AI

Using AI in the Right Way Can Make the Process of Teaching and Learning Truly Wonderful.

Using AI is not just about asking questions and getting answers from ChatGPT or Gemini. Anyone can do that. AI has far more potential than simply giving answers or generating media.

Questions to Ask

Am I using AI to enhance the outcomes for each child in my classroom?

Am I using AI to understand the learning style of each child in my classroom?

Am I using AI to help children revise lessons after class, explore concepts independently, and get answers to their questions in a safe and age-appropriate AI environment?

Am I using AI to provide an intuitive AI Agent that works alongside each child to guide them toward their individual learning goals?

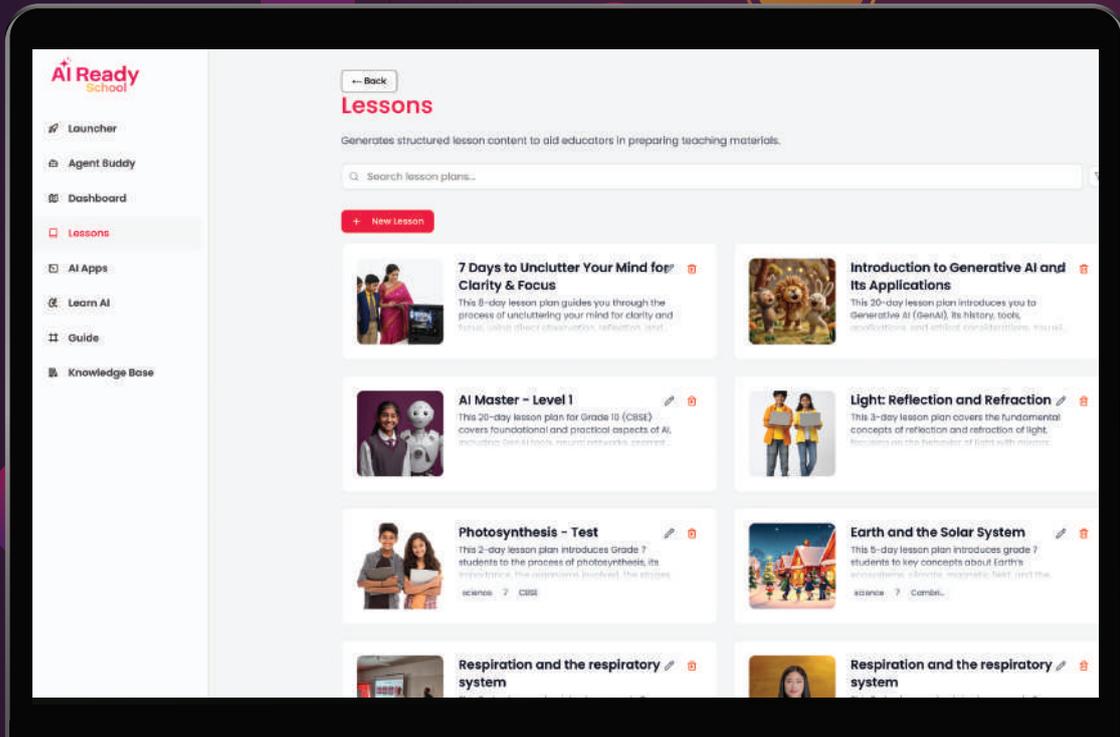

Can I see how my students are using AI — what questions they are asking and which tools they are using?

Do I have a personal AI Agent that can make my work easier and give me more time to focus on creative aspects?

Do I have an AI tool that lets me configure lessons, generate custom plans, create multimedia-rich content, set up assessments and assignments, and track students' progress and insights?

Do I have a single platform that brings all these capabilities together in one place?

Questions with
Morpheus

LESSON CREATOR

Morpheus can build your entire teaching material package as per your requirement.

Gain freedom from fixed teaching materials that you don't want to use but are forced to follow.

Your Class. Your Style.

Configure your teaching materials with the help of our AI generators and assign to students.

- ✔ Mapped to your curriculum
- ✔ Upload additional documents
- ✔ Specify session duration
- ✔ Specify session count
- ✔ Select learning outcomes
- ✔ Add special instructions / skills
- ✔ Click generate

Good Job! Your Lesson Plan is Ready!

Well, that's not it. You can now generate presentations with notes, add videos, questions, tasks for each of the session topics super fast.

- ✔ Generate presentation with images
- ✔ Generate narration text & audio
- ✔ Find and add relevant videos
- ✔ Find and add interactive elements
- ✔ Add tasks that can be submitted
- ✔ Generate assessment tests
- ✔ Preview and make changes
- ✔ Publish and assign to students

Super! You have Assigned the Lesson to Students.

Well, there's more to it. You can also track the status on how students are progressing and performing.

- ✔ Check individual progress
- ✔ Check the scores
- ✔ Check answered questions
- ✔ Check AI's suggestions
- ✔ Check AI's interventions and approve

No More Private Tuition

When schools can solve the challenge of personalization and can support every student, parents no longer need to send their children to private tuition.

We know that it is not easy to achieve with the traditional mechanisms, even with digital content and test platforms.

It is now possible with Morpheus.

Pricing

Pricing for Morpheus is simple and straightforward.

CBSE

Customers & Partners

Education Knot is an organization where its members are committed to providing trustworthy products and services to schools.

The AI-Ready School App is truly a game-changer for teachers. It offers a range of commendable features that simplify routine tasks beyond teaching. With this app, we can effortlessly generate high-quality worksheets, assignments, lesson plans, and informative manuals, making our workload much more manageable.

As teachers, one of our biggest challenges is providing students with a diverse set of assignment questions. The AI-Ready School App makes this process seamless. Additionally, it enables us to create engaging content, including images, videos, and presentations, which help explain complex topics in a more interactive and understandable way.

This app is nothing short of a blessing for educators. It transforms time-consuming, repetitive tasks into quick and efficient processes, allowing us to focus more on what truly matters—teaching and inspiring our students.
