COGNITIVE HEALTH OPPORTUNITY

**HarkePlus RemindPro Overview**

HARKE Pharma GmbH in Germany, recently became the patent holder of RemindPro, it is a combination of two plant-derived natural products Fructooligosaccharides (FOS) from Morinda officinalis and the Amino Acid L-Theanine from Camellia sinensis. A double-blinded placebo-controlled study has shown that this synergistic complex has been clinically proven to boost memory and cognition.

**What is Fructooligosaccharides?**

Fructooligosaccharides are non-digestible short chain carbohydrates which occur naturally in many plants. Because Fructooligosaccharides are non-digestible they reach the large intestine intact where they can deliver a prebiotic effect.

**What is L-Theanine?**

L-Theanine is an Amino Acid found in green tea. It is commonly used in supplements and has benefits reported for cognitive health, increased focus and a reduction in stress and anxiety.
