Two metal springs are standing upright on a concrete surface. Each spring consists of a cylindrical base, a central threaded shaft with a spring coil, and a flat circular top cap. The background is a blurred, textured surface, possibly concrete or stone. The text 'NEW PRODUCT' is overlaid in the center in a bold, red, sans-serif font.

**NEW PRODUCT**

# Silent Recoil Spring System

The JE Silent Recoil System will revolutionize the performance of your AR rifle. Self-contained direct drop-in replacement for your conventional buffer and spring. The JE Silent Recoil System will drastically reduce felt recoil, minimizing friction, and vibration for a smoother and quieter operation.

## PS-BFSC3-B

Fits: AR-10

\*A Standard 32 coil heavy spring is installed on the AR-10, LR-308 Silent Recoil System Model PS-BFSC3-B.

## PS-BFSC2-B

Fits: AR-15

\*A standard installed 28 coil heavy spring offers optimal performance equivalent to 3.8 oz buffer. 34 coil heavy spring equivalent to 5.4 oz buffer, and 38 coil heavy spring equivalent to 5.8 oz buffer - all are included in the AR-15 Silent Recoil System Model PS-BFSC2-B.

**BUTTSTOCKS**

# JE AR15/M4 Carbine Collapsible Stock v.2

## PS-ST2B

The JE Standard Carbine Collapsible Stock is an updated v.2 with reinforced butt-plate and internal wall thickness for an added 100+lbs. of linear striking force.

- Mil-Spec Fitment
- v.2 enhancement
- Exceptional comfort and durability
- Material: Dupont® Nylon 66 Polymer
- Added Features: Metal Sling Swivel
- Available in Commercial Spec
- Made in the USA

# JE Skeleton A-Frame Collapsible Stock - Available in Black/Tan

## PS-ST4B | PS-ST4T

The JE Skeleton A-Frame Collapsible Stock is the more advanced and redesigned- Made in USA version of the original Israeli Armory Scorpion Stock. Reinforced Cheek weld areas and internal wall thickness for an added 100+lbs. of linear striking force.

- Mil-Spec Fitment (Commercial Spec available)
- A-Frame design for weight reduction and streamline contours eliminates snagging on clothing, gear, equipment, or vegetation, for safer and faster weapon deployment during CQB engagement.
- Multi-point Front and Rear Ambidextrous QD attachment
- Friction-lock adjustment eliminating excessive "wobbly" stock movement for weapon stability and accuracy
- Material: Dupont® Nylon 66 Polymer
- Added Feature: Quick Conversion to non-adjustable pinned stock without modification. ( CA Compliant)
- Available in Commercial Mil-Spec

# JE Enhanced SOPMOD Stock Avail. Black/Tan

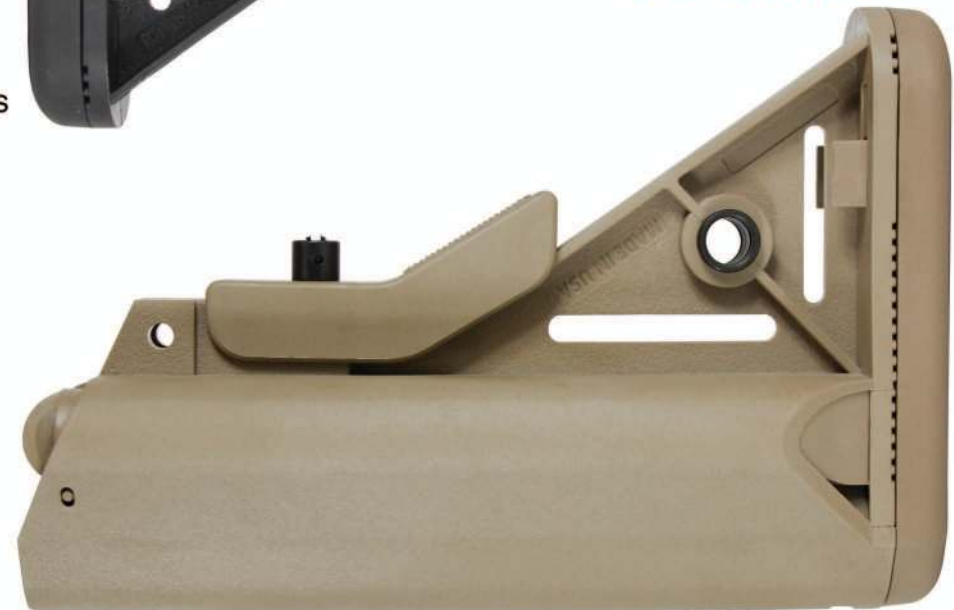

The JE SOPMOD Stock is an enhanced design of the original NSWC CRANE Division "Special Operations Peculiar Modifications" (SOPMOD) Stock.

