

# 2021

Stedman<sup>®</sup>  
collection

## Our collection.

Since 1953, the Stedman® brand has stood for **reliable product quality, excellent value for money and ethically responsible manufacturing** conditions. Our 2021 collection includes a wide range of products for men, women and children, from simple T-shirts and sweatshirts in popular colours to functional sports and versatile outdoor clothing.

We are proud that we have been able to focus more and more on **environmentally friendly materials** in recent years and are convinced that this change will have a lasting positive impact on the textile industry. Only by acting responsibly do we have the opportunity to create a better future for people and nature.

# HIGHLIGHTS 2021

## SUSTAINABILITY

With our sustainable collection we can make a small contribution to **reducing the environmental impact** caused by textile production. Discover our eco-friendly styles **made of organically grown cotton** and our modern sports styles **made from recycled plastic bottles** on pages 6-9.

## SIZES AND COLOURS

In response to numerous requests we have again **expanded our size and colour range** for some of our most popular promotional styles. For an overview of all size and colour additions see page 10.

## LAST CHANCE

This year, we offer a **special discount** on selected styles and colours. Look out for our **red discount tags** throughout the catalogue! You can find a complete **overview of all “last chance” products** on page 12.

Made from recycled plastic bottles

# BE KIND TO OUR PLANET

Sustainability focuses on meeting the needs of the present without compromising the ability of future generations to meet their needs.

Avoid the depletion of natural resources in order to **maintain an ecological balance.**

We pride ourselves in our ethical ways of business and believe it is **our part as global citizens to contribute to sustainable and ethically-minded production** for a minimal environmental impact.

Our organic styles are made of 100% OCS-certified organic ring-spun cotton; certified by Control Union Certifications (CU 819645).

Our textile articles and components have been tested for harmful substances and are therefore harmless for human health, assuring high product safety.

Recycled Material

Our sustainable polyester made from recycled plastic bottles offers high-quality characteristics but with a smaller environmental footprint, keeping plastics from going to landfills and our oceans.

Member of amfori, the leading global business association for open and sustainable trade. We improve the social performance of our supply chain via amfori BSCI.

All our articles are subject to strict quality controls. With our own quality management team on site, we ensure that our high demands on material and product properties are always met.

# SAVE THE OCEANS WITH US

Every year **more than 8 million metric tons of plastic waste** end up in our oceans killing millions of seabirds and other animals. **1 million plastic bottles** are bought worldwide every minute. Only **9% of the plastic** ever made **has been recycled**.

Our sustainable polyester made from recycled plastic bottles offers the same high-quality characteristics as conventional polyester but with a **smaller environmental footprint**.

Furthermore, the production of recycled polyester requires far **less energy**, causes **significantly fewer CO<sub>2</sub> emissions**, and helps **to keep plastic waste from going to landfills and our oceans**.

# CHOOSE ORGANIC COTTON

Organic cotton is produced and certified according to the guidelines and standards of organic farming.

The cultivation of organic cotton preserves the **health of the soil, nature and people**, as only natural means and sustainable methods are used instead of artificial fertilizers and pesticides.

The use of toxic chemicals and genetically modified organisms (e.g. seeds) is prohibited. Instead, the cultivation of organic cotton combines tradition, innovation and science to **benefit the environment and promote a good quality of life for all.**

# FABRICS

**RECYCLED,  
ORGANIC,  
ACTIVE-DRY<sup>®</sup>  
AND MORE.**

High-quality fabrics with unique properties and a great wearing comfort.

For production reasons, the colours of the fabric swatches may differ from those of the actual products.

## RECYCLED POLYESTER

Our recycled polyester offers the same high-quality characteristics as conventional polyester but with a smaller environmental footprint. The production of recycled polyester requires far less energy, causes significantly less CO<sub>2</sub> emissions, and helps to keep plastic waste from going to landfills and our oceans. In the Stedman<sup>®</sup> collection you can find recycled polyester in sports shirts, sports jackets, sweatshirts, sweatpants and fleece jackets.

## ORGANIC COTTON

Organic cotton is grown without the use of pesticides, herbicides or other chemical fertilizers and is therefore particularly gentle on people and nature. Our organic styles are made of 100% OCS-certified organic ring-spun cotton. Environmentally friendly, fashionable and absolutely soft on the skin. These styles offer all the advantages of a classic promotional T-shirt and at the same time the good feeling of having made a small contribution to environmental protection.

### **RING-SPUN COTTON**

Cotton is a soft, absorbent and breathable natural fibre, making it the perfect choice for clothing worn close to the skin. T-shirts made of cotton fabric are very airy, durable and easy to clean. For our cotton styles, we only use high-quality ring-spun cotton. Ring-spun yarn is made by twisting and thinning the cotton strands to make a very fine, strong, soft rope of cotton fibres. Ring-spun cotton T-shirts are significantly softer, more durable and last longer than their regular counterparts.

### **VISCOSE**

Viscose is a high-quality material made from the natural raw material cellulose. The fibre is very soft to the touch, moisture-absorbent and very breathable. It can be both glossy and matt and thus take on the look of wool, silk or cotton. T-shirts with a viscose share drape fluidly around your body, creating a premium wearing comfort as well as an elegant, flattering silhouette.

### **ELASTANE**

Elastane is a durable, highly elastic material that returns to its original shape after each stretch. For our Stedman® collection we use the “full feeder” technology, allowing elastane to evenly spread over the entire surface of the fabric. This leads to a high wearing comfort and a smooth surface that is excellent for printing.

