

AN **7i** CENTRAL EXCLUSIVE

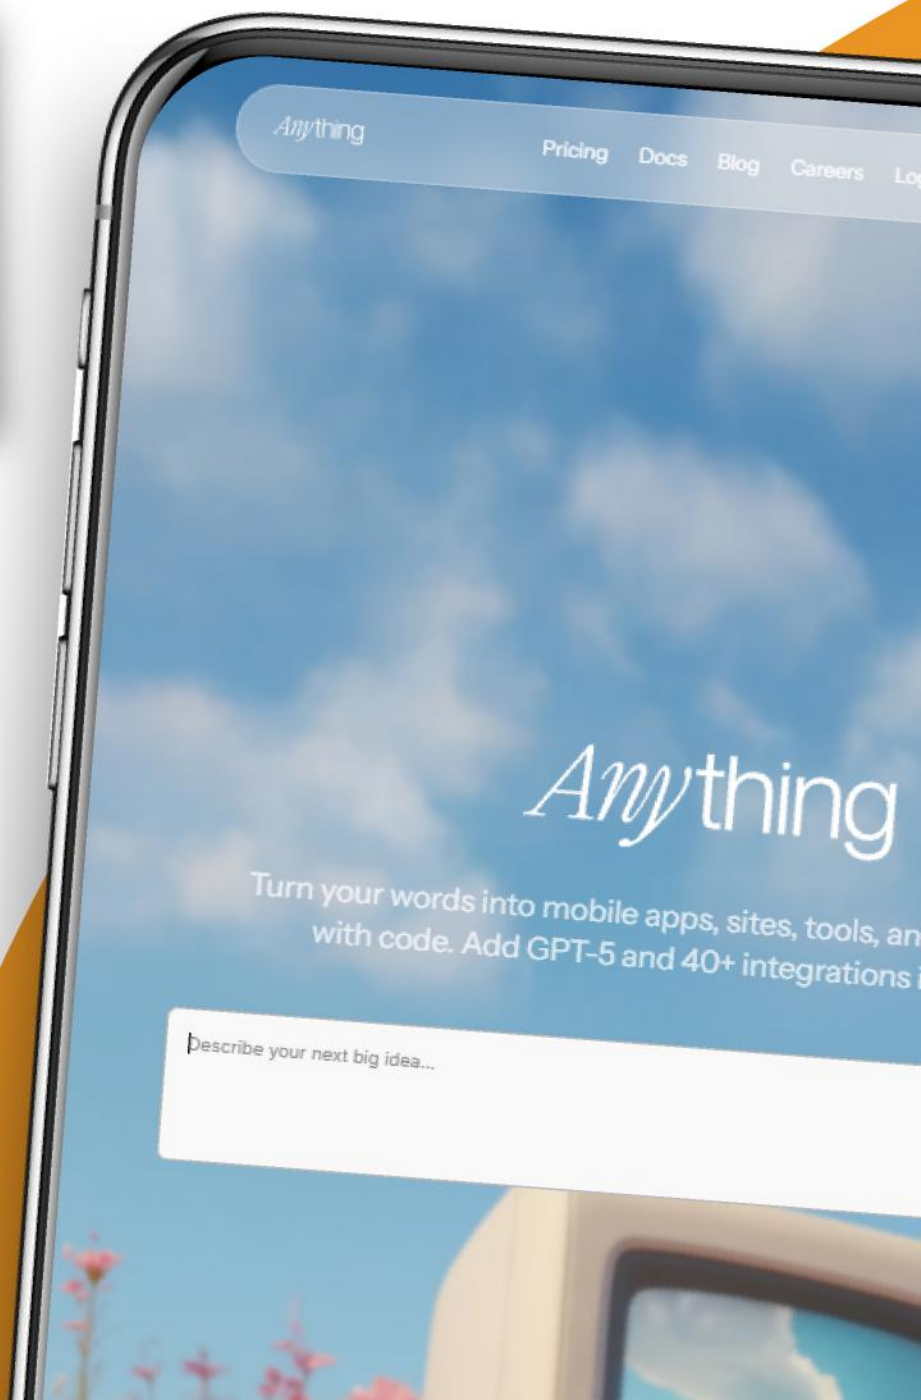

20 Prompts to Use

For Apps

Creation

using

Anything

Build Apps Faster

- Start With the Right Prompt
- Zero coding, just copy and paste in *Anything*

Smart Task Manager

- **Mission:** Help users never miss a deadline
- **What it does:** A workspace where users create tasks, set due dates, assign categories, and track completion, a dashboard shows daily progress and overdue alerts