- Mil-Spec Fitment
- Reinforced Cheek-Weld areas
- Proper Heat-treated Steel Hardware
- Ambidextrous Rear Steel QD Sling Mount
- Modular removable Recoil Butt-Pad
- Dual Waterproof Storage Compartments
- Material: Dupont® Nylon 66 Polymer
- Made in the USA

**PS-ST7B**

**PS-ST7T**

# JE Minimal AR Skeleton A-Frame Collapsible Stock

## PS-ST8B

The JE Minimal Skeleton A-Frame Collapsible Stock is the minimal version of The Skeleton A-Frame Stock with removable Recoil Butt Pad.

- Mil-Spec Fitment (Commercial Spec available)
- A-Frame design for weight reduction and streamline contours eliminates snagging on clothing, gear, equipment, or vegetation, for safer and faster weapon deployment during CQB engagement
- Single Point Ambidextrous QD attachment
- Modular Removable Recoil Reduction Butt Pad
- Material: Dupont® Nylon 66 Polymer
- Added Feature: Quick Conversion to non-adjustable pinned stock without modification. (CA Compliant)
- Available in Commercial Mil-Spec
- Made in the USA

# JE Retro M4 Standard Carbine SOPMOD

## PS-ST9B

The JE Enhanced M4 Standard Carbine SOPMOD Stock is the retro production of the Colt Fiberlite Standard CAR SOPMOD Stock found on the Block I M4A1 Carbine.

- Mil-Spec Fitment (Commercial Spec available)
- Compact and light weight originally designed for SOPMOD Block I M4A1 Close Quarter Combat (CQB) multi-purpose rifle
- Precise fit eliminating excessive "wobbly" stock movement for weapon stability and accuracy
- Material: Dupont® Nylon 66 Polymer
- 4 Position
- Made in the USA

# JE AK47 Folding Stock Available in Black/Tan

**PS-ST22B | PS-ST22T**

JE AK Folding Stock is designed for compact storage and transport of Kalashnikov AK47 Rifle. Made in USA and 922r Compliant. Fits Single-tang stamped receiver. Minor modification needed for other straight cut stamped MAK-90.

- Exceptionally Durable
- Lightweight
- Easy to install
- Side Folding for compact storage
- Locks in open/closed position
- Fits AK47/74 922r variants
- 922r Compliant
- Material: Dupont® Nylon 66 Polymer
- Made in the USA