### **ACTIVE-DRY® POLYESTER**

Stedman®'s ACTIVE-DRY® polyester is a quick-drying fabric with great moisture-control that is soft to the touch and very elastic. Therefore it is perfectly suitable for sports and functional clothing. The airy fabrics are very moisture-wicking and provide a pleasant feeling even during intensive workouts. T-shirts made of ACTIVE-DRY® polyester offer not only great wearing comfort, but also ideal conditions for various textile finishings.

### **FLEECE**

Fleece jackets are popular and indispensable companions in everyday life or for outdoor activities, as they provide strong insulation and can absorb and release moisture very well. They are light, breathable and keep you pleasantly warm even in cooler weather. There are many different kinds of fleece fabrics. The Stedman® collection includes Micro Fleece, Knit Fleece, Melange Fleece and Power Fleece.

### **NYLON**

Nylon fabrics are smooth, moisture-wicking and very durable, making them the perfect choice for athletic and outdoor clothing. Nylon is one of the lightest textile fibres and at the same time one of the strongest. Thanks to its high elasticity and moisture-wicking properties, nylon textiles offer great wearing comfort and excellent freedom of movement. In the Stedman® collection you can find nylon in sports shirts, sports tights, sports bras, padded jackets and vests.

### **POLYURETHANE (LEATHER LOOK)**

Polyurethane fabrics are durable and abrasion-resistant, yet soft, light and breathable. As such, they are used to create more comfortable and sophisticated weatherproof clothing that is even washable at 40°C. Thanks to the high-quality polyurethane, our Biker Jackets do not only look like leather, but also have similar stretch, stiffness and permeability properties like genuine leather jackets.

### **SOFTEST SHELL**

The outstanding properties of our Softest Shell styles are their low weight and the combination of two layers of clothing in one. Softest Shell combines an outer layer to protect against wind and weather with an inner mesh layer. Thus, Softest Shell products are wind-, water- and dirt-repellent. The pleasantly elastic material ensures a high level of wearing comfort.

# PRINT & EMBROIDERY

When it comes to our garments, style, function and comfort are not the only things that matter to us. We pay particular attention to the most diverse methods of printability so that your various decoration techniques can be applied to our products in outstanding quality.

Our fabrics offer an even and smooth surface, which enables an optimal printing result.

To meet the highest demands, we are constantly working to adapt our products to the latest printing techniques.

To do this, we test each and every product together with our print test team. To continuously optimise our products, we are constantly looking for printability testers. You are welcome to join our print test team. Simply fill out the registration form at:

[stedman.eu/print-tester](https://stedman.eu/print-tester)

## Screen printing

Screen printing is the most widely used printing process in the promotional textile industry. Here, the printing ink is pressed through a stencil onto the textile. We divide screen printing into 3 types:

### Plastisol screen printing

The most popular colours in textile screen printing are plastisol colours. The advantages of plastisol inks are, among other things, their high opacity, long durability after numerous washings and the implementation of special colours.

✓ Plastisol printing requires a smooth surface, so we recommend all our products except fleece & quilted or padded articles.

### Water-based screen printing

The big advantage of this printing technique is the feel. Prints with water-based screen printing ink are very smooth. After washing the printed shirt you will hardly feel any difference between the printed and the unprinted area.

✓ We recommend this environmentally friendly and water-based screen printing on 100% cotton, our popular cotton-elastane shirts and on all our sweat products.

### Discharge

For discharge printing, the ink is mixed with a bleaching agent, which brightens the colour of the textile. Due to the brightened material, the ink has a higher opacity and the printing layer can be kept very thin. Discharge printing offers a particularly high-quality feel, as the ink is hardly noticeable.

✓ The discharge process requires the same fabric compositions as water-based screen printing, but not every colour is suitable.

## Transfer

With all transfer techniques, the design is applied to a carrier and then pressed onto the textile. Under transfer we have summarised various types of finished transfers (Aqua, Nylon...) as well as Flex, Flock & Sublimation.

✓ Here a smooth surface is needed for pressing, which is why we recommend all our products except fleece & quilted or padded jackets and vests.

## Sublimation printing

In sublimation printing, a special ink is used that turns into gas when heat is applied and can thereby be absorbed into the fibres of the textile. Sublimation printing offers particularly long durability and a high-quality feel.

✓ A polyester layer is required for this, which is why we can recommend all our polyester sports shirts. As sublimation printing does not provide sufficient opacity on dark textiles, we only recommend light colours for sublimation.

## Direct printing

DTG (direct to garment) printing is one of the latest printing techniques and is becoming increasingly popular in the textile printing industry. The design is applied directly to the textile fabric using an inkjet process and is then fixed using heat.

✓ We recommend DTG on 100% cotton, our popular cotton-elastane shirts and on all our sweat products.

## Embroidery

Embroidery with needle and thread can be a finishing option for almost all textiles.

✓ We can especially recommend all our jackets, whether fleece, softshell, imitation leather or nylon. But also our sweat products are perfect for embroidery. In general, we can recommend all fabrics that weigh more than 145 g/m<sup>2</sup>.

For the production of this catalogue we have chosen **sustainable printing:**

SMETA

The PEFC Council (Programme for the Endorsement of Forest Certification schemes) is an independent, non-profit, nongovernmental organization, founded in 1999 which promotes sustainably managed forests through independent third party certification. The PEFC provides an assurance mechanism to purchasers of wood and paper products that they are promoting the sustainable management of forests.
