

COUNTER-TOP CORONA AND VIRUS PROTECTION SCREEN

The Coronavirus has unfortunately hit all over the world. However, in the Mark Bric Display family we are here for you and can offer some great and economical products to protect you and your employees and customers during this time. Our unique Flexiframe products are flexible and available quickly and in many custom sizes.

Flexiframe virus protection screen – available immediately – easy to use.

This protective screen makes it possible to maintain contact in times of social distancing but still protect yourself and your customers. The transparent screen acts as a protective shield against coughing and sneezing. The PVC foil is easy to clean with disinfectant or can simply be replaced with a new foil as often as required. This screen provides protection for pharmacies, grocery shops, supermarkets, reception counters, take-aways and many other POS areas and locations where it is important to be face-to-face with your customers but also to provide protection.

The protective shield has foldable side wings to give all round protection and visibility. Set the wings to the desired angle. All frames are equipped with a 1 mm transparent foil. Manufactured in-house and available for immediate dispatch.

Special sizes are available on request.

EXTRA REPLACEMENT FOIL 1 Set = 1 pc. 70x85 cm + 2 pcs. 30x100 cm.

FLEXIFRAME INFO-STANDS

During this time of the Coronavirus outbreak, the authorities have implemented many new rules for everyone's safety, such as social distancing and restricted entry into shops. To help customers to understand what is required you can provide clear information using our Flexiframe stands and frames. Frames are available in 5 colours: Black, white, grey, red and blue. Frames can be cut to almost any size required.

Show that you are there for your customers and take care of them as well as your staff.

A-STAND 2 frames 70x100 cm, for double-sided use.

FLOOR STAND 1 frame 50x70 cm + 2 frames 50x30 cm, for double-sided use.