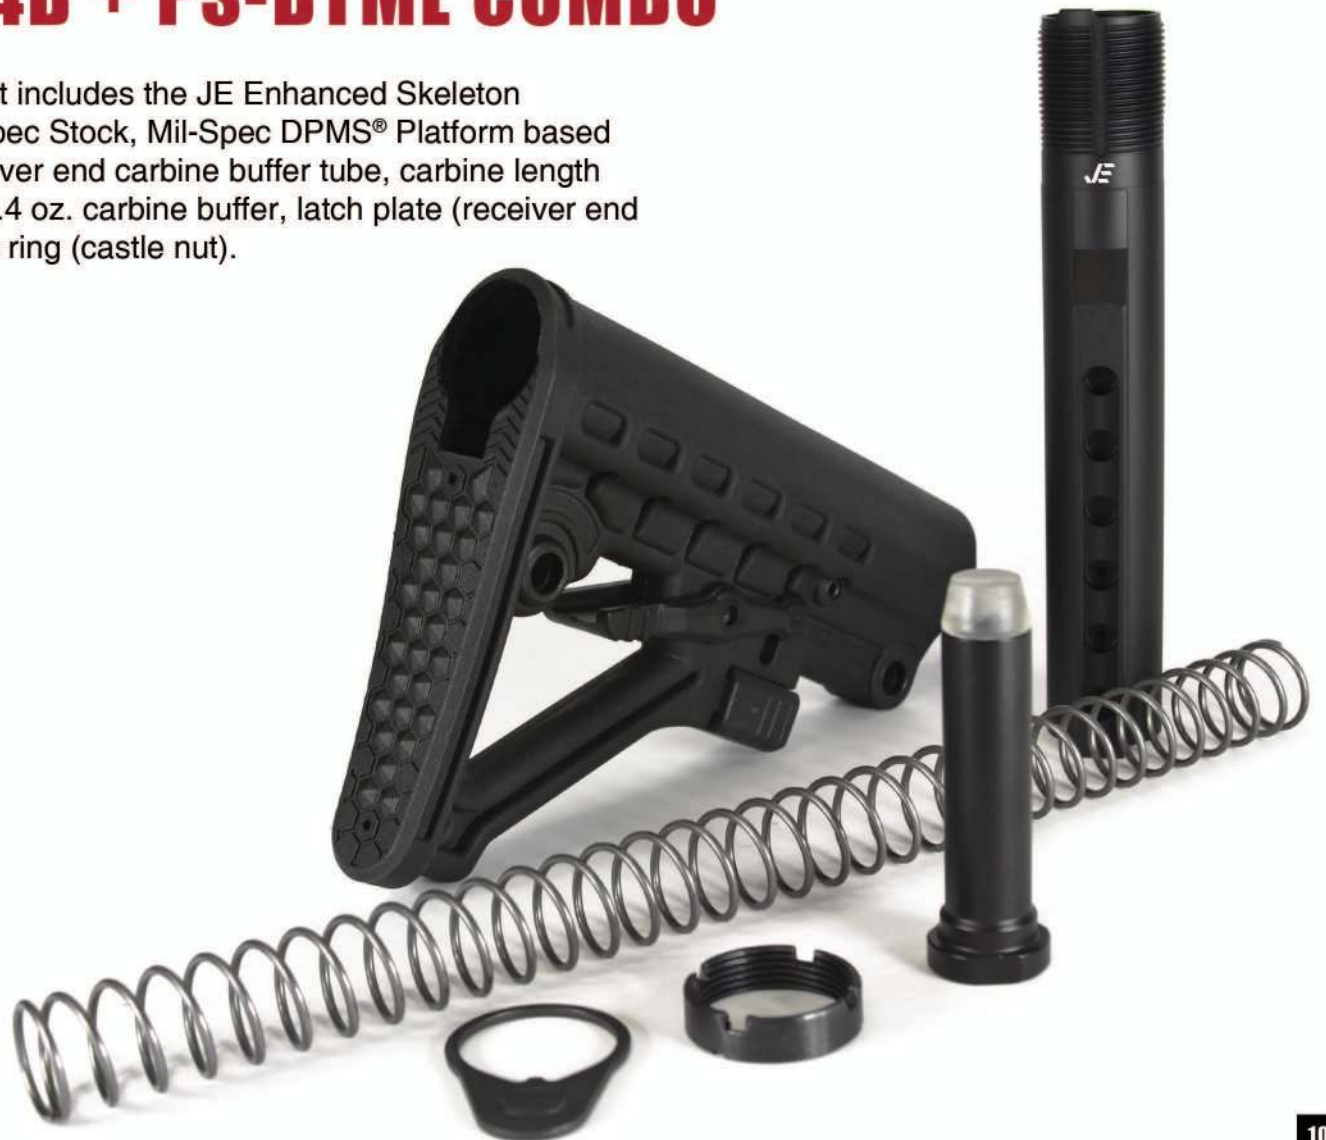

# JE Enhanced Skeleton A-Frame Stock Combo Mil-Spec

## PS-ST4B + PS-BTML COMBO

This 6-piece set includes the JE Enhanced Skeleton A-Frame Mil-Spec Stock, Mil-Spec DPMS® Platform based 6-position receiver end carbine buffer tube, carbine length buffer spring, 3.4 oz. carbine buffer, latch plate (receiver end plate), and lock ring (castle nut).

