Fire Rated hard back surface: (Other backing options available by special order) Standard Shell Panel 12"x 12" x 1/4" (300*300*6mm) Shell Mosaic size on panel: Square 1/2"x1/2" (15*15mm) or Brick Design 1/2" x 3/4" (15*25mm) other pattern designs shown below. All sizes shown nominal. Other shell colors and or patterns are available by request.

Semi-Precious JewelStone Tile

Semi-Precious GemStone is a crystal composition and a mineral or other natural material that has the beauty and durability which, in cut and polished form, is utilized in industry in a number of ways; we have captured the beauty of the discarded waste of this mineral to design a series of tiles that may be used for vertical wall enhancements or accessories. The rock form is engineered as an enhancement aggregate in our SeaStone Brand. Semi-precious gemstones are suitable for residential and commercial, interior or exterior walls and floors and aquatic installations, including swimming pools and spas. The supply is limited to availability and offered as a unique collection of tiles and stone "nature made". Some examples are shown in tile form which is available in 12"x12"x 1/4" and 6"x6"x1/4" or other sizes cut to Listello accents.
