Plasterboard Fixings

Rigifix Lite Plasterboard wall fixings are designed to securely anchor into the wall behind the plasterboard and also grip the plasterboard comfortably, without damaging it. All the "pulling" load on the fixing is taken only by the wall. The shear load (up/down) is taken by the combination of the wall and the plasterboard. To assist with installation it is supplied complete with a 100mm flange head screw and drill bits to suit both plasterboard and block and plasterboard and brick.

Concrete Bolts

High Tensile Strength: Crafted for maximum load-bearing capabilities, these bolts ensure that even the heaviest items are securely fastened.

Anti-Slip Thread Design: Prevents loosening over time, maintaining the integrity of your installation and offering continuous support.

Customisable Fit: Available in a variety of lengths and diameters, allowing for tailored solutions that meet specific project needs efficiently.

Weatherproof Coating: The zinc plating acts as a barrier against moisture and chemicals, extending the lifespan of the bolts in outdoor and industrial environments.

User-Friendly: Designed for compatibility with standard installation tools, these bolts make the installation process straightforward, even for DIY enthusiasts.