# JE Enhanced SOPMOD Stock Combo

## PS-ST7B + PS-BTML COMBO

This 6-piece set includes JE Enhanced SOPMOD Mil-Spec Stock, Mil-Spec DPMS® Platform based 6-position receiver end carbine buffer tube, carbine length buffer spring, 3.4 oz carbine buffer, latch plate (receiver end plate), and lock ring (castle nut).

# **BUFFER TUBES & ACCESSORIES**

# JE Advanced 8 Position Receiver End Extension Tube

## PS-BTMS2

The JE Advanced Receiver End Buffer Tube features 8-positions of adjustable length for your stock. It is machined from ASTM, Aircraft grade impact-extruded, 7075-T6 US Aluminum. Finished per MIL-A-8625 F Type III, Class 2 anodizing.

- AR-15/ AR-10 8 Position Mil-Spec Carbine Length Receiver End Extension Tube
- Material: Impact Extruded 7075 T6 ASTM Aircraft Grade US Aluminum
- Surface Treatment: Per Mil-A-8625 F, Type III, Class 2 Anodize
- Anti Tilt Detent Lip
- 3 Additional Drain Holes clearing debris that may cause malfunction during cycling
- Various Color options available
- Made in the USA

# JE Advanced Receiver End Extension Tube (light weight)

## PS-BTMS3

The JE Advanced 6 Position Receiver End Extension Tube are machined from ASTM Aircraft grade impact extruded 7075-T6 US Aluminum. Finished with MIL-A-8625 F Type III, Class 2 Anodizing.

- AR-15/ AR-10 6 Position Mil-Spec Carbine Length Receiver End Extension Tube
- Material: Impact Extruded 7075 T6 ASTM Aircraft Grade US Aluminum
- Surface Treatment: Per Mil-A-8625 F, Type III, Class 2 Anodize
- Anti Tilt Detent Lip
- 3 Additional Drain Holes that help clearing debris that may cause malfunction during cycling
- Various Color options available
- Made in the USA

# JE Enhanced Receiver End Extension Tube

## PS-BTML

The JE Enhanced 6-Position Receiver End Extension Tube is machined from ASTM Aircraft grade impact extruded 7075-T6 US Aluminum. Finished per MIL-A-8625 F Type III, Class 2 Anodizing. Advance Features include drain holes that prevents cycling malfunction. Single anti-tilt lip for proper detent pin timing and indexing.

- AR-15/ AR-10 6 Position Mil-Spec Carbine Length Receiver End Extension Tube
- Material: Impact Extruded 7075 T6 ASTM Aircraft Grade US Aluminum
- Surface Treatment: Per Mil-A-8625 F, Type III, Class 2 Anodize
- Anti Tilt Detent Lip
- 3 Additional Drain Holes helps clearing debris that may cause malfunction during cycling
- Various Color options available
- Made in the USA

# JE 6 Position Receiver End Extension Tube

## PS-BTM

The JE Enhanced 6-Position Receiver End Extension Tube is machined from ASTM Aircraft grade impact extruded 7075-T6 US Aluminum. Finished per MIL-A-8625 F Type III, Class 2 Anodizing.

- AR-15/ AR-10 6 Position Mil-Spec Carbine Length Receiver End Extension Tube
- Material: Impact Extruded 7075 T6 ASTM Aircraft Grade US Aluminum
- Surface Treatment: Per Mil-A-8625 F, Type III, Class 2 Anodize
- Various Color options available
- Made in the USA

# JE Enhanced 6 Position Receiver End Extension Tube Combo

## PS-BTML COMBO

This 5-piece set includes the JE Enhanced 6-position Receiver End Extension Mil-Spec Buffer Tube, carbine length buffer spring, 3.4 oz. carbine buffer, latch plate (receiver end plate), and lock ring (castle nut).

# Receiver End Extension Tube Latch Nut (Castle Nut)

## TS-ABT8

JE Standard Receiver End Extension Tube Lock Ring is machined out of 4140 Steel with proper heat treatment. Finished with Manganese Phosphate surface treatment to protect against corrosion.

