#### AR-15/AR-10 Mil-Spec 8 Position Anti-Friction Buffer Tube

Designed from the ground up to be feature packed, our 8-position mil-spec anti-friction buffer tube is a must have for any hardcore AR enthusiast. Machined with ten recessed channels that provide both weight and friction reduction, this buffer tube will allow even the tightest mil-spec stocks to slide with ease.

- » Recessed pockets for weight reduction
- » 3 drain holes for marine environments
- » Type III hard-coat anodized 6061-T6 aluminum
- » 8 position Mil-Spec diameter buffer tube
- » Detent-lock prevents tube rotation
- » Accepts all Mil-Spec dimension stocks
- » AR-15 & AR-10 compatible
- » Available colors: Black/Tan/OD Green/Red/Blue

#### AR-15/AR-10 Mil-Spec 6 Position Fluted Buffer Tube

Manufactured to be the pinnacle of our 6-position mil-spec line, the JE Machine Tech fluted buffer tube is a culmination of many industry leading features. Milled with seven fluted channels, this buffer tube provides ample weight reduction while lowering the felt friction of the stock. Much like our BTM-DH, this buffer tube also comes with three drain holes that are milled into the rear positional locks.

- » Deep Fluting for weight reduction
- » 3 drain holes for marine environments
- » Type III hard-coat anodized 6061-T6 aluminum
- » 6 positions Mil-Spec diameter buffer tube
- » Detent-lock prevents tube rotation
- » Accepts all Mil-Spec dimension stocks

TS-EP23	Standard End Plate
PS-ABT7B	3 oz Buffer

### PS-BFSC4

#### Gen.3 223 Silent Recoil Buffer Spring System

The JE Machine AR-15 silent recoil system is at the forefront of AR buffer technology. Our system is a drop-in replacement for the traditional AR-15 carbine spring and buffer. This revolutionary patented one-piece guide rod assembly eliminates many of risks of other "cap screwed" recoil systems on the market while providing reduction in buffer noise and felt recoil. Our one-piece guide rod is constructed from high-quality 6061-T6 Aluminum and is finished with a type III hard coat anodize to reduce ware. This system is truly a testament to the ingenuity of JE Machine Tech USA and is a must-have for new and veteran shooters alike.

- » Self-contained & drop-in design for easy installation
- » Reduce felt recoil
- » Type III hard-coat anodized 6061-T6 aluminum guide rod for durability
- » Machined 4140 Steel
- » No cap screw in the front compared to other recoil spring systems to prevent breaking and improve reliability
- » For carbine buffer tube only, not compatible with rifle buffer tube

### GEN.3 223 SILENT RECOIL BUFFER SPRING SYSTEM

# Stocks.

## PS-ST7B

### JE Machine AR-15 SOPMOD Stock

A modern take on a tried-and-true platform, the JE Machine AR-15 SOPMOD stock pays homage to the iconic system designed by NSWC Crane in the early 2000s. Unlike the classic NSWC Crane design, the JE Machine variant comes equipped with a quick detach sling mount built into the stock body. In addition, the JE Machine sopmod stock takes full advantage of modern high strength, impact-resistant polymers to ensure a durable stock fit for years of service.

- » Sloping cheek weld provides a wide contact surface for user comfort
- » Integrated quick detach sling swivel sockets on both sides
- » Watertight battery storage for CR123A 3V lithium batteries
- » Impact-resistant, high-strength polymer
- » Fits Mil-Spec carbine buffer tubes
- » CA compliant edition available
- » Available colors: Black/Tan
- » Made in the USA

**JE MACHiNE Adaptive Skeletonized AR-15 Buttstock**

Designed to provide additional ergonomics while reducing weight, our adaptive skeletonized stock is an easy choice for anyone looking to update a classic rifle. Constructed of high-strength, impact-resistant polymer, our stock is built to provide years of service in the harshest environments.

In addition, this stock is equipped with forward and back quick detach mounting points. The JE Machine adaptive skeletonized stock is produced in black or tan and has a compliance variant available.

- » Strong and robust design
- » Two QD sockets, one in the front and one at the rear
- » Impact-resistant, high-strength polymer
- » Fits Mil-Spec carbine buffer tubes
- » CA compliant edition available

### Skeletonized Pistol Stabilizer Blade

Our skeletonized pistol stabilizer blade is manufactured to exacting tolerance to ensure a secure fit between the stabilizer and the pistol buffer tube. With the device secured, a shooter can provide lateral pressure on the fin allowing for a more stable shot, thus increasing accuracy. The JE Machine skeletonized pistol stabilizer blade is a perfect addition to any AR pistol that requires greater accuracy while staying in compliance with federal regulations.

- » Ultra-lightweight. Weighs a scant 4.8 oz
- » Securely lock it in place with a set screw
- » Designed to fit any pistol buffer tube with a diameter up to 1.25"
- » Forearm strap slots
- » Impact-resistant, high-strength polymer
- » Available colors: Black/Tan
- » Made in the USA

# Pistol Grips.

## PS-PG25B

### 1911 AR PISTOL GRIP

Modeled after the iconic 1911 family of handguns, our AR 1911 pistol grip allows the user to equip their rifle with the very same panache and tried-and-true ergonomics of the 1911. Constructed from durable 6061-T6 aluminum and milled to a tolerance that will accept most 1911 grip panels, our pistol grip is the perfect addition for any AR enthusiast that enjoys the look and feel of the 1911.

