

An aerial photograph of a demolition site in a city center. The site is a rectangular area between several tall, modern buildings. In the center of the site, there is a large pile of debris and rubble. To the left, a yellow excavator is working on a pile of dark material. To the right, an orange excavator is working on a pile of lighter material. The surrounding buildings are tall and have many windows. The sky is clear and blue.

Our Capabilities

We provide end-to-end services for the delivery of decommissioning and demolition projects across diverse industry sectors.

DEMOLITION CONSULTING

Preparation of closure cost estimates and draft demolition methodologies to support planning, budgeting, and early contractor involvement for sustaining capital, decommissioning, and closure works.

HAZARDOUS MATERIAL REMOVAL

Hazardous material and asbestos removal for remote site decommissioning of heavy industrial and mine infrastructure

DEMOLITION & DECOMMISSIONING

Complete and partial structure demolition, including internal, external, bridge, multi level, and high risk works, delivered with precision project management and specialised machinery for complex or at height environments.

CONTAMINATED SITE REMEDIATION

Contaminated site remediation for polluted sites, including industrial mine sites. Keeping with all legislated State, Territory, and Commonwealth environmental and OHS regulations.

WASTE RECYCLING

Recycling targets are set, tracked, and reported for every project, with an overarching objective to minimise materials entering landfill either through reuse or recycling.

CIVIL WORKS

Core fleet of late model equipment and machinery to undertake earthmoving, bulk earthworks, remediation, civil works, site clearing, site preparation, and site clean ups.

We draw on the experience, skills and commitment of **our people** to deliver projects safely and effectively for our clients.

Our Leadership Team

At DEMEX, we're proud of the team behind every project. Their experience and commitment mean we not only deliver what we promise, but consistently add value through smart planning, collaboration, and quality delivery. Guiding this capability is our leadership team that sets the tone for how we work, leading with resourcefulness, a focus on outcomes and systems and a commitment to innovation across the business.

Multi Award Winning Contractor

Our approach has been acknowledged by industry peers, with DEMEX receiving numerous World Demolition awards for its achievements in project delivery and safety excellence.

“The recognition was satisfying affirmation of the years of work that DEMEX have invested into building the structure of a sustainable business that we now know can hold its own with the best in the world.”

- Richard Todd, Director

Safety. It's our priority on every project.

While the project delivery environment is highly dynamic, our approach to delivering is methodical, solution-driven and focused on details.

Commitment, integrity and reliability are the hallmarks of our approach

Work Health and Safety Accreditation Scheme – Federal Safety Commission (FSC)

DEMEX holds Federal Safety Accreditation (FSC) for completion of projects that fall under the scope of the Australian Government building and construction Work Health and Safety Accreditation Scheme (Accreditation number 598).

Queensland Government – PQC Certificate of Prequalification

DEMEX has been formally registered on the second release of the Prequalification (PQC) System for contractors managed by the Department of Housing and Public Works (Registration number 4624).

DEMEX has obtained a PQC rating of level 3 with a maximum contract value of \$5,200,00.00 per contract.

New South Wales - Contractor Accreditation buy.nsw

Under buy.nsw supplier arrangements, DEMEX is accredited under two schemes: SCM0256 – General construction works up to \$1M and SCM1461 Procurement List for contracts valued \$1M to \$9M (Prequalification Scheme for General Construction Works).

We are accredited for the provision of demolition, excavation, site remediation and the removal of asbestos and hazardous materials. The IMS has been independently certified by ATLAS Certification Pty Ltd to comply with the following Standards:

Motor Fleet Insurance
QLD Workers Compensation
NSW Workers Compensation

Martina Hazelbane
Aboriginal Cultural Advisor

Together with our delivery partners, we strive to conduct our business in an ethical and responsible manner. Our approach to sustainability commitments balances cultural, economic, environmental, and social considerations.

Our Commitments

Sustainability

We maintain a strong sustainability track record, with resource recovery solutions for projects including screening for waste minimisation, scrap metal processing and recycling, precious metal segregation and salvage, onsite concrete crushing for reuse, and remediation techniques to reduce landfill exposure. Our environmental management approach is tailored according to project needs and in keeping with all relevant legislation and regulations.

Community

As the projects we deliver take us to diverse communities in urban, regional, and remote locations, we understand the responsibility conferred upon us to ensure meaningful economic and social outcomes are realised by local businesses and the broader community. The approach taken is underpinned by compliance with relevant legislation, such as the Commonwealth Modern Slavery Act for supply chain integrity, and by forging commercial relationships with our Australia wide network of prequalified suppliers and contractors.

Indigenous

The importance of meeting our obligations to Indigenous Australians is well understood. Accordingly, we have implemented an Indigenous Employment Strategy (IES), which details our commitment to creating employment opportunities for Indigenous Australians. In conjunction with our Indigenous cultural advisor, we seek to create employment opportunities that help build competency and confidence in the individual. During project delivery, we strive to build capacity in each individual, allowing them to gain skills that lead to securing future employment, either with DEMEX or other employers.