- Material: 4140 Steel
- Proper machined rounded edges for proper threading
- Manganese Phosphate Coating against corrosion

# PISTOL BUFFER TUBES

# JE Advanced Pistol Receiver End Extension Tube

## PS-BTP2

JE has come out with a line of uniquely designed pistol buffer tubes for the user's personal style and preference. JE Advanced Pistol Receiver End Extension Tubes are machined out of ASTM Aircraft grade impact-extruded 7075-T6 US Aluminum. Finished per MIL-A-8625 F Type III, Class 2 Anodizing. Advance Features include; surface reduction machining for less restriction resulting in smoother operation. Anti-tilt lip for proper detent pin timing and indexing.

- AR-15 Pistol Receiver End Extension Tube
- Material: Impact Extruded 7075 T6 ASTM Aircraft Grade US Aluminum
- Surface Treatment: Per Mil-A-8625 F, Type III, Class 2 Anodize
- Surface reduction machining for less restriction resulting in smooth operation
- Fluted under-belly for pinning the first Generation of SB Braces for AR, and KAK Shockwave Blade 1.0 Stabilizer
- Various Color options available
- Made in the USA

# JE Advanced AR Pistol Receiver End Extension Tube (Light Weight)

## PS-BTP3

JE has come out with a line of uniquely designed pistol buffer tubes for the user's personal style and preference. JE Advance Lightweight Pistol Receiver End Extension Tubes are machined from ASTM Aircraft-grade impact extruded 7075-T6 US Aluminum. Finished per MIL-A-8625 F Type III, Class 2 Anodizing. Advanced Features including; Anti-tilt lip for proper detent pin timing and indexing.

- AR-15 Pistol Receiver End Extension Tube
- Material: Impact Extruded 7075-T6 ASTM Aircraft Grade US Aluminum
- Surface Treatment: Per MIL-A-8625 F, Type III, Class 2 Anodize
- Fluted Surface for clearing debris that may interfere with the performance of your SB Brace and KAK Shockwave Blade 1.0 Stabilizer
- Various Color options available
- Made in the USA

# JE Advanced Skeleton Pistol Receiver End Extension

## PS-BTP4

JE has come out with a line of uniquely designed pistol buffer tubes for the user's personal style and preference. JE Advance Lightweight Pistol Receiver End Extension Tubes are machined from ASTM Aircraft-grade impact extruded 7075-T6 US Aluminum. Finished per MIL-A-8625 F Type III, Class 2 Anodizing. Advanced Features including; Anti-tilt lip for proper detent pin timing and indexing.

- AR-15 Pistol Receiver End Extension Tube
- Material: Impact Extruded 7075-T6 ASTM Aircraft Grade US Aluminum
- Surface Treatment: Per MIL-A-8625 F, Type III, Class 2 Anodize
- Fluted Surface for clearing debris that may interfere with the performance of your SB Brace and KAK Shockwave Blade 1.0 Stabilizer
- Open slot for significant weight reduction and clearing of debris during cycling
- Various Color options available
- Made in the USA

# JE AR Pistol Receiver End Extension Tube

## PS-BTP

JE has come out with a line of uniquely designed pistol buffer tubes for the user's personal style preference. JE Light Weight Pistol Receiver End Extension Tubes are machined from ASTM Aircraft grade impact extruded 7075 T6 US Aluminum. Finished with per Mil-A-8625 F Type III, Class 2 Anodize. Advance Features including Anti-tilt lip for proper detent pin timing and indexing.

- AR-15 Pistol Receiver End Extension Tube
- Material: Impact Extruded 7075 T6 ASTM Aircraft Grade US Aluminum
- Surface Treatment: Per Mil-A-8625 F, Type III, Class 2 Anodize
- Anti Tilt Detent Lip
- Various Color options available
- Made in the USA

# JE AR Pistol Receiver End Extension Tube Combo

## PS-BTP COMBO

Everything needed to complete your AR Pistol Build. This combo kit includes the JE Pistol Receiver End Extension Mil-Spec Tube, carbine length buffer spring, 3.4 oz carbine buffer, latch plate (receiver end plate), and lock ring (castle nut).

The image shows two black rifle buffer tubes lying horizontally on a surface of light-colored gravel and small rocks. The tubes are positioned one above the other, with their threaded ends on the left. The text 'RIFLE BUFFER TUBES' is overlaid in the center in a large, bold, red, sans-serif font. The background is a natural, outdoor setting with a concrete curb at the top and a wooden stick lying on the gravel to the right.