Prompt to try in Anything

"Build a task management app with user login, task categories, deadlines, priority levels, and a dashboard showing today's tasks, overdue items, and weekly completion stats."

AI Habit Tracker

- **Mission:** Build routines that actually stick
- **What it does:** Users log daily habits, see streaks, and get AI-generated tips when a streak breaks, analytics show which habits are improving over time

Prompt to try in Anything

"Build a habit tracking app with daily check-in buttons, streak counters, AI-generated motivation when a streak breaks, and a weekly chart showing habit completion rates per habit."

AI Notes Summarizer

- **Mission:** Turn long notes into clear takeaways
- **What it does:** Users paste or upload notes and get a structured AI summary, key points, action items, and a one-liner, all summaries are saved in a history library

Prompt to try in Anything

"Build a note-taking app where users paste or upload text, then AI generates a structured summary with key points, action items, and a one-sentence TL;DR. Save all summaries in a searchable history."

Personal Dashboard

- **Mission:** Centralize all daily tools in one view
- **What it does:** A configurable home screen with widgets for tasks, notes, a quick timer, and links, users rearrange sections to match their workflow

Prompt to try in Anything

"Build a personal dashboard where users can add tasks, write quick notes, start a Pomodoro timer, and pin links, all on one screen with a drag-to-rearrange widget layout."

Social Media Generator

- **Mission:** Create a week of posts in minutes
- **What it does:** Users input a topic and target platform, the AI generates 3 post variations with different hooks, a caption, and relevant hashtags

Prompt to try in Anything

"Build an app where users enter a topic and choose a platform (Instagram, LinkedIn, X). AI generates 3 post variations each with a hook, body caption, and hashtag list. Let users save favorites."

Marketing Copy Generator

- **Mission:** Write persuasive copy for any channel
- **What it does:** Users choose a format (ad, email, landing page), input their product, and get copy in 3 tones, professional, casual, bold, they can remix any result

Prompt to try in Anything

"Build an AI copywriting app. Users choose format (ad, email, landing page), describe their product, and select a tone. AI returns 3 copy variations. Include a Remix button to regenerate with a twist."

Blog Post Generator

- **Mission:** Go from idea to full draft instantly
- **What it does:** Users enter a keyword or topic, the app generates a title, SEO meta description, a full outline, and writes the entire article, saved to a post library

Prompt to try in Anything

"Build a blog generation app. Users input a topic and target keyword. AI outputs a title, SEO meta description, H2 outline, and full article. Save drafts to a library the user can edit and export."

Script & Hook Generator

- **Mission:** Never start a video with a blank page
- **What it does:** Users describe their video idea and select a format (Reel, YouTube Short, TikTok), the app generates 5 opening hooks and a full 60-second script

Prompt to try in Anything

"Build a video script app. Users describe their idea and pick a format (Reel, Short, TikTok). AI generates 5 alternative opening hooks and a full 60-second script with timestamps. Let users rate each hook."

Lead Generation Tool

- **Mission:** Capture and organize leads automatically
- **What it does:** A public landing page with a lead form connects to a private dashboard, every lead is timestamped, tagged by source, and exportable to CSV

Prompt to try in Anything

"Build a lead gen app with a public landing page that has a lead capture form (name, email, message). Store leads in a dashboard with timestamp, source tag, and status. Add CSV export."