\*1911 grip panels not included

\* Panel screws not included

- » 6061-T6 Aluminum
- » Allows you to further customize your AR platform
- » Works with ALL Mil-Spec AR Lower Receivers
- » Maintains comfort and performance

**FEATURELESS**

**PS-PG2B**

**AR Ergonomic Pistol Grip**

Molded to fit the natural contours of the human hand, our AR ergonomic pistol grip is an excellent choice for new and seasoned shooters alike. Constructed from a textured high strength, impact-resistant polymer, our ergo grip was designed to help the shooter maintain proper control of the rifle in the most adverse conditions. In addition, our ergo pistol grip has a built-in storage compartment equipped with an easy access trap door. This compartment is perfect for storing small items such as rifle lube, CR123A batteries, and ear protection.

- » Impact-resistant, high-strength polymer
- » Ergonomic non-slip design
- » Integrated extended beavertail provides better control during firing
- » Hinged door in the bottom of the grip for quick access to the storage
- » Easy to install by replacing the stock grip, no gunsmithing required
- » Available colors: Black/Tan
- » Made in the USA

**HINGED STORAGE DOOR**

**PS-PG2B-CA**

**AR Ergonomic Pistol Grip**

Boasting many of the same features as our traditional ergonomic pistol grip, our compliance pistol grip allows the user to convert their AR builds to meet changing laws while maintaining a level of comfort while manipulating their rifle. Unlike some of our competitors, we decided to make our compliance pistol grip ambidextrous by fixing the fin directly in the middle of the back strap. This allows left, right, and switch-handed shooters the ability to comfortably control any rifle equipped with our pistol grip.

- » Impact-resistant, high-strength polymer
- » Ergonomic non-slip design
- » Integrated extended beavertail provides better control during firing
- » Hinged door in the bottom of the grip for quick access to the storage
- » Easy to install by replacing the stock grip, no gunsmithing required
- » CA compliant edition
- » Available colors: Black/Tan
- » Made in the USA

## PS-PG5B

### Titan AR Pistol Grip

Developed from the beginning to be the apex of shooter comfort and rifle control, our titan grips ergonomic design makes it an obvious choice for precision long-range and competition shooting. Molded from high strength, impact-resistant polymer, the titan grips contours conform naturally to the hand providing ample comfort and reduced fatigue. The added addition of the right thumb rest increases the overall ergonomics of the grip while allowing the user to obtain increased control over the rifle.

- » Impact-resistant, high-strength polymer
- » Heavy-duty grip
- » Built-in finger grooves for a solid grip
- » Easy to install by replacing the stock grip, no gunsmithing required
- » Available colors: Black/Tan
- » Made in the USA

## PS-223MLKI

### AR-15 M-LOK® Versatile Free Float Handguard

Designed from conception to be slim, lightweight, ergonomic, and resilient; the full line of JE Machine Tech VFF M-LOK® handguards truly embodies the definition of functionality. Constructed from 6061-T6 aluminum, machined with twin anti-rotational tabs, and finished with a sleek type III hard-coat finish, the VFF line is built to look good while being resilient enough to tackle even the most demanding industry needs. In addition, the full VFF line is manufactured with a clamp-on system, nullifying the need to time your barrel nut during assembly.

When summed up, the JE Machine Tech VFF line of M-LOK® handguards are the perfect pairing of feature set and reliability, making them the absolute best choice for any AR.

- » Clamp-on system, no timing required for easy installation
- » Type III hard-coat anodized 6061-T6 aluminum
- » Free float and lightweight design
- » 6 built-in QD sockets
- » Full Picatinny rail on top
- » Available in 7"/10"/12"/15"
- » M-LOK® compatible
- » 1.315" ID
- » Anti-rotation tabs
- » Steel barrel nut and all mounting hardware included

# Handguards.

## PS-223MLKG

### AR-15 M-LOK® Free Float Versatile Quad Rail Handguard

Conceived to be an intermediary option between M-LOK® and Picatinny, the FFVQ line of M-LOK® handguards is the perfect marriage of old and new. Starting from the front we kept four Picatinny mounting points to allow the user the option to direct-attach accessories. Moving back, we removed the bulky Picatinny and replaced it with M-LOK® mounting points.

This swap allowed us to maximize the available mounting surface while reducing weight. In addition, the mid-M-LOK® mounting surfaces slim the overall profile on the handguard while increasing ergonomics and comfort. At the rear of the handguard, you will find a pair of quick detach mounts and our clamp-on system. This system nullifies the need to time the barrel nut during installation, making the FFVQ line of M-LOK® handguards the perfect option for users transitioning to M-LOK®.

- » Clamp-on system, no timing required for easy installation
- » Type III hard-coat anodized 6061-T6 aluminum
- » Full Picatinny rail on top and fixed Picatinny rails at 3,6,9 o'clock positions near the front
- » Smooth middle for an ergonomic grip
- » 2 built-in QD sockets
- » Anti-rotation tabs
- » Steel barrel nut and all mounting hardware included
- » 1.357" ID
- » Available in 7"-11.10oz/10"-14.05oz/12"-14.95oz/15"-17.20oz

### PS-MZ8

#### Sidewinder Blast Diffuser for .556/.223

The JE Machine sidewinder blast diffuser is engineered to divert the concussion and side blast forward of the weapon system instead of venting to the side. Additionally, the Sidewinder aids in minimizing dust when firing from a prone position that would traditionally be seen when firing with a standard flash hider or muzzle brake.

- » Directs concussion and muzzle blast forward
- » Improves comfort and safety for the shooter and those nearby the firing line
- » 1/2-28 thread for .223 / 5.56 only
- » Black nitride finished
- » Fluted design
- » Made in the USA