# RIFLE BUFFER TUBES

# JE Rifle Length Receiver End Extension Tube

## PS-BTA

The JE Rifle Length Receiver End Extension Tubes are machined from ASTM Aircraft grade impact extruded 7075 T6 US Aluminum. Finished with per Mil-A-8625 F Type III, Class 2 Anodize.

- AR-15 A2 Receiver End Extension Tube
- A2 Fixed Stock Fitment
- Material: Impact Extruded 7075 T6 ASTM Aircraft Grade US Aluminum
- Surface Treatment: Per Mil-A-8625 F, Type III, Class 2 Anodize
- Made in the USA

# PISTOL GRIPS

# JE Featureless Paddle Fin Grip

## Available in 2 colors, Black/Tan

The JE featureless paddle fin Grip helps ensure the AR is compliant with California gun laws. Molded from a durable hard polymer; this pistol grip comfortably fits the shooters hand. The texturing at all contact points helps maintain excellent weapons control. A small storage compartment is also available inside for small objects.

- CA Compliant Featureless Grip
- Replacement for AR-15/M4 Pistol Grip
- Ambidextrous Thumb Rest for proper trigger finger placement and grip
- Ergonomic finger grooves for added control
- Aggressive TSP texturing for maximum grip
- Storage compartment
- One piece design
- Material: Dupont® Nylon 66 Polymer
- Made in the USA

**PS-PG2T-CA**

**PS-PG2B-CA**

# JE Advanced Ergonomic Pistol Grip

## Available in 2 colors. Black/Tan

Molded from a durable hard polymer, this pistol grip comfortably fits the shooter's hand. Texturing at all contact points helps maintain excellent weapons control. A small storage compartment is available inside for small objects.

- Replacement for AR-15/M4 Pistol Grip
- Ambidextrous Thumb Rest for proper trigger finger placement and grip
- Ergonomic finger grooves for added control
- Aggressive TSP texturing for maximum grip
- Storage compartment
- One piece design
- Material: Dupont® Nylon 66 Polymer
- Made in the USA

**PS-PG2B**

**PS-PG2T**

# JE Anti-Slip Ergonomic Sniper Pistol Grip

## PS-PG23B

The wide, hand filling palm swell and curved finger grooves provide the shooter all the support needed and desired. This design provides comfort and a secure grip while minimizing shooter fatigue, ultimately leading to enhanced trigger control.

- Replacement for AR-15/M4 Pistol Grip
- Oversize molding for bigger hand grip
- Unique back strap design for proper trigger finger placement and grip
- Ergonomic finger grooves for added control
- Aggressive TSP texturing for maximum grip
- Storage compartment
- One piece design
- Material: Dupont® Nylon 66 Polymer
- Made in the USA

# JE Rubber Textured Grip with Storage Compartment. Available in 2 Colors: Black/Tan

Precisely molded, this grips hand filling design, improves trigger control and shooting comfort. The palm swell, and finger grooves ensure proper hand placement for excellent trigger control.

- Replacement for AR-15/M4 Pistol Grip
- All around rubber over-molding
- Unique back strap design for proper trigger finger placement and grip
- Aggressive Texturing for maximum grip
- Storage compartment
- One piece design
- Material: Dupont® Nylon 66 Polymer
- Made in the USA

# JE Heavy Duty Ergonomic Finger Groove Grip Available in 2 Colors. Black/Tan

Precisely molded, this grips hand filling design, improves trigger control and shooting comfort. The palm swell, right thumb rest and finger grooves ensure proper hand placement for excellent trigger control.

- Replacement for AR-15/M4 Pistol Grip
- Unique back strap design for proper trigger finger placement and grip
- Aggressive all around texture for maximum grip
- Oversized contour design for maximum comfort and weapon control
- One piece design
- Material: Dupont® Nylon 66 Polymer
- Made in the USA

**PS-PG5B**

**PS-PG5T**

# JE AK47 Enhanced Operator Pistol Grip

## PS-PG8B

This drop in upgrade for the AK platform was designed for better handling and control. The sturdy polymer handgrip comfortably fits the contours of the shooters hand. The aggressive texture was designed to improve positive weapons control.