Client Portal

- **Mission:** Give clients a clear window into their project
- **What it does:** Each client logs in to see their project phases, milestones, shared files, and a progress bar, admins update status and upload deliverables from a backend panel

Prompt to try in Anything

"Build a client portal. Clients log in to view their project milestones, a progress bar, and uploaded files. Admins have a backend to update status, add milestones, and upload deliverables."

Simple CRM

- **Mission:** Track every client relationship in one place
- **What it does:** A contact database where users log clients, add notes from each interaction, assign a status, and filter by deal stage

Prompt to try in Anything

"Build a CRM app with a contact list, interaction log per contact, deal stage tags (lead, proposal, closed), and a kanban pipeline view. Add search and filter by stage."

Booking & Scheduling App

- **Mission:** Let clients book without back-and-forth
- **What it does:** Providers set their available time slots, clients choose a slot, enter details, and get a confirmation

Prompt to try in Anything

"Build a booking app. Providers define weekly availability. Clients pick a date, choose a slot, and submit a booking form. Providers see all bookings in a calendar. Add cancel and reschedule options."

Subscription Content Platform

- **Mission:** Gate premium content behind recurring revenue
- **What it does:** Free users see a preview, subscribers unlock full articles, videos, or downloads, stripe handles payments

Prompt to try in Anything

"Build a content platform with free and paid tiers. Free users see a 3-sentence preview. Subscribers unlock full content. Integrate Stripe for subscriptions. Admins publish and categorize content via dashboard."

Digital Products Marketplace

- **Mission:** Sell and deliver digital files automatically
- **What it does:** Sellers upload files, set a price, and write a listing, buyers pay via Stripe and instantly get a download link

Prompt to try in Anything

"Build a content platform with free and paid tiers. Free users see a 3-sentence preview. Subscribers unlock full content. Integrate Stripe for subscriptions. Admins publish and categorize content via dashboard."

Paid Resource Library

- **Mission:** Monetize a curated collection of resources
- **What it does:** Free tier shows 5 resources, premium unlocks the full library with filtering by category and type

Prompt to try in Anything

"Build a resource library app with free (5 items) and premium (full library) tiers. Add category and type filters. Show a 'new this week' badge on recent additions. Premium unlocked via Stripe checkout."

Online Course Platform

- **Mission:** Deliver structured learning with locked chapters
- **What it does:** Admins create courses with modules and lessons, free users access the intro lesson only

Prompt to try in Anything

"Build a course platform. Admins create courses with modules and lessons. Free users access lesson 1 only. Paid users unlock the full course. Add progress tracking, a visual course map, and lesson completion checkmarks."

Resume & Cover Letter Builder

- **Mission:** Help users land interviews faster
- **What it does:** Users input their experience and paste a job description, the AI tailors resume bullets and a cover letter to that exact job

Prompt to try in Anything

"Build a resume builder. Users input their work history, skills, and paste a target job description. AI generates tailored resume bullets and a personalized cover letter. Add PDF export for both."

Business Idea

- **Mission:** Stress-test startup ideas before building
- **What it does:** Users describe their idea, the AI returns a structured report, problem clarity, target market, competitors, revenue model risks, and a go/no-go score with reasoning

Prompt to try in Anything

"Build a startup idea validator. Users describe their business idea. AI generates a problem clarity score, target market analysis, 3 competitors, revenue model risks, and an overall go/no-go score with reasoning."

Study Assistant App

- **Mission:** Turn any material into an active study session
- **What it does:** Users paste lecture notes or a topic, the app summarizes the content, generates a 10-question quiz, and explains any concept the user marks as confusing

Prompt to try in Anything

"Build a study app. Users paste notes or a topic. AI generates a structured summary, a 10-question multiple-choice quiz with answer explanations, and a 'confused about X?' input to get a plain-English concept breakdown."

AI Q&A Knowledge Tool

- **Mission:** Make any document instantly searchable by question
- **What it does:** Users upload a PDF or paste text, they ask any question about the content and get a precise AI answer with the source section highlighted

Prompt to try in Anything

"Build an AI knowledge base. Users upload a PDF or paste text. They ask questions and AI returns a precise answer with the source section highlighted. Add a question history sidebar so users can revisit past answers."