- Replacement for AK47 and variant Pistol Grip
- Ambidextrous Thumb Rest for proper trigger finger placement and grip
- Ergonomic finger grooves for added control
- Unique back strap design for proper trigger placement
- Aggressive TSP texturing for maximum grip
- Storage compartment
- One piece design
- Material: Dupont® Nylon 66 Polymer
- Made in the USA

# JE Pro Series Remington 870 Shotgun Pistol Grip with Adjustable Stock Conversion

## PS-PG24B

The JE pistol grip directly attaches over the pre-existing port after removing the original stock to allow the shooter to convert their Remington 870 into a hip fired shotgun. The back end of this grip is also threaded to take on a mil-spec AR-15 buffer tube allowing the option of installing a separate stock kit (sold separately). 3-shotshell side saddle is optional. All tooling and hardware included for installation.

- Replacement Grip and Collapsible Stock conversion for Remington 870 fixed stock
- Ergonomic finger grooves for added control
- Unique back strap design for proper trigger placement
- Aggressive TSP texturing for maximum grip
- Storage compartment
- One piece design
- Material: Dupont® Nylon 66 Polymer
- Made in the USA

# Mossberg M500 Ergonomic Raptor Grip

## PS-PG3B

The unique angle design of the Raptor Grip minimizes felt recoil, allowing control shot after shot. The enhanced texture gives the Shooter great control of the weapon.

- Traditional old school design
- Enhanced comfort and solid during recoil
- Fits standard Mossberg M500
- High strength industrial grade polymer
- Hardware included and easy installation
- Made in the USA

# MAGAZINES

# PS-MG308-10B

To accompany our line of AR-15 .556 NATO (.223 Remington) Magazines, JE has also designed and manufactured magazines for the AR-10. JE has launched two different round capacity magazines in the .308 Winchester (7.62 x 51 NATO) Calibers. JE has introduced a 10 round and a 20 round magazine for the AR-10's. JE's design features a strong polymer constructed constant curve ergonomic body, and an anti-tilt follower. These are lightweight but very durable and reliable magazines.

## Fits:

ArmaLite AR-10A (Series A pattern lower)  
Bushmaster .308 ORC  
Colt LE901-16S  
Core Rifle System Core 30  
DPMS LR308 rifles  
JP Enterprises LRP-07  
Knights Armament SR-25 rifles  
LaRue OBR  
Les Baer .308  
LMT .308 MWS  
LWRCI REPR  
Mega Arms Maten  
POF-308  
Remington R-25  
Ruger SR-76 2  
Smith & Wesson Military and Police 10  
SIG Sauer 716  
Similar type lower receivers

## Features and Specifications:

- Caliber: .308 Winchester (7.62x51 NATO)
- Capacity: 10 Rounds and 20 rounds
- Body Material: Reinforced Polymer Construction
- Spring Material: Stainless Steel Spring
- Follower Material: Polymer
- Baseplate Material: Polymer
- Constant curve body
- Anti-tilt follower
- Finish: Black

# PS-MG308-20B

# PS-MG223-10B

JE has developed a line of AR- Magazines that flawlessly perform in every condition encountered. Available in a 10 round 5.56x45mm NATO (.223Remington), A 10-30 round 5.56x45mm NATO (.223 Remington) and a 30 round 5.56x45mm NATO (.223 Remington). Our technology has enhanced the overall strength, durability and reliability the users demand.

## Fits:

Most AR-15/M4 platforms  
HK 416  
HK MR556A1  
HK M27 IAR  
British SA-80  
FN SCAR MK 16/16S

## Features and Specifications:

- Caliber: .223 Remington, 5.56mm NATO
- Capacity: 3 Magazines available; 10 Rounds, 10-30 Rounds and 30 Rounds
- Body Material: Polymer
- Spring Material: Enhanced USGI-Spec Stainless Steel
- Follower Material: Polymer
- Baseplate Material: Polymer
- Constant Curve Design
- Anti-Tilt, Self Lubricating Follower
- Ribbed Gripping Surface
- Over-Travel Insertion Stop On The Spine
- Non-Windowed
- Manufactured in the USA

# HANDGUARDS

# JE Full Top Picatinny Rail Keymod™ Handguard

JE Keymod™ Handguard with full top Picatinny rail provides the operator adequate amount of space for sights and optics. The Keymod hole system gives the user multiple options for Keymod rail attachments. This design demonstrates the ergonomics and durability that users demand, while maintaining the lightweight nature.

- Material: 7075-T6 ASTM Aircraft Grade US Aluminum
- Surface Treatment: Per MIL-A-8625 F, Type III, Class 2 Anodize
- Ultra light and ergonomic design
- 1913 Picatinny Top Rail
- Keymod™ Modular Design
- Anti Rotation
- Steel Barrel Nut
- All installation hardware included
- 1 1/16 Crowfoot wrench not included
- Interior diameter 1.35"

Available in different sizes and colors upon request.

15"	PS-HGKM15BLK

# JE Full Top Picatinny Rail M-Lok® Handguard

## PS-HGMLK15BLK

JE M-Lok® 15" Handguard with full top Picatinny rail was designed to eliminate the bulk but still retain durability. This enhanced M-Lok handguard provides a lightweight free floating design to build your custom AR.

- Material: 7075-T6 ASTM Aircraft Grade US Aluminum
- Surface Treatment: Per MIL-A-8625 F, Type III, Class 2 Anodize
- Ultra light and ergonomic design
- 1913 Picatinny Top Rail
- M-Lok® Modular Design
- Anti Rotation
- Steel Barrel Nut
- All installation hardware included
- 1 1/16 Crowfoot wrench not included
- Interior diameter 1.35"

# JE Keymod™ Handguard with Top Rail Relief

JE Keymod™, free float handguard installs on standard mid length AR-15 rifles and the universal Keymod rail platform accepts all standard Keymod accessories. The short Picatinny rails located on the front and rear of the handguards allow the option for back up sights or other attachments.

- Material: 7075-T6 ASTM Aircraft Grade US Aluminum
- Surface Treatment: Per MIL-A-8625 F, Type III, Class 2 Anodize
- Ultra light and ergonomic design
- 1913 Picatinny Top Rail
- Keymod™ Modular Design
- Anti Rotation
- Steel Barrel Nut
- All installation hardware included
- 1 1/16 Crowfoot wrench not included
- Interior diameter 1.35"

Available in different sizes and colors upon request.

# FORWARD GRIPS

# Forward Angled Grip

## Available in 2 Colors, Black/Tan

This Low- Profile forward grip helps shooters with maximum recoil control, allowing the shooter to more accurately and efficiently keep rounds on target. This forward grip helps shooters with more natural body mechanics, precise weapons control, and less operator fatigue.

- Mounts to Standard Picatinny rail
- Interchangeable finger shelf
- Polymer 3 piece design
- Helps mitigate recoil and weapon control
- Made in the USA

**PS-FG22B**

**PS-FG22T**

# 5 Positions Adjustable Vertical Grip

## Black/Tan

Constructed of strong polymer blends, this 5 positions adjustable foregrip slides over Picatinny forend rails and easily locks into place. The push button on the left side of the grip easily and quickly allows the shooter to change between 5 locking positions: 45° forward/rearward, or folded forward/backward parallel with the hand guard for storage or carry.

- Full size vertical grip
- 5 adjustable positions
- Picatinny compatible
- Small storage compartment
- Made in the USA

**PS-FG7B**

**PS-FG7T**

# Stubby Vertical Grip

## PS-FG4B

The “stubby” low-profile grip keeps hands close to the weapon for maximum control. The deep ridges provide grip for wet hands or gloves. A small storage compartment for batteries or other small objects is also provided with the hollow center.

- Compact size vertical grip
- Small storage compartment
- Picatinny Compatible
- Made in the USA

# Ergonomic Vertical Fore-Grip with Universal Pressure Switch, Black/Tan

Made of polymer-resin, this fore-grip will improve overall control of your rifle and give more stability to the shooter. Securely clamps to foreends with Picatinny or weaver-style rails on underside. The hollow center provides a convenient storage space for spare batteries or other small objects.

- Full size vertical grip
- Ergonomic for maximum comfort and grip
- Subtle battery storage
- Picatinny compatible
- Made in the USA
